每日医学科研精读日报 | 2026年11月01日

一、今日前沿论文精选

1. p53 activation via pharmacologic MDM2 inhibition constrains exhaustion and enhances antitumor function of human CD8+ T cells.

- 发表期刊 / 影响因子:Frontiers in immunology
- 发表时间:2026
- 第一/通讯作者:Alexandra Boix de Jesus, Hy B Dao, Anthony Imani, Gabriel A Rodriguez, Michael S Shehata
- 核心结论:Adoptive T-cell therapies using chimeric antigen receptors (CARs) or engineered T-cell receptors (TCRs) have transformed cancer treatment but remain limited by poor persistence and progressive T-cell exhaustion. Manufacturing strategies that promote memory T-cell formation may improve therapeutic du…
- 原文DOI / 链接:10.3389/fimmu.2026.1910235

2. Regulatory network remodeling and potential non-canonical associations of the transcription factor SP1 during inflammation-to-cancer transformation in esophageal squamous cell carcinoma.

- 发表期刊 / 影响因子:Frontiers in immunology
- 发表时间:2026
- 第一/通讯作者:Bin Du, Jie Zhang, Huimin Liu, Xiaoya Xing, Xinyue Wang
- 核心结论:Esophageal squamous cell carcinoma (ESCC) is closely linked to chronic inflammation, but the transcriptional mechanisms connecting epithelial inflammatory remodeling with malignant transformation remain incompletely understood. We integrated secondary analysis of published single-cell epithelial tra…
- 原文DOI / 链接:10.3389/fimmu.2026.1919461

3. The synergistic potential of combining PD-1/PD-L1 inhibitors with conventional therapies in esophageal squamous cell carcinoma.

- 发表期刊 / 影响因子:Frontiers in pharmacology
- 发表时间:2026
- 第一/通讯作者:Ruyan Li, Zihao Heng, Xi Cheng
- 核心结论:Esophageal squamous cell carcinoma (ESCC) is associated with a poor prognosis, and the efficacy of conventional therapies (chemotherapy, radiotherapy, and surgery) remains limited. The advent of programmed death 1 (PD-1)/programmed death-ligand 1 (PD-L1) inhibitors has substantially altered the trea…
- 原文DOI / 链接:10.3389/fphar.2026.1894567

4. Efficacy of Melatonin in Metabolic Dysfunction-Associated Steatotic Liver Disease: A Systematic Review and Meta-Analysis.

- 发表期刊 / 影响因子:Journal of clinical medicine research
- 发表时间:2026
- 第一/通讯作者:Avneet Singh, Fariha Hasan, Marium Zahid, Syeda Hafsa Qadri, Mohammed Aloqaily
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) represents the leading cause of chronic liver disease globally. Oxidative stress, inflammation, and hepatocellular necrosis play central roles in its pathogenesis. Emerging evidence highlights melatonin as a promising therapeutic agent…
- 原文DOI / 链接:10.14740/jocmr6688

5. Empagliflozin’s role in cardiometabolic disease treatment: an Egyptian expert’s view.

- 发表期刊 / 影响因子:Diabetology & metabolic syndrome
- 发表时间:2026-Oct-30
- 第一/通讯作者:Samir H Assaad-Khalil, Fawzy Elmessallamy, Khaled Elsayed Elhadidy, Mohamed Hesham El Hefnawy, Mohamed Reda Halawa
- 核心结论:Given the expanding therapeutic indications of empagliflozin (EMPA) beyond glycemic control and the growing burden of cardiometabolic diseases, this review evaluated its efficacy, safety, and cost-effectiveness in the Egyptian population within the global context. A comprehensive literature review o…
- 原文DOI / 链接:10.1186/s13098-026-02312-y

6. Rethinking Neural Thickets Without Weight Perturbations

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-29
- 第一/通讯作者:Nicolas Dufour, Elouan Gardès, Amil Dravid, Patrick Pérez, Loic Landrieu
- 核心结论:The Neural Thickets hypothesis posits that pretrained language models lie in dense neighborhoods of task-specific experts in weight space, which random Gaussian perturbations can uncover. We reproduce the reported gains, but show that they do not require this geometric explanation. Perturbing a sing…
- 原文DOI / 链接:https://arxiv.org/abs/2610.40649v1

7. Read, Allocate, Route: Role-Coupled Tokenization for Pixel-Space Generative Transformers

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-29
- 第一/通讯作者:Jiongfan Yang, Weichen Fan, Haiwen Diao, Zhongang Cai, Ziwei Liu
- 核心结论:Pixel-space generative Transformers typically use one token per image patch, so capturing finer detail requires more tokens and makes global attention increasingly expensive. We observe that finer detail does not necessarily require more global communication: low-frequency structure benefits from gl…
- 原文DOI / 链接:https://arxiv.org/abs/2610.40647v1

8. Propose-Filter-Release: Scaling Noise to Typical Sensitivity via Private Filtering

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-10-29
- 第一/通讯作者:Moshe Shenfeld, Eliad Tsfadia, Katrina Ligett
- 核心结论:An estimator can be accurate and stable on typical data, yet sensitive to a few possible records. Differentially private mechanisms commonly scale their noise to the worst-case influence of a single record, which lets these records dictate the noise even when the remaining data would allow far less⋯.
- 原文DOI / 链接:https://arxiv.org/abs/2610.40654v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:p53 activation via pharmacologic MDM2 inhibition constrains exhaustion and enhances antitumor function of human CD8+ T cells.
