每日医学科研精读日报 | 2026年11月14日

一、今日前沿论文精选

1. Molecular Profiling for Precision Medicine in Adrenocortical Carcinoma: Real-World Data From the French Network ENDOCAN-COMETE.

- 发表期刊 / 影响因子:JCO precision oncology
- 发表时间:2026
- 第一/通讯作者:Simon Lemaire, Grégoire Marret, Sophie Moog, Arnaud Jannin, Magalie Haissaguerre
- 核心结论:Adrenocortical carcinoma (ACC) is a rare tumor with poor prognosis. Precision medicine and molecularly matched treatment (MMT) represent a new opportunity in oncology. We conducted a retrospective study of patients with advanced ACC within the French ENDOCAN COMETE network from 2009 to 2022 who have…
- 原文DOI / 链接:10.1200/PO-25-00839

2. Identifying Predictive Biomarkers of Resistance in Patients With Breast Cancer.

- 发表期刊 / 影响因子:JCO precision oncology
- 发表时间:2026
- 第一/通讯作者:Amrita Basu, Anthony Sun, Denise Wolf, Ritu Roy, Saumya Umashankar
- 核心结论:Residual cancer burden (RCB) after neoadjuvant chemotherapy is highly prognostic of disease-free survival in patients with high-risk early-stage breast cancer, and extensive residual disease (RCBIII) indicates treatment resistance. Identifying intrinsic pretreatment resistance may enable earlier red…
- 原文DOI / 链接:10.1200/PO-26-00242

3. Early Treatment Failure in Patients With Relapsed/Refractory Multiple Myeloma Receiving Bispecific T-Cell Engagers: Development and Validation of the CHARGE Prognostic Index.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Nov-13
- 第一/通讯作者:Saurabh Zanwar, Doris K Hansen, Oren Pasvolsky, Carlyn Tan, Lauren C Peres
- 核心结论:Outcomes with bispecific T-cell engagers (TCEs) in relapsed/refractory multiple myeloma (RRMM) are heterogeneous. A practical tool to guide prognosis is needed. We developed a model integrating clinical, biological, and treatment-related variables to predict progression-free survival (PFS) in patien…
- 原文DOI / 链接:10.1200/JCO-26-01039

4. Association between systemic immune-inflammation index and skeletal muscle mass in patients with nonalcoholic fatty liver disease: A cross-sectional study.

- 发表期刊 / 影响因子:Medicine
- 发表时间:2026-Nov-13
- 第一/通讯作者:Qingqiang Peng, Weihua Yang, Zhiming Lu, Xunyuan Wu, Xiaoxin Zhang
- 核心结论:Nonalcoholic fatty liver disease (NAFLD) is characterized by excessive liver fat accumulation, which is associated with inflammatory responses and metabolic disruptions that may affect skeletal muscle mass. However, the specific relationship between the systemic immune-inflammation index (SII) and s…
- 原文DOI / 链接:10.1097/MD.0000000000051462

5. Tubastatin A Mitigates Lipotoxicity, Inflammation and Fibrosis Through Downregulation of HDAC6 and Modulation of AMPK-FGF21 Axis in Metabolic Dysfunction-Associated Steatohepatitis.

- 发表期刊 / 影响因子:Inflammation
- 发表时间:2026-Aug-11
- 第一/通讯作者:Sonu Rajput, Sumeet Kumar Singh, Yogender Goswami, Umashanker Navik
- 核心结论:Metabolic dysfunction- associated steatohepatitis (MASH) represents the progressive form of metabolic dysfunction- associated steatotic liver disease (MASLD). Tubastatin A (TA), a selective HDAC6 inhibitor, possesses anti-inflammatory and epigenetic modulatory properties, but its therapeutic potenti…
- 原文DOI / 链接:10.1007/s10753-026-02582-8

6. AgentSSL: Can MLE Agents Leverage Unlabeled Data?

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-12
- 第一/通讯作者:Ethan Lin, Akanksha Sarkar, Ziang Liu, Kristin Branson, Jennifer J. Sun
- 核心结论:Applying machine learning systems to new domains introduces bottlenecks in both labeled data acquisition and manual pipeline engineering. While recent MLE agents show promise in automating pipeline design, they have been studied almost exclusively in fully supervised settings, leaving them untested…
- 原文DOI / 链接:https://arxiv.org/abs/2611.17323v1

7. CoReMem: Cost-Internalizing Memory for Successive Coding Tasks with Prospective Valuation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-12
- 第一/通讯作者:Peiwen Li, Harshit Verma, Sophia Zhou, Haiwen Wang, Ngoc Bui
- 核心结论:Coding agents tackle successive tasks on an evolving repository, carrying forward edits and writing memory before the next task is known. Selecting memory for unknown next tasks requires balancing future usefulness against the costs of writing and reading it. The actor must also decide when acting o…
- 原文DOI / 链接:https://arxiv.org/abs/2611.17316v1

8. Unbundling Multimodal Vision Encoding

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-12
- 第一/通讯作者:Ellis Brown, Chris Hoang, Shengyi Qian, Shang-Wen Li, Mike Lewis
- 核心结论:How multimodal language models should encode visual input remains up for debate. Most models use a pretrained vision encoder, while some recent recipes train the encoder from scratch with the language model or remove it entirely. Vision encoders bundle together three design choices: a visual prior f…
- 原文DOI / 链接:https://arxiv.org/abs/2611.17334v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Molecular Profiling for Precision Medicine in Adrenocortical Carcinoma: Real-World Data From the French Network ENDOCAN-COMETE.
