

一、今日前沿论文精选

1. Immunotherapy in Colorectal Cancer: Novel Perspectives and Next Steps.

- 发表期刊 / 影响因子:American journal of clinical oncology
- 发表时间:2026-Aug-13
- 第一/通讯作者:Thaís Sampaio Corrêa de Almeida, Maria Ignez de Melro Freitas Braghiroli, Jorge Sabbaga, Paulo Marcelo Gehm Hoff
- 核心结论:Colorectal cancer (CRC) is the third most common malignant neoplasm worldwide and the second leading cause of cancer-related mortality. Currently, only about 15% of newly diagnosed CRC cases and 5% of metastatic cases are classified as being microsatellite instability-high (MSI-H) and can benefit si...
- 原文DOI / 链接:10.1097/COC.0000000000001362

2. High precision segmentation of glioma and surroundings - a feasibility study using multiparametric MRI and deep learning.

- 发表期刊 / 影响因子:Journal of medical engineering & technology
- 发表时间:2026-Aug-14
- 第一/通讯作者:Arvid Lundervold, Saruar Alam, Marianne H Hannisdal, Dorota Goplen, Martha Chekenya
- 核心结论:Glioblastoma (GBM) is an aggressive primary brain cancer in which precise spatial characterisation of tumour sub-compartments and surrounding anatomy may support research into targeted treatment. We designed and assessed a feasibility pipeline for subject-specific localisation of glioma and brain re...
- 原文DOI / 链接:10.1080/03091902.2026.2713703

3. Fusion of IgG antibodies to albumin inhibits transport across the placenta.

- 发表期刊 / 影响因子:Science immunology
- 发表时间:2026-Aug-14
- 第一/通讯作者:Jeannette Nilsen, Kine M K Sand, Hana J Al-Khabbaz, Lennart Maximilian van Ligtenberg, Simone Mester
- 核心结论:Immunoglobulin G (IgG)-based monoclonal antibodies are effective therapies for cancer, autoimmune diseases, and migraine. However, they are actively transported across the placenta by the neonatal Fc receptor (FcRn), limiting their use during pregnancy. Using mouse models and an ex vivo human placen...
- 原文DOI / 链接:10.1126/sciimmunol.aee5151

4. Shear wave elastography demonstrates similar risk stratification performance to vibration-controlled transient elastography in FIB-4-based two-step algorithms for MASLD.

- 发表期刊 / 影响因子:Hepatology (Baltimore, Md.)
- 发表时间:2026-Aug-14
- 第一/通讯作者:Jaejun Lee, Hyun Yang, Si Hyun Bae, Sun Hong Yoo, Soon Woo Nam
- 核心结论:The role of shear wave elastography (SWE) in two-step MASLD risk stratification remains unclear. We compared SWE with vibration-controlled transient elastography (VCTE) using American Gastroenterological Association (AGA) and European Association for the Study of the Liver (EASL) algorithms. Patient...
- 原文DOI / 链接:10.1097/HEP.0000000000001841

5. The LKB1-AMPK pathway in NAFLD: molecular mechanisms and therapeutic implications.

- 发表期刊 / 影响因子:Journal of physiology and biochemistry
- 发表时间:2026-Aug-14
- 第一/通讯作者:Pouya Goleij, Mohammad Amin Khazeei Tabari, Yousef Naser, Rayan Alataa, Mohammed Ali Mohammed Osman
- 核心结论:The LKB1-AMPK signaling pathway is a central regulator of hepatic energy homeostasis and is increasingly implicated in the pathogenesis of non-alcoholic fatty liver disease (NAFLD). LKB1-mediated AMPK activation promotes fatty acid β -oxidation, autophagy, and mitochondrial biogenesis. At the same ti...
- 原文DOI / 链接:10.1007/s13105-026-01215-w

6. AutoDesign: Meta-Harness Optimization for Long-Horizon Agentic Design

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Yaxin Luo, Haobin Jiang, Jialv Zou, Xu Huang, Wenhao Yan
- 核心结论:Transforming multimodal sources into condensed and structured media outputs can be fundamentally conceptualized as a long-horizon agentic process centered on a model-harness system. While an ideal harness system should align with human design priors and accumulate reusable experience through empiric...
- 原文DOI / 链接:https://arxiv.org/abs/2608.13560v1

7. OmniScientist: An Omni-Modal Omni-Discipline AI Scientist

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Bobo Li, Hao Fei, Tianjie Ju, Mong-Li Lee, Wynne Hsu
- 核心结论:Recent advances in foundation models have enabled AI scientists to automate increasingly complete research workflows, from hypothesis generation and code execution to manuscript preparation. Yet workflow coverage alone does not provide access to the full evidence on which scientific discovery depend...
- 原文DOI / 链接:https://arxiv.org/abs/2608.13558v1

8. Defensive Boosting for Online Probabilistic Forecasting

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Georgy Noarov, Aaron Roth

- 核心结论:We study online probabilistic forecasting of binary outcomes chosen by an adaptive adversary. Given an online learning algorithm for a weak hypothesis class $\mathcal{H}$, we would like to efficiently obtain two incomparable guarantees that existing online boosting techniques provide separately. Online gradient...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.13554v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Immunotherapy in Colorectal Cancer: Novel Perspectives and Next Steps.
