

一、今日前沿论文精选

1. Tumor-Derived HMGB1 Orchestrates Lysosomal Metabolic Reprogramming for M1 Macrophage Polarization.

- 发表期刊 / 影响因子:Journal of medicinal chemistry
- 发表时间:2026-Aug-27
- 第一/通讯作者:Guoyu Zhang, Yi Cao, Xingxin Wu, Hanfang Liu, Min Zeng
- 核心结论:Non-small-cell lung cancer (NSCLC) is considered as a predominant contributor to cancer-related mortality with significant infiltration by TAMs. HMGB1 plays a key role in modulating immune evasion, but the mechanisms of HMGB1 in anti-NSCLC immunotherapy remain unclear. In this study, we first identi...
- 原文DOI / 链接:10.1021/acs.jmedchem.6c01996

2. Interventional Management of Chronic Neuropathic Cervical Pain Following Nerve Sheath Tumor Resection and Radiation: A Case Report.

- 发表期刊 / 影响因子:Pain medicine case reports
- 发表时间:2026
- 第一/通讯作者:Kevin Tran, Evan Banks, Mahmood Gharib
- 核心结论:Chronic neuropathic pain after head and neck cancer is common and difficult to treat, especially when compounded by surgical and radiation-related neural injury. This case illustrates persistent superficial cervical plexopathy after tumor resection and adjuvant radiation with limited response to sta...
- 原文DOI / 链接:参见原文

3. pH responsive nanoplatforms for radiosensitization and radioprotection in cancer therapy.

- 发表期刊 / 影响因子:Discover oncology
- 发表时间:2026-Aug-28
- 第一/通讯作者:Enhui Dai, Yiqin Qiu, Huan Xu, Guoqiang Zhong, Wei Feng
- 核心结论:Radiotherapy remains a cornerstone of cancer treatment, but its efficacy is limited by tumor hypoxia, adaptive antioxidant defenses, and the resulting radioresistance. Tumor extracellular acidity, commonly reported within an approximate pH range of 6.5-7.1, contributes to invasion, immune suppressio...
- 原文DOI / 链接:10.1007/s12672-026-05781-9

4. Mapping vascular plasticity during fibrogenesis identifies fibrosis-associated endothelial cells in early-stage liver disease.

- 发表期刊 / 影响因子:JCI insight
- 发表时间:2026-Sep-01
- 第一/通讯作者:Christina Gkantsinikoudi, Joshua P Dignam, Raju Kumar, Elliot Jokl, Meenakshi Rana
- 核心结论:Vascular plasticity is a crucial biological asset enabling our bodies to rapidly adapt to infections and acute inflammation. However, repeated insults during chronic disease can result in these vascular adaptations becoming irreversible, thereby driving disease progression and fibrosis. This study a...
- 原文DOI / 链接:10.1172/jci.insight.207327

5. Cost-Effectiveness of AI-Enabled Electrocardiography for Screening MASLD-Associated Advanced Chronic Liver Disease in the US Population.

- 发表期刊 / 影响因子:Digestive diseases and sciences
- 发表时间:2026-Sep-01
- 第一/通讯作者:Basile Njei, Dam Nsoh, Christian Akem Dimala, Yussif Issaka, Yazan A Al-Ajlouni
- 核心结论:MASLD is the most prevalent chronic liver disease worldwide, with pooled global prevalence estimates of approximately 30%. Current noninvasive pathways have improved risk stratification, but they depend on stepwise testing and follow-through in routine care. Against this background, artificial intel...
- 原文DOI / 链接:10.1007/s10620-026-10222-2

6. SUN: Persistent Programs For Language-Grounded Control-to-Learning-to-Real Policies

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-31
- 第一/通讯作者:Weiqi Wang, Zhi Li, Yudong Lei, David Martinez, Xiaofeng Gao
- 核心结论:Bridging model-based control and learned policies in long-horizon manipulation has harbored a silent disagreement: control executes specified objectives, learning amortizes that behavior into a reactive policy, yet existing protocols discard task semantics, leaving rewards hand-crafted and behavior...
- 原文DOI / 链接:https://arxiv.org/abs/2608.31167v1

7. Auditing Anonymous AI Models: A Four-Stage Protocol for Black-Box Identity Verification

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-31
- 第一/通讯作者:Yisen Xi
- 核心结论:The 2025–2026 AI market has seen a wave of stealth releases: frontier models launched anonymously on developer platforms under codenames. For their users, identity determines data-handling terms, supply-chain risk, and capability expectations. No validated methodology exists for black-box identity...
- 原文DOI / 链接:https://arxiv.org/abs/2608.31142v1

8. Constant Individual Regret in General Games

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-31
- 第一/通讯作者:Mingyang Liu, Gabriele Farina, Asuman Ozdaglar
- 核心结论:Uncoupled no-regret dynamics provide a decentralized route to equilibrium, but prior guarantees for individual regret retain a polylogarithmic

dependence on the horizon. We remove this dependence for every finite N -player normal-form game under full-information feedback. We introduce \emph{ECHO-OF}...

- 原文DOI / 链接:<https://arxiv.org/abs/2608.31166v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Tumor-Derived HMGB1 Orchestrates Lysosomal Metabolic Reprogramming for M1 Macrophage Polarization.
