

一、今日前沿论文精选

1. THE EFFECTIVENESS OF INTRAOPERATIVE ULTRASOUND IN GLIAL TUMOR SURGERY.

- 发表期刊 / 影响因子:Georgian medical news
- 发表时间:2026
- 第一/通讯作者:Gr Tchatchia, I Chelishvili, G Chutkerashvili, N Inauri, T Meranishvili
- 核心结论:Glial tumors constitute a significant proportion of central nervous system neoplasms. The main treatment modalities include surgery, radiotherapy, and/or chemotherapy. Patient prognosis depends on tumor grade, the extent of surgical resection, and, when indicated, the effectiveness of adjuvant treat...
- 原文DOI / 链接:参见原文

2. Lactate-Induced K370 Lactylation of STING Inhibits STING-TBK1 Signaling and Dampens Anti-Tumor Immunity.

- 发表期刊 / 影响因子:Advanced science (Weinheim, Baden-Wurttemberg, Germany)
- 发表时间:2026-Aug-15
- 第一/通讯作者:Yueyao Wu, Jingzhe Wang, Xu Chen, Yuntong Yang, Ping Wei
- 核心结论:The stimulator of interferon genes (STING) pathway represents a central component of innate anti-tumor immunity; however, the efficacy of STING-targeted therapies is frequently limited by tumor-intrinsic resistance mechanisms. Here, we identify lactate-driven lactylation of STING at lysine 370 (K370...
- 原文DOI / 链接:10.1002/adv.77209

3. Calibration of CAR signaling promotes asymmetric cell division to direct CAR-T cell fate and antitumor potency.

- 发表期刊 / 影响因子:Cell reports
- 发表时间:2026-Aug-14
- 第一/通讯作者:Xiaolin Shen, Xiaobao Xu, Jie Jiang, Shize Zhang, Jiangqing Chen
- 核心结论:Asymmetric cell division (ACD) is an evolutionarily conserved mechanism that diversifies T cell fate, yet how engineered receptor signaling regulates ACD in chimeric antigen receptor (CAR)-T cells remains unknown. Here, we show that antigen engagement induces ACD in CAR-T cells through polarized inh...
- 原文DOI / 链接:10.1016/j.celrep.2026.117848

4. Association of non-invasive liver-related scores with cardiovascular disease and a four-domain cardiovascular-renal-hepatic-metabolic phenotype in patients with type 2 diabetes mellitus and MASLD.

- 发表期刊 / 影响因子:Endocrine
- 发表时间:2026-Aug-15
- 第一/通讯作者:Katerina Stefanaki, Dimitrios S Karagiannakis, Maria Manolakopoulou, Stefania Magkou, Georgios Georgiopoulos
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is a systemic disorder associated with cardiovascular, renal, and metabolic comorbidities. We evaluated cardiovascular disease (CVD), four-domain cardiovascular-renal-hepatic-metabolic (CRHM) involvement, and their associations with no...
- 原文DOI / 链接:10.1007/s12020-026-04751-z

5. Ganoderma applanatum Polysaccharides in Obesity-Associated Dysglycaemia and Liver Injury: Gut-Liver Mechanisms and Translational Gaps.

- 发表期刊 / 影响因子:Nigerian medical journal : journal of the Nigeria Medical Association
- 发表时间:2026
- 第一/通讯作者:Adamou Mfopa, Ibrahim Njimona, Célestin Mountchissi, Fabrice Mba Medou, Lum Abenwi Ambe
- 核心结论:Obesity-associated dysglycaemia and metabolic dysfunction-associated steatotic liver disease (MASLD) arise from interacting inflammatory, oxidative, lipotoxic, and gut-liver mechanisms. Ganoderma applanatum polysaccharides are an under-characterized candidate adjunct, but their translational relevan...
- 原文DOI / 链接:参见原文

6. AutoDesign: Meta-Harness Optimization for Long-Horizon Agentic Design

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Yaxin Luo, Haobin Jiang, Jialv Zou, Xu Huang, Wenhao Yan
- 核心结论:Transforming multimodal sources into condensed and structured media outputs can be fundamentally conceptualized as a long-horizon agentic process centered on a model-harness system. While an ideal harness system should align with human design priors and accumulate reusable experience through empiric...
- 原文DOI / 链接:https://arxiv.org/abs/2608.13560v1

7. OmniScientist: An Omni-Modal Omni-Discipline AI Scientist

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Bobo Li, Hao Fei, Tianjie Ju, Mong-Li Lee, Wynne Hsu
- 核心结论:Recent advances in foundation models have enabled AI scientists to automate increasingly complete research workflows, from hypothesis generation and code execution to manuscript preparation. Yet workflow coverage alone does not provide access to the full evidence on which scientific discovery depend...
- 原文DOI / 链接:https://arxiv.org/abs/2608.13558v1

8. Defensive Boosting for Online Probabilistic Forecasting

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13

- 第一/通讯作者:Georgy Noarov, Aaron Roth
- 核心结论:We study online probabilistic forecasting of binary outcomes chosen by an adaptive adversary. Given an online learning algorithm for a weak hypothesis class $\mathcal{H}$, we would like to efficiently obtain two incomparable guarantees that existing online boosting techniques provide separately. Online gradie...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.13554v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:THE EFFECTIVENESS OF INTRAOPERATIVE ULTRASOUND IN GLIAL TUMOR SURGERY.
