

一、今日前沿论文精选

1. Radium-223 decreases PD-L1 expression in bone metastases: A study with [89Zr]Zr-atezolizumab PET and immunohistological correlation.

- 发表期刊 / 影响因子:European journal of nuclear medicine and molecular imaging
- 发表时间:2026-Sep-12
- 第一/通讯作者:Sui Wai Ling, Anouk de Jong, Mark Gorris, Marcel Segbers, Laura Graven
- 核心结论:Most patients with metastatic castration-resistant prostate cancer (mCRPC) do not benefit from treatment with immune checkpoint inhibitors targeting programmed cell death (ligand) 1 (PD-(L)1). Radiation might improve response to immunotherapy by increasing the immunogenicity of prostate cancer. The...
- 原文DOI / 链接:10.1007/s00259-026-08175-9

2. Advances in Implant-Based Breast Reconstruction in the Setting of Post-Mastectomy Radiotherapy.

- 发表期刊 / 影响因子:Aesthetic plastic surgery
- 发表时间:2026-Sep-11
- 第一/通讯作者:Qingyu Wang, Bingyue Li, Siyu Chen, Jun Wang
- 核心结论:Breast reconstruction and post-mastectomy radiation therapy (PMRT) have become integral components of comprehensive breast cancer management. The coordination of radiation therapy and reconstruction must balance long-term oncologic safety with optimal aesthetic outcomes. This narrative review aims t...
- 原文DOI / 链接:10.1007/s00266-026-06219-x

3. Hypoxia-Induced Expression of miR-424, miR-155, CD47, and PD-L1 in a Gastric Cancer Cell Line (MKN-45).

- 发表期刊 / 影响因子:Iranian biomedical journal
- 发表时间:2026-Jun-21
- 第一/通讯作者:Sahar Samemaleki, Niloufar Orooji, Tohid Kazemi, Ghasem Solgi
- 核心结论:Hypoxia (pO2 < 5-10 mmHg) is a critical feature of the tumor environment that causes genetic and epigenetic changes. This study aimed to evaluate the effect of hypoxia on the expression of immune checkpoint genes (CD39, CD47, and PD-L1) and their regulatory microRNAs (miRNAs; miR-155, miR-424, miR-1...
- 原文DOI / 链接:10.22034/IBJ.30.4.234

4. GPR75: A Dual-Ligand Receptor for 20-HETE and CCL5 with Emerging Roles in Central and Peripheral Regulation of Metabolic Diseases.

- 发表期刊 / 影响因子:Pharmacological research
- 发表时间:2026-Sep-11
- 第一/通讯作者:Yu-Ning Hou, Shu-Jing Liu, Liang-Ming Li
- 核心结论:G protein-coupled receptor 75 (GPR75) has recently attracted considerable attention as a novel regulator of metabolic, immune, and vascular processes. Current evidence suggests that two structurally distinct molecules have been proposed as candidate endogenous ligands for GPR75: 20-hydroxyeicosatetr...
- 原文DOI / 链接:10.1016/j.phrs.2026.108452

5. Body mass index modifies the association between occupational noise exposure duration and ultrasound-detected hepatic steatosis: A cross-sectional study among male factory workers.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Dandan Liu, Huixia Ji, Ye Chen, Tongzhou Zhou
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is a multisystem metabolic disorder. The impact of occupational noise exposure on metabolic processes through non-auditory pathways is also closely associated with hepatic steatosis in addition to obesity. Most studies examine noise ex...
- 原文DOI / 链接:10.1371/journal.pone.0358275

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选5篇最新研究+1篇经典精读。关注方向:Radium-223 decreases PD-L1 expression in bone metastases: A study with [89Zr]Zr-atezolizumab PET and

immunohistological correlation.
