每日医学科研精读日报 | 2026年10月24日

一、今日前沿论文精选

1. Respiratory Instability-driven Cardiac Dose Deviation in Postmastectomy Deep Inspiration Breath-hold Volumetric Modulated Arc Therapy (DIBH VMAT): Development and External Validation of a Respiratory-informed Predictive Framework.

- 发表期刊 / 影响因子:Clinical oncology (Royal College of Radiologists (Great Britain))
- 发表时间:2026-Oct-01
- 第一/通讯作者:S Singh, S Sen, A K Singh, Dipesh, M Bhushan
- 核心结论:Deep inspiration breath-hold (DIBH) reduces cardiac exposure during left-sided breast radiotherapy; however, treatment-day cardiac dose may differ from the planned dose because of variations in respiratory reproducibility and anatomy. The aim of this study was to develop and validate a framework for…
- 原文DOI / 链接:10.1016/j.clon.2026.104353

2. Methodological considerations regarding an evaluation of comprehensive geriatric assessment in older women with breast cancer.

- 发表期刊 / 影响因子:Maturitas
- 发表时间:2026-Oct-19
- 第一/通讯作者:Siwen Li, Yongxian Wu, Weihua Zeng, Jia Liao, Lishan Hu
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1016/j.maturitas.2026.109156

3. Incidence and clinical impact of venous thromboembolism during immunotherapy for gynecologic cancer.

- 发表期刊 / 影响因子:Gynecologic oncology
- 发表时间:2026-Oct-22
- 第一/通讯作者:Cassidy S Abdeen, Jessica Sciuva, Reed M O’ Connor, Jessica Fulton, Julia Chalif
- 核心结论:To evaluate the incidence, risk factors, and clinical outcomes associated with venous thromboembolism (VTE) in patients with gynecologic cancer treated with immune checkpoint inhibitors (ICI). This retrospective cohort study included patients with gynecologic malignancies treated with ICI at a singl…
- 原文DOI / 链接:10.1016/j.ygyno.2026.10.020

4. Patients with MASH experience worse health-related quality of life: a multinational real-world study using LiverMultiScan.

- 发表期刊 / 影响因子:Quality of life research : an international journal of quality of life aspects of treatment, care and rehabilitation
- 发表时间:2026-Oct-22
- 第一/通讯作者:Elizabeth Shumbayawonda, Megh Utsav, Marika Hancock, Alexander Thompson, Dimitar Tonev
- 核心结论:Prevalence of metabolic dysfunction-associated steatotic liver disease (MASLD) and its progressive form, metabolic dysfunction-associated steatohepatitis (MASH), is increasing globally. Assessment of health-related quality of life (HRQoL), alongside non-invasive tests (NITs), may support identificat…
- 原文DOI / 链接:10.1007/s11136-026-04420-8

5. Surgery as Metabolic Therapy: Expanding the Role of Gastrointestinal Surgery Beyond Anatomical Reconstruction.

- 发表期刊 / 影响因子:Journal of visualized experiments : JoVE
- 发表时间:2026-Oct-21
- 第一/通讯作者:Hai-Lan Guo, Yan Jiao, Ya-Hui Liu
- 核心结论:Gastrointestinal surgery comprises procedures used to treat diseases and injuries of the digestive tract. Evidence now shows that some gastrointestinal procedures are also systemic metabolic interventions. Bariatric and metabolic surgery intentionally treats obesity and associated metabolic disease…
- 原文DOI / 链接:10.3791/74103

6. Direct Pass@k Optimization for Thought Pruning: Balancing Quality and Diversity in Test-Time Reasoning

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-22
- 第一/通讯作者:Mahdi Salmani, Adel Javanmard, Devansh Gupta, Meisam Razaviyayn
- 核心结论:Test-time scaling has emerged as a key inference strategy for reasoning models, where a model generates a large number of candidate solutions in the hope of finding at least one correct solution. Running all candidate solutions to completion can be computationally demanding, so recent work prunes th…
- 原文DOI / 链接:https://arxiv.org/abs/2610.31667v1

7. Cost-Aware Abstention for LLM-Based IT Ticket Classification

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-22
- 第一/通讯作者:Sachin Gupta
- 核心结论:Wrong automatic routing of an IT support ticket can cost more than human triage. We evaluate cost-aware abstention as an offline, cost-conditional readiness assessment: select a routing policy on calibration data under explicit costs, then evaluate that frozen policy once on held-out test data. On a…
- 原文DOI / 链接:https://arxiv.org/abs/2610.31657v1

8. Sensorimotor Alignment: A Platonic Proxy for Embodied Policy Success

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-22
- 第一/通讯作者:Yunfei Xie, Howard H. Qian, Shiyi Lan, Kaiyu Hang, Chen Wei
- 核心结论:Robotic foundation models are typically evaluated through costly closed-loop rollouts, which motivates cheap offline proxies for model capability. The

Platonic Representation Hypothesis (PRH) suggests that as representations improve, different modalities such as vision and language converge toward a…

- 原文DOI / 链接:https://arxiv.org/abs/2610.31670v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Respiratory Instability-driven Cardiac Dose Deviation in Postmastectomy Deep Inspiration Breath-hold Volumetric Modulated Arc Therapy (DIBH VMAT): Development and External Validation of a Respiratory-informed Predictive Framework.
