

一、今日前沿论文精选

1. Socioeconomic status and longitudinal neurocognitive outcomes following childhood brain tumour diagnosis: a Swedish national population-based cohort study.

- 发表期刊 / 影响因子:Neuro-oncology
- 发表时间:2026-Oct-08
- 第一/通讯作者:Jessica Beamish, Edvard de Fine Licht, Petra Boström, Jonas Löden, Joukje Willemsen
- 核心结论:Lower socioeconomic status (SES) is linked to poorer neurocognitive development in the general population, but these effects in paediatric brain tumour survivors are underexplored. We examined the relationship between parental SES, clinical factors, and neurocognitive functioning longitudinally up to...
- 原文DOI / 链接:10.1093/neuonc/noag253

2. EGFRvIII: An old oncogenic target gets a model built for the immunotherapy era.

- 发表期刊 / 影响因子:Neuro-oncology
- 发表时间:2026-Oct-08
- 第一/通讯作者:Sarah A Best, James R Whittle, David D Eisenstat
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1093/neuonc/noag249

3. Cancer-related deaths among cases referred for forensic evaluation in Türkiye: a 5-year retrospective analysis.

- 发表期刊 / 影响因子:Revista da Associacao Medica Brasileira (1992)
- 发表时间:2026
- 第一/通讯作者:Ahmet Burak Aydemir, Veysel Osman Soğukpınar, Humman Şen, Ferah Karayel
- 核心结论:Cancer is a major global cause of mortality and holds particular importance in forensic cases regarding diagnosis, treatment processes, and determination of cause of death. This retrospective study analyzed 163 cancer-related death cases referred for forensic evaluation to the First Specialized Board...
- 原文DOI / 链接:10.1590/1806-9282.20260577

4. Gentisic acid attenuates high fat and high fructose diet-induced metabolic dysfunction-associated steatotic liver disease through modulation of metabolic and hepatic alterations in Wistar rats.

- 发表期刊 / 影响因子:Journal of complementary & integrative medicine
- 发表时间:2026-Oct-09
- 第一/通讯作者:Deepti Dinesh Bandawane, Sakshi Sachin Katke, Ketaki Hemant Joshi
- 核心结论: ‘Gentisic acid is a phenolic compound that contains anti-inflammatory and antioxidant characteristics and could help prevent oxidative stress and damage to the liver caused by MASLD. Gentisic acid’ s medicinal potential is poorly investigated and not widely studied.’ ’ To evaluate the hepatoprotective...
- 原文DOI / 链接:10.1515/jcim-2026-0281

5. Admission interleukin-6 as a time-limited, etiology-dependent prognostic signal in hospitalized cirrhosis - A frequentist and Bayesian cohort study.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Tharun Tom Oommen, Cyriac Abby Philips, Arif Hussain Theruvath, Resmi Ravindran, Aryalakshmi Sreemohan
- 核心结论:Interleukin-6 is a proximal inflammatory cytokine implicated in cirrhosis decompensation, yet its incremental prognostic value over established severity scores remains unclear. In this prospective, purely observational study (April 2022 to October 2023), 489 consecutive patients hospitalized with ci...
- 原文DOI / 链接:10.1371/journal.pone.0360005

6. On the estimation and validity of AI time horizons—a statistical look at the METR plot

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-08
- 第一/通讯作者:Drew T. Nguyen, William Fithian
- 核心结论:METR’ s 50% time horizon measures the human completion time of software tasks that an AI solves with 50% probability, allowing AI capabilities to be expressed in interpretable units. On 228 tasks and 26 AIs, we recompute the time horizons using splines and item-response theory to relax the assumpti...
- 原文DOI / 链接:https://arxiv.org/abs/2610.12466v1

7. From Reactive Containment to Proactive Assurance: Lessons from OpenAI, Anthropic, and Google Agent Security Incidents

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-08
- 第一/通讯作者:Abbas Raftari
- 核心结论:In 2026, cybersecurity evaluations involving OpenAI, Anthropic, and Google agents reached real systems outside their authorized test scope. The paths were different. OpenAI agents exploited research infrastructure, coordinated across runs, and compromised parts of Hugging Face’ s production environme...
- 原文DOI / 链接:https://arxiv.org/abs/2610.12463v1

8. CSF: Contextual Safety Filtering for Motion Generators

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-08

- 第一/通讯作者:Lizhi Yang, Yiling Hou, Yao Tang, Junheng Li, Daniel Weng
- 核心结论:Text-conditioned motion generators produce trackable whole-body motion, but they have no notion of scene-dependent safety: the same action may target an object or a person. Existing safeguards either inspect the prompt, require labeled motion data, or enforce geometric constraints; therefore, they d…
- 原文DOI / 链接:<https://arxiv.org/abs/2610.12467v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Socioeconomic status and longitudinal neurocognitive outcomes following childhood brain tumour diagnosis: a Swedish national population-based cohort study.
