

一、今日前沿论文精选

1. Multidisciplinary mHealth Rehabilitation for Patients With Abdominal Cancer Who Are Receiving Chemoradiotherapy: Randomized Phase II Trial.

- 发表期刊 / 影响因子:Journal of medical Internet research
- 发表时间:2026-Sep-08
- 第一/通讯作者:Lei Yang, Wenbo Wang, Jing Su, Yudi Xiong, Han Wu
- 核心结论:Concurrent chemoradiotherapy (CCRT) for abdominal cancer frequently induces muscle loss, weight loss, and malnutrition. This exploratory randomized phase II trial evaluated whether a multidisciplinary, mobile health (mHealth)-based multimodal rehabilitation program could preserve handgrip strength a...
- 原文DOI / 链接:10.2196/98330

2. Association of regional lymph node resection with survival in patients with locally advanced-stage cervical cancer: A retrospective SEER-based cohort study.

- 发表期刊 / 影响因子:Science progress
- 发表时间:2026
- 第一/通讯作者:Aiyuan Wu, Remila Rezhake, Ziyin Huang, Guzhalinuer Abulizi, Li Li
- 核心结论:ObjectiveThis study aimed to validate the prognostic discriminatory power of the revised International Federation of Gynecology and Obstetrics (FIGO) 2018 staging system and to evaluate the association between regional lymph node resection (RLNR) and survival in cervical cancer (CC) patients who und...
- 原文DOI / 链接:10.1177/00368504261481941

3. In vivo genome-wide CRISPR screens identify FOXR1 as a suppressor of CD8+ T cell antitumor immunity.

- 发表期刊 / 影响因子:Proceedings of the National Academy of Sciences of the United States of America
- 发表时间:2026-Sep-15
- 第一/通讯作者:Xue Yang, Han Ouyang, Henan Xu, Lingxiao Peng, Jianzhou Cui
- 核心结论:T cell dysfunction critically limits the efficacy of T cell-based immunotherapies in solid tumors, yet the intrinsic regulators of T cell dysfunction remain incompletely understood. Through an in vivo genome-wide CRISPR screen in tumor-infiltrating CD8+ T cells, we identified Forkhead Box R1 (FOXR1)...
- 原文DOI / 链接:10.1073/pnas.2534362123

4. Evaluation of a Registered Nurse-Led Outpatient Paracentesis Service for Decompensated Cirrhosis: A Retrospective Review.

- 发表期刊 / 影响因子:Journal of evaluation in clinical practice
- 发表时间:2026
- 第一/通讯作者:Molly McDonald, Carmen Fang, Christine Song, Colina Yim, Pam Hubley
- 核心结论:Ascites is a common and debilitating complication of decompensated cirrhosis that frequently requires therapeutic paracentesis (TP) for symptom relief. Limited outpatient procedural capacity may contribute to avoidable hospital readmissions. The use of registered nurses (RNs) to perform TP remains u...
- 原文DOI / 链接:10.1111/jep.70578

5. Liver-Kidney-Heart Axis in MASLD: Molecular and Cellular Pathways of Renal Injury Associated with Metabolic Hepatic Steatosis. A Narrative Review.

- 发表期刊 / 影响因子:Cardiorenal medicine
- 发表时间:2026-Sep-08
- 第一/通讯作者:Jorge Rico Fontalvo, Rodrigo Daza Arnedo, Gregorio Romero-González, Avinash Chandu Nanwani, Alyi A Arellano-Cabeza
- 核心结论:Steatotic liver disease associated with metabolic dysfunction (MASLD) has become the most common chronic liver disease worldwide. The impact of this condition is not limited to liver dysfunction; its relationship with chronic kidney disease (CKD) is significant, as it shares pathophysiological mecha...
- 原文DOI / 链接:10.1159/crm/abtag007

6. Diffusion TV: Experiencing Diffusion Models through Tangible, Embodied Interaction

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-04
- 第一/通讯作者:Sihwa Park
- 核心结论:Diffusion TV is an interactive AI art installation that offers a tangible and embodied experience of diffusion models through a modified CRT TV. By physically manipulating the TV's antenna, audiences control the clarity of AI-generated images and sounds, metaphorically enacting the denoising process...
- 原文DOI / 链接:https://arxiv.org/abs/2609.05404v1

7. RegionFed: Federated Learning for Personalized Query Understanding in Heterogeneous Retail Environments

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-04
- 第一/通讯作者:Quoc H. Nguyen, Ali Lafzi, Abhijeet Phatak, Siddharth Pratap Singh, Rohit Upadhyay
- 核心结论:Retail search systems serve diverse geographic regions with distinct query patterns, vocabularies, and product preferences, creating significant data heterogeneity that challenges both privacy-preserving training and model personalization. Federated learning offers a natural solution for privacy, bu...
- 原文DOI / 链接:https://arxiv.org/abs/2609.05403v1

8. UniMate: One Unified Model to Animate Diverse Skeletons

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-04

- 第一/通讯作者:Linzhao Mou, Jiahui Lei, Zhiyang Dou, Chenyue Cai, Chaoyue Song
- 核心结论:Recent advances in automatic rigging now deliver animation-ready 3D assets at scale, yet generating the motion to drive them remains a bottleneck. Existing learned animators are topology-constrained: they rely on category-specific templates or require per-skeleton fine-tuning and reference motions a...
- 原文DOI / 链接:https://arxiv.org/abs/2609.05415v1

## 二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

## 三、每日高分经典精读

### Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

## 四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Multidisciplinary mHealth Rehabilitation for Patients With Abdominal Cancer Who Are Receiving Chemoradiotherapy: Randomized Phase II Trial.
