

一、今日前沿论文精选

1. Ferroptosis in the Tumor Immune Microenvironment: Mechanisms, Nanomedicine, and Immunotherapy.

- 发表期刊 / 影响因子:Journal of cellular biochemistry
- 发表时间:2026
- 第一/通讯作者:Usamah Sayed, Jasur Rizaev, Rasul Turaev, Guzalya Mamedova, Sarah Qutayba Badraldin
- 核心结论:Ferroptosis, an iron-dependent form of regulated cell death, is frequently dysregulated in both tumor and immune cells, contributing to tumor progression and limiting the effectiveness of cancer immunotherapy. Defining the molecular mechanisms that govern ferroptosis and its effects within the tumor...
- 原文DOI / 链接:10.1002/jcb.70125

2. Beyond tumor response: hope and decision regret during immunotherapy for hepatocellular carcinoma.

- 发表期刊 / 影响因子:Supportive care in cancer : official journal of the Multinational Association of Supportive Care in Cancer
- 发表时间:2026-Sep-20
- 第一/通讯作者:Huei-Shiuan Wang, Ann-Lii Cheng, Jin-Hua Chen, Tsai-Wei Huang
- 核心结论:Immunotherapy-targeted combination therapy has transformed hepatocellular carcinoma (HCC) treatment, yet longitudinal patient-reported outcome (PRO) trajectories remain poorly characterized. We prospectively examined decision regret, hope, fatigue and quality of life during first-line treatment. Thi...
- 原文DOI / 链接:10.1007/s00520-026-11228-2

3. Genetic and Molecular Determinants of Cancer Therapy-Related Cardiovascular Toxicity.

- 发表期刊 / 影响因子:Cardiovascular toxicology
- 发表时间:2026-Sep-20
- 第一/通讯作者:Paulina Szubińska-Bałaban, Aneta Klotzka, Katarzyna Ziółkowska, Patrycja Marciniak-Stępak, Julia Niedzielska
- 核心结论:Cancer therapy-related cardiovascular toxicity (CTR-CVT) is an umbrella term for myocardial, vascular, electrical, and inflammatory complications of cytotoxic, targeted, immune, and radiation-based therapies. Cancer therapy-related cardiac dysfunction (CTRCd) is used here more narrowly for treatment...
- 原文DOI / 链接:10.1007/s12012-026-10191-y

4. Ovarian tumor domain-containing protein 1 deficiency attenuates metabolic dysfunction-associated steatotic liver disease by promoting the ubiquitination of HSP90α in hepatocytes.

- 发表期刊 / 影响因子:Molecular biomedicine
- 发表时间:2026-Sep-20
- 第一/通讯作者:Mei-Qin Huang, Si-Yi Wei, Meng-Zhe Li, Tian-Yu Chen, Shu-Qin Ou
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is the most prevalent chronic liver disease worldwide, yet approved pharmacotherapies remain limited. The ovarian tumor domain-containing protein 1 (OTUD1) has been implicated in metabolic regulation, but its role in MASLD remains uncl...
- 原文DOI / 链接:10.1186/s43556-026-00595-1

5. Unsupervised Machine Learning of Intrapancreatic Fat Deposition Reveals Distinct Clinical Phenotypes: A CT Study.

- 发表期刊 / 影响因子:Diabetes, metabolic syndrome and obesity : targets and therapy
- 发表时间:2026
- 第一/通讯作者:Wenlu Zong, Yuning Chu, Yingjie Guo, Pin Meng, Chen Hao
- 核心结论:Intrapancreatic fat deposition (IPFD) is an ectopic fat phenotype associated with metabolic abnormalities. However, the clinical heterogeneity of IPFD in relation to generalized adiposity remains insufficiently characterized. This study aimed to explore clinical profiles associated with IPFD using u...
- 原文DOI / 链接:10.2147/DMSO.S638230

6. Coding Agents with an Obstacle-Aware Harness for Safe Robot Manipulation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-17
- 第一/通讯作者:Bingxin Xu, Yuzhang Shang, Zhen Dong, Emilio Ferrara
- 核心结论:Coding agents have emerged as a promising paradigm for robot manipulation: a language model writes the robot controller as a program, and agents built in this way now operate robots without robot-specific training.Whether this paradigm is also safe, however, has not been asked. We evaluate coding ag...
- 原文DOI / 链接:https://arxiv.org/abs/2609.20822v1

7. Workspace Models: Lightweight Robotic Memory via Saliency-Driven Supervision

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-17
- 第一/通讯作者:Nitish Dashora, Douglas Chen, Idan Shenfeld, John Marangola, Pulkit Agrawal
- 核心结论:Complex robotic manipulation tasks frequently require a long-term memory of past events and actions. As conditioning on full histories renders policies prone to spurious correlations and degrades performance, many approaches to policy memory involve compressing historical information through expensi...
- 原文DOI / 链接:https://arxiv.org/abs/2609.20820v1

8. Embedding Models Measure in Peculiar Ways

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-17
- 第一/通讯作者:Juri Opitz, Andrianos Michail

- 核心结论:Embedding spaces define notions of semantic similarity and distance. We study whether those embeddings reflect physical measurements of mass, distance, time and volume, which admit a unique, objective notion of semantic equivalence and distance. We find that physical measurement is only weakly model...
- 原文DOI / 链接:<https://arxiv.org/abs/2609.20821v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Ferroptosis in the Tumor Immune Microenvironment: Mechanisms, Nanomedicine, and Immunotherapy.
