

一、今日前沿论文精选

1. Erratum for the Research Article “Intratumoral delivery of CCL25 enhances immunotherapy against triple-negative breast cancer by recruiting CCR9+ T cells” by H. Chen et al.

- 发表期刊 / 影响因子:Science advances
- 发表时间:2026-Sep-18
- 第一/通讯作者:(作者信息缺失)
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1126/sciadv.ael7019

2. Rejuvenating endogenous antitumor immunity via a chimeric receptor-engineered oncolytic virus targeting tumor-associated macrophages.

- 发表期刊 / 影响因子:Science advances
- 发表时间:2026-Sep-18
- 第一/通讯作者:Chaolong Lin, Shaopeng Li, Rui Lou, Wenzhong Teng, Yang Tian
- 核心结论:Immunosuppressive tumor-associated macrophages (TAMs) create a barrier to effective antitumor immunity and promote therapeutic resistance. Reeducating TAMs to enhance their antitumor capabilities through phenotypic remodeling remains challenging. Here, we report a modular oncolytic herpesvirus platf...
- 原文DOI / 链接:10.1126/sciadv.aef6767

3. Cobalt-mediated suppression of IFN-γ-JAK-STAT1 signaling reprograms IDO1-driven immunosuppression for metalloimmunotherapy.

- 发表期刊 / 影响因子:Science advances
- 发表时间:2026-Sep-18
- 第一/通讯作者:Tianyi Jiang, Xiaowan Huang, Zhixin Wu, Gulinaizaier Abudusaimaiti, Yang Song
- 核心结论:Metal ions are increasingly recognized as regulators of immune function, yet their application in cancer immunotherapy remains underexplored. Here, we identified cobalt ions (Co2+) as potent suppressors of IFN-γ-induced IDO1 expression through systematic screening of biologically relevant metal ions...
- 原文DOI / 链接:10.1126/sciadv.aeg6398

4. THBS1+ macrophages fuel pathogenic inflammation in alcohol-associated liver disease.

- 发表期刊 / 影响因子:Hepatology communications
- 发表时间:2026-Oct-01
- 第一/通讯作者:Wentao Xu, Shanshan Wu, Jia Gao, Chen Cheng, Conghan Li
- 核心结论:Alcohol-associated liver disease (ALD) is one of the most common chronic liver diseases worldwide, with a pathological spectrum ranging from simple steatosis to steatohepatitis and, ultimately, cirrhosis. Severe alcohol-associated hepatitis (SAH) arises acutely within this continuum as a rapidly dev...
- 原文DOI / 链接:10.1097/HC9.0000000000001046

5. Systems biology framework for the rational design of operational conditions for in vitro/in vivo translation of tissue models.

- 发表期刊 / 影响因子:Science advances
- 发表时间:2026-Sep-18
- 第一/通讯作者:Jose L Cadavid, Nikolaos Meimetis, Tyler Matsuzaki, Erin N Tevonian, Linda G Griffith
- 核心结论:Preclinical models are used extensively to study diseases and therapies. In vitro monoculture or microphysiological system (MPS) platforms incorporating multiple different human cell types can emulate diseased tissues, but determining experimental conditions (e.g., media supplements) that provide th...
- 原文DOI / 链接:10.1126/sciadv.aef7756

6. Coding Agents with an Obstacle-Aware Harness for Safe Robot Manipulation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-17
- 第一/通讯作者:Bingxin Xu, Yuzhang Shang, Zhen Dong, Emilio Ferrara
- 核心结论:Coding agents have emerged as a promising paradigm for robot manipulation: a language model writes the robot controller as a program, and agents built in this way now operate robots without robot-specific training.Whether this paradigm is also safe, however, has not been asked. We evaluate coding ag...
- 原文DOI / 链接:https://arxiv.org/abs/2609.20822v1

7. Workspace Models: Lightweight Robotic Memory via Saliency-Driven Supervision

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-17
- 第一/通讯作者:Nitish Dashora, Douglas Chen, Idan Shenfeld, John Marangola, Pulkit Agrawal
- 核心结论:Complex robotic manipulation tasks frequently require a long-term memory of past events and actions. As conditioning on full histories renders policies prone to spurious correlations and degrades performance, many approaches to policy memory involve compressing historical information through expensi...
- 原文DOI / 链接:https://arxiv.org/abs/2609.20820v1

8. Embedding Models Measure in Peculiar Ways

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-17
- 第一/通讯作者:Juri Opitz, Andrianos Michail

- 核心结论:Embedding spaces define notions of semantic similarity and distance. We study whether those embeddings reflect physical measurements of mass, distance, time and volume, which admit a unique, objective notion of semantic equivalence and distance. We find that physical measurement is only weakly model...
- 原文DOI / 链接:<https://arxiv.org/abs/2609.20821v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Erratum for the Research Article “Intratumoral delivery of CCL25 enhances immunotherapy against triple-negative breast cancer by recruiting CCR9+ T cells” by H. Chen et al.
