

一、今日前沿论文精选

1. A Coordinated Approach to Perioperative Rehabilitation to Enhance Outcomes in Melanoma: Protocol for the CARE-Melanoma Pilot Randomized Controlled Trial.

- 发表期刊 / 影响因子:JMIR research protocols
- 发表时间:2026-Aug-21
- 第一/通讯作者:Jenna Smith-Turchyn, Jordon L Hvizd, Valerie Francescutti
- 核心结论:Rehabilitation is beneficial for individuals with cancer across all phases of care, but access remains limited for many survivors, including individuals with melanoma. As new treatment strategies for melanoma are introduced, there is an opportunity to assess perioperative rehabilitation strategies f...
- 原文DOI / 链接:10.2196/90946

2. CAR T cell-derived TNF is an early determinant of cytokine release syndrome severity.

- 发表期刊 / 影响因子:Science immunology
- 发表时间:2026-Aug-21
- 第一/通讯作者:Pieter L Lindenbergh, Theodoros Giavridis, Oph  lie Vivier, Michael A Lopez, Anton Dobrin
- 核心结论:Cytokine release syndrome (CRS) is a common and potentially severe toxicity of chimeric antigen receptor (CAR) T cell therapy, characterized by activation of the host myeloid compartment and systemic inflammation. Although downstream effectors such as interleukin-6 (IL-6) and IL-1   are well-characte...
- 原文DOI / 链接:10.1126/sciimmunol.aea6276

3. Preclinical evaluation of homodimeric FAPI target modules for UniCAR-mediated targeting of FAP-expressing tumor and stromal cells.

- 发表期刊 / 影响因子:Oncoimmunology
- 发表时间:2026-Dec-31
- 第一/通讯作者:Hugo Boutier, Simona Mattiussi, Liliana R Loureiro, Nicole Berndt, Antonia Stammberger
- 核心结论:Due to its overexpression in the tumor microenvironment of most solid malignancies, fibroblast activation protein (FAP) has emerged as an ideal target for (immuno)theranostic applications. The clinically tested UniCAR system represents a promising adapter CAR T-cell approach, in which CAR T-cell act...
- 原文DOI / 链接:10.1080/2162402X.2026.2717836

4. Integrated liver transcriptomic data reveal differences in aging-associated regulation between metabolic dysfunction-associated steatotic liver disease and normal liver aging.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Tanchun Wang, Qin Huang, Yan Wang, Cong Li, Juan Ni
- 核心结论:Age-related molecular trajectories of metabolic dysfunction-associated steatotic liver disease (MASLD) remain insufficiently characterized, limiting age-stratified risk assessment and intervention. To test whether MASLD-related molecular changes with age merely reflect accelerated physiological aging...
- 原文DOI / 链接:10.1371/journal.pone.0356820

5. Role of adipocytes and their derived extracellular vesicles in the progression, diagnosis and treatment of liver diseases (Review).

- 发表期刊 / 影响因子:International journal of molecular medicine
- 发表时间:2026
- 第一/通讯作者:Kangrong Li, Muhammad Zubair, Yongmin Yan, Jiahao Xu
- 核心结论:The growing burden of liver diseases underscores the urgent need to elucidate the adipose-liver axis. Although adipocyte dysfunction, dysregulated adipokine secretion and adipocyte-derived extracellular vesicles (Ad-EVs) have been implicated in hepatic steatosis, inflammation and fibrogenesis, their...
- 原文DOI / 链接:10.3892/ijmm.2026.5964

6. G-CARL: Grounded Checklist-Aligned Reward Learning for Patient-Oriented Medical Report Interpretation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-20
- 第一/通讯作者:Shiao Xie, Siyu Chen, Jianwei Lv, Bo Yuan, Yujin Wang
- 核心结论:Personalized interpretation of medical reports has emerged as an increasingly important need among patients. Addressing this need requires both evidence-grounded medical factuality and context-dependent patient communication, yet existing medical vision-language tasks do not adequately capture these...
- 原文DOI / 链接:https://arxiv.org/abs/2608.20331v1

7. An Agentic Approach for Active Data Collection, Travel Behavior Modeling, and Weather-Sensitive Demand Prediction

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-20
- 第一/通讯作者:Narges Ahmadi, Yubo Jiao, J  natas Augusto Manzolli, Jiangbo Yu, Luis Miranda-Moreno
- 核心结论:Travel behavior research increasingly combines digital data collection with predictive modeling, yet these stages are often developed and evaluated separately. This study proposes a three-agent workflow integrating conversational data collection, structured data processing, and behavioral prediction...
- 原文DOI / 链接:https://arxiv.org/abs/2608.20320v1

8. Information on trajectories: martingales and random times

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-08-20
- 第一/通讯作者:Akshay Balsubramani
- 核心结论:Accounting for information flow on the path space of trajectories of a nonnegative martingale yields exact variational identities for it, even at arbitrary random times. This recovers the widely used classical concentration inequalities, from Ville to PAC-Bayes, and measures what each one discards...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.20337v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:A Coordinated Approach to Perioperative Rehabilitation to Enhance Outcomes in Melanoma: Protocol for the CARE-Melanoma Pilot Randomized Controlled Trial.
