

一、今日前沿论文精选

1. A novel approach to HPV16 VLP construction and production with improved accessibility and particle sorting potential.

- 发表期刊 / 影响因子:Frontiers in molecular medicine
- 发表时间:2026
- 第一/通讯作者:Morgan Williamson, Caleb Boren, Rahul Kumar, Lauren Gollahon
- 核心结论:Human papillomavirus (HPV), a member of the Papillomaviridae family, infects a broad range of animal hosts and is responsible for the majority of cervical cancers and a substantial proportion of oropharyngeal cancers. Current treatment strategies for HPV-associated cervical disease depend largely on...
- 原文DOI / 链接:10.3389/fmmed.2026.1941186

2. Engineered CAR-T extracellular vesicles loaded with miR-17-5p inhibitor suppress hepatocellular carcinoma progression.

- 发表期刊 / 影响因子:Frontiers in immunology
- 发表时间:2026
- 第一/通讯作者:Zhifeng Zhou, Huiling Wu, Shen Zhao, Mingshui Chen, Wansong Lin
- 核心结论:Hepatocellular carcinoma (HCC) immune escape is co-driven by tumor malignant proliferation and an immunosuppressive tumor microenvironment, characterized by frequently impaired natural killer (NK) cell function. Previous research indicated that HCC cell-secreted extracellular vesicles (EVs) deliver...
- 原文DOI / 链接:10.3389/fimmu.2026.1919449

3. Analysis of Risk Factors for Progression of Breast Cancer-Related Lymphedema from the Reversible to Irreversible Stage: A Single-Center Retrospective Case-Control Study.

- 发表期刊 / 影响因子:International journal of women's health
- 发表时间:2026
- 第一/通讯作者:Zebing Luo, Manjia Xu, Weijie Gao, Qiongshan Chen, Zhijun Guo
- 核心结论:To explore the risk factors contributing to the transition from reversible to irreversible breast cancer-related lymphedema (BCRL), and to identify factors associated with irreversible BCRL. A retrospective analysis was conducted on the demographic and disease-related data of 77 BCRL patients who un...
- 原文DOI / 链接:10.2147/IJWH.S419374

4. Fibrosis-Driven Cardiovascular Risk in Metabolic Dysfunction-Associated Steatotic Liver Disease: Emerging Links With Atherosclerotic Cardiovascular Disease.

- 发表期刊 / 影响因子:Cureus
- 发表时间:2026
- 第一/通讯作者:Nakul Mahajan, Nazdeep Kaur, Samar Pal S Sandhu, Vyoma Patel, Hunardeep Kaur Boparai
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is increasingly recognized as a multisystem cardiometabolic disorder with major implications for atherosclerotic cardiovascular disease (ASCVD). Although hepatic steatosis has traditionally been considered the hallmark of MASLD, emergi...
- 原文DOI / 链接:10.7759/cureus.115501

5. Metabolic dysfunction-associated steatotic liver disease in people living with HIV: mechanisms, diagnosis, and management.

- 发表期刊 / 影响因子:Frontiers in immunology
- 发表时间:2026
- 第一/通讯作者:Ruoli Yu, Wei Xu, Jun Chen
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is the most common chronic liver disease worldwide and is increasingly recognized as a major contributor to liver-related and cardiometabolic morbidity. In people living with HIV (PLWH), the burden of MASLD is disproportionately high a...
- 原文DOI / 链接:10.3389/fimmu.2026.1875819

6. Gacha Decoding: Eliciting Diverse Generations Through Instruction Following

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-01
- 第一/通讯作者:Scott Geng, Yufei Zhang, Joseph Lee, Jerry Li, Marjan Ghazvininejad
- 核心结论:We introduce Gacha Decoding, an inference-time method for eliciting diverse language model generations that scales with model capability. Across open-ended domains (in-the-wild chat, creative writing, planning for image generation, and protein design), Gacha Decoding significantly outperforms existi...
- 原文DOI / 链接:https://arxiv.org/abs/2610.01382v1

7. Generation Provenance Before Behavior Attribution: Auditing Synthetic Speech Research Objects

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-01
- 第一/通讯作者:Sidi Chang, Peiying Zhu
- 核心结论:Attributing model behavior to synthetic training data requires knowing what produced each training item before estimating what that item caused. A waveform-label pair does not preserve this knowledge. We propose a generation-provenance substrate in which a synthetic research object binds source spec...
- 原文DOI / 链接:https://arxiv.org/abs/2610.01378v1

8. SupraTITO: Transferable Generative Molecular Dynamics for Supramolecular Systems

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-01

- 第一/通讯作者:Weilong Chen, Nuno Costa, Julija Zavadlav
- 核心结论:Peptide sequence governs both the structures formed through supramolecular assembly and the dynamics by which they emerge, but predicting either requires resolving slow collective processes among many interacting molecules. Molecular dynamics (MD) provides microscopic insight into these processes, y...
- 原文DOI / 链接:<https://arxiv.org/abs/2610.01381v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:A novel approach to HPV16 VLP construction and production with improved accessibility and particle sorting potential.
