

一、今日前沿论文精选

1. Splicing modulation as an emerging therapeutic strategy in cancer: molecular mechanisms, clinical development, and future perspectives.

- 发表期刊 / 影响因子:Japanese journal of clinical oncology
- 发表时间:2026-Sep-07
- 第一/通讯作者:Xinbata Jingle, Qinxinru Sun, Xiaoyang Li, Xinyu Li, Ayana Kon
- 核心结论:Aberrant pre-mRNA splicing is a pervasive feature of cancer and an emerging therapeutic vulnerability. Recurrent mutations in core spliceosomal components, including SF3B1, SRSF2, U2AF1, and ZRSR2, are common in myeloid malignancies, while dysregulated splicing regulators and cis-acting splice-site...
- 原文DOI / 链接:10.1093/jjco/hyag140

2. Low Dose Radiotherapy for the Treatment of Inflammatory Periarthritic Disorders: An American Radium Society (ARS) Appropriate Use Criteria (AUC).

- 发表期刊 / 影响因子:American journal of clinical oncology
- 发表时间:2026-Sep-07
- 第一/通讯作者:Austin N Kirschner, Bobby Koneru, Suzanne Russo, Tracy M Paul, Phillip Bennion
- 核心结论:To summarize the current evidence for low-dose radiation therapy (LDRT) in the treatment of inflammatory periarthritic disorders (PAD) (tendinitis, enthesitis, fasciitis, and bursitis), including patient selection, optimal RT technique, and associated risks. A systematic literature review was desi...
- 原文DOI / 链接:10.1097/COC.0000000000001371

3. From Correlation to Clinical Translation: The Biological-Grounding×Translational-Readiness Framework for Artificial Intelligence in Non-Small-Cell Lung Cancer.

- 发表期刊 / 影响因子:American journal of clinical oncology
- 发表时间:2026-Sep-07
- 第一/通讯作者:Hadeel A Albalawi
- 核心结论:Non-small-cell lung cancer (NSCLC) remains the leading cause of cancer death worldwide, and clinicians now face a rapidly expanding array of artificial intelligence (AI) tools promising earlier detection, better treatment selection, and more precise radiotherapy, yet few have altered what happens at...
- 原文DOI / 链接:10.1097/COC.0000000000001370

4. Vitamin E treatment modulates steatotic and attenuates oxidative stress in a MASLD in vitro model.

- 发表期刊 / 影响因子:Molecular biology reports
- 发表时间:2026-Sep-07
- 第一/通讯作者:Seyedeh Kiana Teymoorian, Kosar Nouri, Mahmoud Alipour Choshali, Moustapha Hassan, Elham Rismani
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is a major chronic liver disorder and a growing global health concern driven in part by oxidative stress. Activation of antioxidant pathways, particularly the nuclear factor erythroid 2-related factor 2 (Nrf2) signaling pathway, by vit...
- 原文DOI / 链接:10.1007/s11033-026-12691-0

5. Associations of antihypertensive medication class with liver fibrosis and mortality in US adults with MASLD.

- 发表期刊 / 影响因子:Clinical and experimental hypertension (New York, N.Y. : 1993)
- 发表时间:2026-Dec-31
- 第一/通讯作者:Yu Wu, Fei Fang
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) frequently coexists with hypertension, yet comparative data on antihypertensive medication classes remain limited. We examined associations between antihypertensive medication class and liver fibrosis and mortality in US adults with MA...
- 原文DOI / 链接:10.1080/10641963.2026.2725928

6. Diffusion TV: Experiencing Diffusion Models through Tangible, Embodied Interaction

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-04
- 第一/通讯作者:Sihwa Park
- 核心结论:Diffusion TV is an interactive AI art installation that offers a tangible and embodied experience of diffusion models through a modified CRT TV. By physically manipulating the TV's antenna, audiences control the clarity of AI-generated images and sounds, metaphorically enacting the denoising process...
- 原文DOI / 链接:https://arxiv.org/abs/2609.05404v1

7. RegionFed: Federated Learning for Personalized Query Understanding in Heterogeneous Retail Environments

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-04
- 第一/通讯作者:Quoc H. Nguyen, Ali Lafzi, Abhijeet Phatak, Siddharth Pratap Singh, Rohit Upadhyay
- 核心结论:Retail search systems serve diverse geographic regions with distinct query patterns, vocabularies, and product preferences, creating significant data heterogeneity that challenges both privacy-preserving training and model personalization. Federated learning offers a natural solution for privacy, bu...
- 原文DOI / 链接:https://arxiv.org/abs/2609.05403v1

8. UniMate: One Unified Model to Animate Diverse Skeletons

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-04

- 第一/通讯作者:Linshan Mou, Jiahui Lei, Zhiyang Dou, Chenyue Cai, Chaoyue Song
- 核心结论:Recent advances in automatic rigging now deliver animation-ready 3D assets at scale, yet generating the motion to drive them remains a bottleneck. Existing learned animators are topology-constrained: they rely on category-specific templates or require per-skeleton fine-tuning and reference motions a...
- 原文DOI / 链接:https://arxiv.org/abs/2609.05415v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Splicing modulation as an emerging therapeutic strategy in cancer: molecular mechanisms, clinical development, and future perspectives.
