每日医学科研精读日报 | 2026年11月05日

一、今日前沿论文精选

1. Usability Testing to Improve the User Experience of an Electronic Patient-Reported Outcome System for Chimeric Antigen Receptor T-Cell Therapies.

- 发表期刊 / 影响因子:JCO clinical cancer informatics
- 发表时间:2026
- 第一/通讯作者:Foram Khatsuria, Christel McMullan, Karen L Shaw, Anita Walker, Hayley Ellis
- 核心结论:Treatment with chimeric antigen receptor T-cell (CAR-T) therapies has led to remission in patients with relapsed/refractory hematologic malignancies. However, CAR-T therapies are associated with severe toxicities. An electronic patient-reported outcome (ePRO) system for CAR-T therapies was developed…
- 原文DOI / 链接:10.1200/CCI-26-00083

2. Pembrolizumab Activity in Tyrosine Kinase Inhibitor-Refractory Metastatic GIST: A Case Report.

- 发表期刊 / 影响因子:Cancer reports (Hoboken, N.J.)
- 发表时间:2026
- 第一/通讯作者:Neharika Bandaru, Job Shiach, Mark Agulnik
- 核心结论:Gastrointestinal stromal tumors (GISTs) are commonly driven by activating mutations in KIT or PDGFRA. Although sequential tyrosine kinase inhibitors (TKIs) have improved outcomes in advanced disease, acquired resistance is common. Prospective studies of immune checkpoint blockade in GIST have shown…
- 原文DOI / 链接:10.1002/cnr2.70726

3. Expression Patterns of Histone Modification Regulators Predict Prognosis and Microenvironment Characteristics in Gastric Cancer.

- 发表期刊 / 影响因子:IET systems biology
- 发表时间:2026
- 第一/通讯作者:Yue Huang, Ya Gao, Fuli Xie, Xiaoxiang Rong, Rui Zhou
- 核心结论:Multiple studies have demonstrated a significant correlation between histone modifications and tumour initiation and progression. However, it remains unclear whether the histone modification profile contributes to the classification of patients with gastric cancer (GC). After analysing transcriptomi…
- 原文DOI / 链接:10.1049/syb2.70089

4. Impact of cardiometabolic and renal phenotypes on the prevalence of type 2 diabetes in the geriatric population of Añisok, Equatorial Guinea: A prospective cohort study (2024-2025).

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:María Nieves Ayetebe Abogo, Mariano Guerrero Fernández, Roberto Ferrándiz Gomis, Raquel Jiménez Fernández
- 核心结论:Type 2 diabetes (T2D) represents a growing global health challenge, with management increasingly focused on organ protection and mitigating cardiometabolic-renal risk. In sub-Saharan African geriatric populations, the interplay between frailty, hypertension, and obesity presents critical diagnostic…
- 原文DOI / 链接:10.1371/journal.pone.0360673

5. UHPLC-Q-TOF-MS Identification of Intestinal Absorbable Components of Yindan Pinggan Capsule and Exploration of Its Anti-NAFLD Mechanism Based on NF-κB Signaling Regulation.

- 发表期刊 / 影响因子:Biomedical chromatography : BMC
- 发表时间:2026
- 第一/通讯作者:Jinli Hou, Jie Zhao, Jicheng Yang, Huaqing Lai, Mengyu Jia
- 核心结论:Yindan Pinggan capsule (YDPG) is a traditional Chinese formula for liver disorders, but its mechanism against nonalcoholic fatty liver disease (NAFLD) remains unclear. Here, UHPLC-Q-TOF-MS was used to characterize YDPG’ s chemical profile, and the YDPG intestinal absorption solution (YDPGIAS) obtaine…
- 原文DOI / 链接:10.1002/bmc.70650

6. Graph-Mediated Large Language Model Systems in the Agentic Era: Reasoning, Knowledge, Retrieval, Execution, and Coordination

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-04
- 第一/通讯作者:Haihui Liu, Yang Chen, Zice Qiu, Yun Zhang, Jialun Zhong
- 核心结论:Graphs play an increasingly important role in large language model (LLM) systems, supporting structural reasoning, knowledge grounding, retrieval, and memory. As these systems evolve toward the agentic era, graphs also organize execution dependencies and multi-agent communication, linking intermedia…
- 原文DOI / 链接:https://arxiv.org/abs/2611.05953v1

7. BAM: Bivariate Additive Models for Interpretable Tabular Prediction

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-04
- 第一/通讯作者:Atsushi Koike
- 核心结论:Generalized Additive Models with pairwise interactions (GA^{2}Ms) are regarded as glass-box models, since each pairwise shape function can be visualized as a contour plot. In practice, the shape functions learned by methods such as EBM or NODE-GAM are so complex (irregular contours and sharp local f…
- 原文DOI / 链接:https://arxiv.org/abs/2611.05940v1

8. Risk-Sensitive Non-Parametric and Kernel Bandits

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-11-04
- 第一/通讯作者:Devdan Dey, Sujoy Bhore, Avishek Ghosh
- 核心结论:We study non-parametric bandits in which arms are evaluated using Cumulative Prospect Theory (CPT) rather than expected reward. We consider continuous action spaces with arm-dependent noise and propose Non-Parametric CPT Bandits (NPCB), an optimistic algorithm that decouples mean estimati…
- 原文DOI / 链接:https://arxiv.org/abs/2611.06489v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Usability Testing to Improve the User Experience of an Electronic Patient-Reported Outcome System for Chimeric Antigen Receptor T-Cell Therapies.
