

一、今日前沿论文精选

1. Interpreting vaccine-associated survival differences in immune checkpoint inhibitor therapy.

- 发表期刊 / 影响因子:Proceedings of the National Academy of Sciences of the United States of America
- 发表时间:2026-Sep-08
- 第一/通讯作者:René Karadacic, Nancy L Keating, Michael L Barnett
- 核心结论:Recent studies proposed that SARS-CoV-2 mRNA vaccination may sensitize tumors to immune checkpoint inhibitor (ICI) therapy through immune modulation. Using 100% national Medicare fee-for-service claims data, we evaluated whether survival differences among vaccinated patients receiving ICIs were spec...
- 原文DOI / 链接:10.1073/pnas.2621501123

2. Safety of neoadjuvant radiotherapy or chemoradiotherapy combined with immunotherapy across solid tumors: Systematic review and meta-analysis protocol.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Irtaza Tahir, Susheen Mahmood, Minoo Aminnejad, Elena Parvez
- 核心结论:The aim of this systematic review and meta-analysis is to evaluate whether neoadjuvant radiotherapy or chemoradiotherapy, combined with immune checkpoint inhibitors for adults with resectable solid tumors, increases the risk of severe treatment-related toxicity and organ-specific adverse events comp...
- 原文DOI / 链接:10.1371/journal.pone.0357205

3. CD266+ myofibroblasts mediate resistance to immunochemotherapy through ECM stiffness in head and neck squamous cell carcinoma.

- 发表期刊 / 影响因子:Cancer immunology research
- 发表时间:2026-Aug-31
- 第一/通讯作者:Houyu Ju, Yusheng Lu, Chaoji Shi, Zhiwei Zheng, Yun Bi
- 核心结论:The efficacy of immunotherapy in unresectable/recurrent/metastatic head and neck squamous cell carcinoma (U/R/M HNSCC) remains suboptimal compared to primary untreated resectable HNSCC. The immunological and stromal landscape during immunotherapy in U/R/M HNSCC is crucial for understanding drug resi...
- 原文DOI / 链接:10.1158/2326-6066.CIR-25-1379

4. Polycystic Ovary Syndrome and Cardiovascular Risk: Mechanisms, Clinical Evidence, and Prevention Strategies.

- 发表期刊 / 影响因子:Cardiology in review
- 发表时间:2026-Aug-31
- 第一/通讯作者:Madeline Moore, Rahim Hirani, Samy Khessib, Amala P Chirumamilla, William H Frishman
- 核心结论:Polycystic ovary syndrome (PCOS) affects an estimated 11-13% of reproductive-age women worldwide and is increasingly recognized as a condition with significant cardiometabolic abnormalities, beyond its reproductive manifestations. This focused narrative review synthesizes contemporary evidence on th...
- 原文DOI / 链接:10.1097/CRD.0000000000001453

5. Upcoming therapies for steatotic liver disease: Translating breakthroughs into clinical practice.

- 发表期刊 / 影响因子:Journal of internal medicine
- 发表时间:2026-Aug-31
- 第一/通讯作者:Philip N Newsome, Saima Ajaz
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is the most common chronic liver disease worldwide and a leading cause of cirrhosis, hepatocellular carcinoma, and cardiometabolic morbidity. Often clinically silent until advanced fibrosis develops, management has largely relied on li...
- 原文DOI / 链接:10.1111/joim.70143

6. Detect Before You Attribute: Cascade Failure Attribution for Multi-Agent Systems

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-30
- 第一/通讯作者:Jiayi Zhang, Zexin Wang, Degang Sun, Changhua Pei, Fei Sun
- 核心结论:Large language model (LLM)-based agents have shown strong potential in solving complex tasks through multi-step reasoning, yet they remain vulnerable to execution failures. Accurate failure attribution is therefore critical for improving agent reliability. Existing topology- and spectrum-based metho...
- 原文DOI / 链接:https://arxiv.org/abs/2608.29646v1

7. Conducting Stylistic Analysis of Paintings through an Art-History Agent

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-30
- 第一/通讯作者:Marc S. Walton, Astrid Harth
- 核心结论:Attributing an artwork to an artist has traditionally relied on detailed visual observations and descriptions, known as stylistic analysis in art history. By contrast, current artificial intelligence (AI) models used in the field offer only unexplained probabilistic classifications. To bridge this m...
- 原文DOI / 链接:https://arxiv.org/abs/2608.29644v1

8. Reward-guided Fine-Tuning of One-Step Generative Models via Wasserstein Gradient Flow

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-08-30
- 第一/通讯作者:Hoseong Hwang, Woorim Han, Joungin Chun, Jinseong Park, Jaewoong Choi
- 核心结论:To mitigate the time complexity of generative models, one-step generative models have recently emerged through direct mapping from noise to data in a single forward pass. However, the reward-guided fine-tuning method of one-step generative models remains largely unexplored. To address this, we consi...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.29647v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Interpreting vaccine-associated survival differences in immune checkpoint inhibitor therapy.
