每日医学科研精读日报 | 2026年10月12日

一、今日前沿论文精选

1. Reference frame for Adult Brainstem gliomas.

- 发表期刊 / 影响因子:The oncologist
- 发表时间:2026-Oct-10
- 第一/通讯作者:Florence Laigle-Donadey, Emmanuel Mesny, Franck Bielle, Aurélie Kas, Lucia Nichelli
- 核心结论:Brainstem gliomas (BSG) are rare in adults (less than 2% of all gliomas) and generally have a better prognosis than pediatric BSG, although outcomes remain heterogeneous. Many other central nervous system (CNS) tumors, as well as nontumoral lesions, have been described as differential diagnoses and…
- 原文DOI / 链接:10.1093/oncolo/oyag403

2. Combined Active Bone Marrow-Sparing Radiotherapy and Prophylactic PEG-rhG-CSF to Reduce Severe Neutropenia During Platinum-Doublet Concurrent Chemoradiotherapy for Locally Advanced Cervical Cancer: A Phase II Trial.

- 发表期刊 / 影响因子:Cancer medicine
- 发表时间:2026
- 第一/通讯作者:ShanBing Wang, Jiapei Liu, Hui Zhong, Kaijian Lei, Chunxiu Wang
- 核心结论:Platinum-doublet concurrent chemoradiotherapy (CCRT) for locally advanced cervical cancer (LACC) is frequently complicated by severe neutropenia. This Phase II trial investigated whether combining active bone marrow-sparing (ABMS) radiotherapy with prophylactic pegylated recombinant human granulocyt…
- 原文DOI / 链接:10.1002/cam4.72366

3. PD-1 inhibitor-associated Sicca syndrome mimicking Sjögren’s disease successfully managed without immunotherapy withdrawal.

- 发表期刊 / 影响因子:ARP rheumatology
- 发表时间:2026
- 第一/通讯作者:Filipa Canhão André, João Teixeira, André Saraiva, João Luís Amaral, Joana Calvão
- 核心结论:Immune checkpoint inhibitors (ICIs) are increasingly associated with a broad spectrum of immune-related adverse events (irAEs), including rheumatic manifestations. We report a case of ICI-associated sicca syndrome (ICI-S) mimicking Sjögren’s disease, with a brief literature review. The patient was a…
- 原文DOI / 链接:参见原文

4. Effects of crowberry (Empetrum nigrum subsp. hermaphroditum) supplementation on inflammatory and metabolic adverse effects in high-fat diet-induced experimental obesity.

- 发表期刊 / 影响因子:Food & nutrition research
- 发表时间:2026
- 第一/通讯作者:Anni Alatalo, Mari Hämäläinen, Riitta Ryyti, Rainer Peltola, Katriina Vuolteenaho
- 核心结论:Obesity continues to be a major global health challenge, often accompanied by chronic low-grade inflammation and metabolic complications, including insulin resistance, impaired glucose metabolism, dyslipidemia and non-alcoholic fatty liver disease (NAFLD). Diets enriched with plant-derived polypheno…
- 原文DOI / 链接:10.29219/fnr.v70.14418

5. Hepatic HIF2α Modulates Extra-Hepatic Disease-Associated Phenotypes During Metabolic Dysfunction-Associated Steatotic Liver Disease.

- 发表期刊 / 影响因子:Comprehensive physiology
- 发表时间:2026
- 第一/通讯作者:Lorenz M W Holzner, Rosa M Korpershoek, Youguo Niu, Anna Cochrane, Paula M Darwin
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) afflicts more than one-third of adults globally, contributing significantly to an increased cardiovascular disease risk. Further, patients with severe liver disease experience muscle weakness and fatigue. Hypoxia-inducible factor 2α (H…
- 原文DOI / 链接:10.1002/cph4.70283

6. RESCUE: Is This Alarm Worth Acting On? Counterfactual Evaluation of VLA Runtime Monitors

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-09
- 第一/通讯作者:David Ahmedt-Aristizabal, Abdelwahed Khamis, Mohammad Ali Armin, Lars Petersson
- 核心结论:Runtime failure monitors for robot policies are typically evaluated by how accurately they distinguish failed from successful executions. Yet an accurate alarm may arrive too late for recovery, while an unnecessary intervention may disrupt an execution that would otherwise succeed. We introduce RESC…
- 原文DOI / 链接:https://arxiv.org/abs/2610.13516v1

7. Retrieval-Augmented Multimodal Language Model with Heterogeneous Evidence Integration for Clinical Prognosis

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-09
- 第一/通讯作者:Hamza Shafiq, Jialu Tang, Ting Dang, Jun Hu, Aaqib Saeed
- 核心结论:Clinical prognosis requires integrating structured measurements, physiological waveforms, longitudinal history, and population context. We introduce PRISM (Population-Retrieved Inference for Structured Multimodal Prognosis), a multimodal language model that combines per-feature numerical tokenizatio…
- 原文DOI / 链接:https://arxiv.org/abs/2610.13510v1

8. FedPCD: Priority-Constrained Federated Aggregation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-09

- 第一/通讯作者:Yousef Irshaid, Dara Varam, Mohamed I. AlHajri
- 核心结论:Federated learning (FL) seeks to optimize a shared global model from decentralized client data. While effective for average performance, this process can produce unfair performance across clients, particularly under statistically heterogeneous data distributions. Existing fairness-aware and multi-ob…
- 原文DOI / 链接:https://arxiv.org/abs/2610.13508v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Reference frame for Adult Brainstem gliomas.

日报自动生成于 2026年10月12日 | 数据来源:PubMed、arXiv | 下一期:明日7:00
