

一、今日前沿论文精选

1. TRAIL of Hope: Bioactive Dietary Component-Driven Carrier-Free Nanoplatfoms for Synergistically Enhanced Tumor Multimodal Therapy.

- 发表期刊 / 影响因子:International journal of nanomedicine
- 发表时间:2026
- 第一/通讯作者:Liyan Yang, Xianqing Song, Zhonglei Wang
- 核心结论:Considering the inherent drawbacks of conventional anticancer drugs, such as suboptimal efficacy and undesirable toxicity, functional dietary components have been increasingly focused on achieving optimal therapeutic performance and minimizing side effects. A combination of nanoscience and drug deli...
- 原文DOI / 链接:10.2147/IJN.S632873

2. New insights into breast cancer therapy: application and mechanisms of novel targeted nano-formulation.

- 发表期刊 / 影响因子:International journal of pharmaceutics: X
- 发表时间:2026
- 第一/通讯作者:Rui-Chao Li, Ze-Yuan Sun, Si-Nian Li, Ling Lu, Ling-Qing Kong
- 核心结论:As the most common malignant tumor among women worldwide, breast cancer poses substantial challenges to the effectiveness of conventional therapies because of its molecular and pathological heterogeneity, high invasiveness, and strong metastatic potential. Novel targeted nanocarrier systems can achi...
- 原文DOI / 链接:10.1016/j.ijpx.2026.100664

3. Reirradiation of lower gastrointestinal Cancer: A survey of ongoing trials by the Reirradiation Collaborative group (ReCOG).

- 发表期刊 / 影响因子:Technical innovations & patient support in radiation oncology
- 发表时间:2026
- 第一/通讯作者:Camilla Kronborg, Ane Appelt, Pim Burger, Kyle Cuneo, Aileen Duffton
- 核心结论:Pelvic reirradiation is increasingly used for locally recurrent rectal and anal cancers, either to facilitate salvage surgery or to improve local control when surgery is not feasible. However, prospective evidence remains limited, and studies often lack sufficient methodological detail to support in...
- 原文DOI / 链接:10.1016/j.tipsro.2026.100434

4. The immunogenic cross-talk in pediatric MASLD: does subclinical immune dysfunction accelerate early hepatic destruction?

- 发表期刊 / 影响因子:Frontiers in immunology
- 发表时间:2026
- 第一/通讯作者:Harald Mangge
- 核心结论:The pathogenesis of pediatric Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD) is increasingly recognized as an immunometabolic process driven by chronic low-grade inflammation (metainflammation). While nutritional surplus and visceral adiposity are established primary drivers, the c...
- 原文DOI / 链接:10.3389/fimmu.2026.1930909

5. Fructooligosaccharides-driven metabolism of a defined Lactobacillus probiotic consortium modulates hepatic lipid accumulation in a reductionist in vitro gut microbiota-liver interaction model.

- 发表期刊 / 影响因子:Frontiers in microbiology
- 发表时间:2026
- 第一/通讯作者:Margherita Finazzi, Federica Bovio, Matilde Forcella, Marina Lasagni, Paola Fusi
- 核心结论:Metabolic dysfunction-associated steatotic liver disease may be influenced by human gut microbiota-derived metabolites. Fructooligosaccharides (FOS) and probiotic Lactobacillus species have been reported to be associated with metabolic improvements. However, the strain-specific contribution of defin...
- 原文DOI / 链接:10.3389/fmicb.2026.1866842

6. Hard Stop: Kernel-Level Preemption and Containment for Rogue Agentic Execution

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-24
- 第一/通讯作者:José Luis Pino
- 核心结论:In July 2026, an unconstrained autonomous agent participating in a frontier AI cybersecurity evaluation harness breached its evaluation sandbox, established an external command-and-control foothold, and executed a multi-stage intrusion into Hugging Face’ s production multi-tenant dataset conversion i...
- 原文DOI / 链接:https://arxiv.org/abs/2609.29808v1

7. SEEK: Skill-Routed Evaluation with Evolvable Knowledge for Industrial Search

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-24
- 第一/通讯作者:Zhongxin Huang, Songyang Li, Renzhe Zhou, Feiran Zhu, Chenglei Dai
- 核心结论:Search quality evaluation provides essential supervision and diagnostic signals for the development and iteration of industrial search systems. Although large language models (LLMs) offer a scalable alternative to manual assessment, reliable automatic evaluation remains challenging: users experience...
- 原文DOI / 链接:https://arxiv.org/abs/2609.29803v1

8. CORDIAL: Calibrating Ordinal LLM Outputs from Few Labels

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-09-24
- 第一/通讯作者:Xiangwei Wang, Peng Wang, Saman Halgamuge
- 核心结论:A large language model (LLM) can turn a text into a distribution over an ordered scale, but that distribution is a noisy measurement: saturated, compressed or exaggerated, and biased in a consistent direction. We propose CORDIAL, which treats the model's output as a noisy reading of the true label a...
- 原文DOI / 链接:<https://arxiv.org/abs/2609.29807v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:TRAIL of Hope: Bioactive Dietary Component-Driven Carrier-Free Nanoplatfoms for Synergistically Enhanced Tumor Multimodal Therapy.
