

一、今日前沿论文精选

1. Micrometastasis as a distinct immunobiological state and therapeutic target.

- 发表期刊 / 影响因子:Trends in immunology
- 发表时间:2026-Aug-28
- 第一/通讯作者:Silvia Avalué, Toni Celià-Terrassa
- 核心结论:Metastasis is an inefficient cellular process in which most disseminated tumor cells fail to form secondary lesions in distant tissues due to hostile conditions, such as protective immune surveillance. The few cells that survive these threats can seed subclinical metastatic lesions, known as micrometastases.
- 原文DOI / 链接:10.1016/j.it.2026.07.010

2. Mechanisms of Resistance to Immune Checkpoint Inhibitors and Therapeutic Strategies to Overcome Them: An Integrative Review.

- 发表期刊 / 影响因子:Cancer investigation
- 发表时间:2026-Aug-28
- 第一/通讯作者:Ehsan Lotfi, Fereshteh Golab
- 核心结论:Immune checkpoint inhibitors (ICIs) targeting PD-1, PD-L1, CTLA-4, and LAG-3 have transformed cancer therapy, but resistance limits durable benefit. This integrative review summarizes primary, adaptive, and acquired resistance driven by tumor-intrinsic defects, suppressive tumor microenvironmental pathways, and host factors.
- 原文DOI / 链接:10.1080/07357907.2026.2725033

3. Longitudinal Immunophenotypic Changes in Refractory Lupus Nephritis After B-cell Depletion: A 25-year Case Study.

- 发表期刊 / 影响因子:In vivo (Athens, Greece)
- 发表时间:2026
- 第一/通讯作者:Chung-Che Chen, Jeng-Wei Lu, Yi-Jung Ho, Shan-Wen Lui, Ting-Yu Hsieh
- 核心结论:Long-term management of systemic lupus erythematosus (SLE) requires a persistent balance between intensive immunosuppression and the prevention of opportunistic infections. This is particularly challenging in patients with a multi-decade disease history and evolving renal pathology. We report a female patient with refractory SLE who achieved long-term remission after B-cell depletion.
- 原文DOI / 链接:10.21873/invivo.14470

4. MASLD Exacerbates Chronic Low-dose PM2.5-induced Lung Injury, Inflammation, and Fibrosis.

- 发表期刊 / 影响因子:In vivo (Athens, Greece)
- 发表时间:2026
- 第一/通讯作者:Tran Tran Thi VAN, Yi-Siao Chen, Yi-Ting Chen, Yu-Wei Liu, I-Chen Chen
- 核心结论:Fine particulate matter (PM2.5) and metabolic dysfunction-associated steatotic liver disease (MASLD) are independent risk factors for respiratory disease. However, the combined impact of chronic, low-dose PM2.5 exposure and Western diet (WD)-induced metabolic dysfunction on pulmonary health remains unclear.
- 原文DOI / 链接:10.21873/invivo.14428

5. Perspectives of gastroenterologists on the evolving epidemiology and management of non-alcoholic fatty liver disease in Pakistan: a qualitative study.

- 发表期刊 / 影响因子:BMJ open
- 发表时间:2026-Aug-28
- 第一/通讯作者:Muhammad Ebad Khan, Matti Ullah, Muhammad Usman Khan, Alishba Bibi, Nayyab Tariq
- 核心结论:To explore gastroenterologists' perspectives on the changing epidemiology of non-alcoholic fatty liver disease (NAFLD) in Pakistan and identify barriers to its diagnosis and management. Qualitative exploratory study using face-to-face semi-structured in-depth interviews. Public and private healthcare settings.
- 原文DOI / 链接:10.1136/bmjopen-2026-119696

6. WikiSkill: Compiling Agent Experience into Persistent Knowledge for Skill Evolution

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-27
- 第一/通讯作者:Liyang Tang, Cyrus Rashtchian, Chun-Sung Ferng, Andrew Tomkins, Da-Cheng Juan
- 核心结论:Agent skills package specialized knowledge and workflows into reusable resources that extend AI agent capabilities. Recent work automatically discovers such skills from agent experience, which enables agents to progressively adapt through interaction. However, the insights that guide skill development are often lost.
- 原文DOI / 链接:https://arxiv.org/abs/2608.27454v1

7. SWE-Prime: Fewer Trajectories, Better Performance

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-27
- 第一/通讯作者:Dewu Zheng, Ruizhe Ye, Yanlin Wang, Yang Ye, Hongyu Zhang
- 核心结论:To improve large language models' ability to resolve real-world software issues, prior work has focused on constructing large-scale agent trajectory datasets and performing supervised fine-tuning (SFT) on successful trajectories. However, task success does not guarantee high-quality supervision: successful trajectories may contain errors or incomplete information.
- 原文DOI / 链接:https://arxiv.org/abs/2608.27449v1

8. Learning a Continuous Sepsis Severity Score Without Hour-by-Hour Supervision: A Two-Site Retrospective Study

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-27
- 第一/通讯作者:Kevin Zhu, Ryan Zhang, Baraa Abed, Tilendra Choudhary, Malvern Madondo

- 核心结论:Currently used sepsis severity indices rely on fixed variables and weights established decades ago, which are coarsely discretized and calibrated to a cohort that no longer reflects contemporary critical care. No alternative learned directly from patient trajectories is in routine use. We conducted...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.27421v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Micrometastasis as a distinct immunobiological state and therapeutic target.
