

一、今日前沿论文精选

1. Patient-Level Evaluation of Optimal Margin Width for Lumpectomy in Ductal Carcinoma In Situ: An Analysis of Patients in the National Cancer Database Special Study.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Sep-21
- 第一/通讯作者:Amanda L Nash, Yan Li, Samantha M Thomas, Akiko Chiba, Astrid Botty van den Bruele
- 核心结论:Re-excision for close margins in patients undergoing breast-conserving surgery (BCS) for ductal carcinoma in situ (DCIS) aims to reduce recurrence rates. The current recommended margin width of ≥ 2 mm is based on study-level data. Using a multicenter cohort, we aimed to determine whether patient-level...
- 原文DOI / 链接:10.1200/JCO-25-02476

2. Subtype-Agnostic Biomarkers of Immunotherapy Response in Lung Cancer.

- 发表期刊 / 影响因子:Cancer immunology research
- 发表时间:2026-Sep-21
- 第一/通讯作者:Elisa Gobbi, Subhamoy Chakraborty, Ioannis Vathiotis, Roberto Borea, Konstantinos N Syrigos
- 核心结论:Immunotherapy has transformed the lung cancer treatment landscape, establishing a role in nearly all histologic subtypes, including non-small cell and small cell lung cancers. However, only a few biomarkers, including PD-L1 tumor proportion score, tumor mutational burden, and microsatellite instabil...
- 原文DOI / 链接:10.1158/2326-6066.CIR-26-0295

3. PAK4-targeting PROTAC inhibits bladder cancer cell proliferation.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Shan Xu, Hongjun Xie, Zhao Yang, Zhenkun Ma, Xiaojing Bai
- 核心结论:p21-Activated kinase 4 (PAK4) is widely dysregulated and acts as an oncogene in multiple cancers, and the inhibition or knockout of PAK4 has shown excellent therapeutic effects in inhibiting tumor progression in combination with immunotherapy across a variety of cancers. Previously, we reported our...
- 原文DOI / 链接:10.1371/journal.pone.0358561

4. Associations Between Urinary Metabolic Indicators and Metabolic Dysfunction-Associated Steatotic Liver Disease and Liver Fibrosis: Evidence from National Health and Nutrition Examination Survey 2017-2020.

- 发表期刊 / 影响因子:The Turkish journal of gastroenterology : the official journal of Turkish Society of Gastroenterology
- 发表时间:2026-Sep-08
- 第一/通讯作者:Jiacheng Cai, Hong Wang, Leilei Wang, Lei Zhang
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) reflects the central role of systemic metabolic disturbances in the pathogenesis of fatty liver. Urinary metabolic indicators may capture integrated renal, inflammatory, and metabolic alterations associated with MASLD and liver fibrosi...
- 原文DOI / 链接:10.5152/tjg.2026.26228

5. GLP-1-based treatments and long-term clinical outcomes in MASLD amongst older adults: a retrospective cohort study.

- 发表期刊 / 影响因子:Age and ageing
- 发表时间:2026-Sep-04
- 第一/通讯作者:Tilemachos Koutouratsas, Markos Kalligeros, Mark Michael, Siddharth Das, Sophia C Mylonakis
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is the leading cause of chronic liver disease in older adults, driving hepatic decompensation and cardiovascular mortality. Randomised trial data on glucagon-like peptide-1 (GLP-1) receptor agonist (GLP-1 RA) therapy remain limited. We...
- 原文DOI / 链接:10.1093/ageing/afag281

6. Blind Thermodynamic Ontology Discovery from Anonymous Experiments

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-20
- 第一/通讯作者:Linzhe Zhang, Changming Xu
- 核心结论:Before a machine learning model can learn a thermodynamic equation of state, it must discover what its measurements represent: which channels scale with system size, which are intensive conjugates, how sectors pair through contact, and which potential governs stability. When sensors expose only an u...
- 原文DOI / 链接:https://arxiv.org/abs/2609.23387v1

7. Bayesian Filtering in Physical Systems via Test-time Trained Flow Matching

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-20
- 第一/通讯作者:Ruiqi Feng, Chongyi Wang, Tao Zhang, Tailin Wu
- 核心结论:Bayesian filtering provides a principled framework for online state estimation under uncertainty, yet its application to systems with high-dimensional states and complicated posterior distributions remains challenging. Recent generative models, such as flow matching, have shown potential in Bayesian...
- 原文DOI / 链接:https://arxiv.org/abs/2609.23383v1

8. Blind Thermodynamic Ontology Discovery from Anonymous Experiments

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-20

- 第一/通讯作者:Linzhe Zhang, Changming Xu
- 核心结论:Before a machine learning model can learn a thermodynamic equation of state, it must discover what its measurements represent: which channels scale with system size, which are intensive conjugates, how sectors pair through contact, and which potential governs stability. When sensors expose only an u...
- 原文DOI / 链接:<https://arxiv.org/abs/2609.23387v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Patient-Level Evaluation of Optimal Margin Width for Lumpectomy in Ductal Carcinoma In Situ: An Analysis of Patients in the National Cancer Database Special Study.
