每日医学科研精读日报 | 2026年10月21日

一、今日前沿论文精选

1. Engineering Subcutaneous Ectopic Tertiary Lymphoid Structures as Personalized Immune-Activation Niches for Cancer Immunotherapy.

- 发表期刊 / 影响因子:ACS applied bio materials
- 发表时间:2026-Oct-20
- 第一/通讯作者:Jing-Yun Su, Tian-Yang Wang, Shao-Hua Zhuo, Geng-Hui Feng, Yan-Mei Li
- 核心结论:Tumor-associated tertiary lymphoid structures (TLSs) can promote anti-tumor immune responses and survival. However, intratumor TLS formation and maturation are limited in tumors with a “cold” immune phenotype, including reduced infiltration of immune cells and a suppressive tumor microenvironment (T…
- 原文DOI / 链接:10.1021/acsabm.6c01731

2. L’émergence de la télécuriéthérapie comme stratégie d’innovation à la Fondation Curie dans les années 20-30.

- 发表期刊 / 影响因子:Canadian journal of health history = Revue canadienne d’histoire de la sante
- 发表时间:2026
- 第一/通讯作者:Camilla Maiani
- 核心结论:At the Fondation Curie, during the 1920s and 1930s, a new cancer treatment technique emerged: telecurietherapy. At the crossroads between research and treatment, it is considered emblematic of the organization of the fight against cancer conceived by Claudius Regaud, director of the Fondation Curie…
- 原文DOI / 链接:10.3138/cjhh.748-042025

3. Prognostic analysis of remarkable response after radiotherapy or chemoradiotherapy in esophageal cancer.

- 发表期刊 / 影响因子:Diseases of the esophagus : official journal of the International Society for Diseases of the Esophagus
- 发表时间:2026-Sep-02
- 第一/通讯作者:Koji Nishiue, Yoshito Hayashi, Hiroki Sugioka, Shinji Yoneda, Yujiro Adachi
- 核心结论:Standardized criteria for endoscopic assessment of the treatment response of esophageal squamous cell carcinoma (ESCC) are limited. The Japan Esophageal Society recently proposed the remarkable response, which is defined as marked tumor reduction with residual disease but an invasion depth equivalen…
- 原文DOI / 链接:10.1093/dote/doag119

4. Correction to “Meta-Analysis: Enhanced Liver Fibrosis (ELF) Test for Identifying Significant Fibrosis, Advanced Fibrosis, and Cirrhosis in Patients with Metabolic Dysfunction-Associated Steatotic Liver Disease”.

- 发表期刊 / 影响因子:Alimentary pharmacology & therapeutics
- 发表时间:2026-Oct-20
- 第一/通讯作者:(作者信息缺失)
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1111/apt.71051

5. Disrupting the PNPLA3-ABHD5 Interaction Stimulates Lipolysis and Improves PNPLA3-I148M-Associated Hepatic Steatosis.

- 发表期刊 / 影响因子:Diabetes
- 发表时间:2026-Oct-20
- 第一/通讯作者:Simon Steinbring Hoffman, Emily Tso Newman, Daniel Lin, Michelle Chen, Song Yang
- 核心结论:We evaluate the importance of the protein-protein interaction (PPI) between PNPLA3-I148M and its cofactor α/β-hydrolase domain-containing protein 5 (ABHD5) in PNPLA3-I148M-mediated hepatic steatosis. We demonstrate that disrupting the PNPLA3-ABHD5 PPI improves I148M-associated steatosis and markers…
- 原文DOI / 链接:10.2337/db26-0108

6. OpenVLHarness: Real World Visual Agentic Tool-Use with Multimodal Memory

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-19
- 第一/通讯作者:Yu Zhou, Cheng-Fu Yang, Rui Sun, Di Wu, Sibo Peng
- 核心结论:Multimodal large language models (MLLMs) have made rapid progress on visual reasoning, yet many tasks require evidence that is difficult to obtain through internal reasoning alone: our controlled study on 22 benchmarks shows that simply increasing the inference budget of the base model yields only m…
- 原文DOI / 链接:https://arxiv.org/abs/2610.26860v1

7. Reinforcement Learning with Visually Attributable On-Policy Self-Distillation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-19
- 第一/通讯作者:Shiao Xie, Siyu Chen, Jianwei Lv, Xiandong Li, Yujin Wang
- 核心结论:Multimodal reinforcement learning with verifiable rewards (RLVR) provides reliable task-level supervision, yet offers limited guidance for localizing errors in visual reasoning. On-policy self-distillation (OPSD) complements this supervision with dense token-level corrections from a privileged teach…
- 原文DOI / 链接:https://arxiv.org/abs/2610.26856v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选7篇最新研究+1篇经典精读。关注方向:Engineering Subcutaneous Ectopic Tertiary Lymphoid Structures as Personalized Immune-Activation Niches for Cancer Immunotherapy.
