

一、今日前沿论文精选

1. Erratum: Five-Year Outcomes of Short-Term Radiotherapy Plus Chemotherapy Versus Long-Term Chemoradiotherapy for Locally Advanced Rectal Cancer: Updated Results of the STELLAR Trial.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Sep-25
- 第一/通讯作者:Yuan Tang, Hai-Tao Zhou, Tong-Zhen Xu, Ning Li, Li-Ming Jiang
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1200/JCO-26-02343

2. Development and Validation of an Ultra-low-cost, Open-source Normothermic Ex Vivo Organ Perfusion Platform.

- 发表期刊 / 影响因子:Transplantation
- 发表时间:2026-Sep-25
- 第一/通讯作者:Heiko Yang, Nicholas Higgins, Simon Chu, Jean Lee, Natalie Meyer
- 核心结论:Normothermic machine perfusion (NMP) promises to catalyze organ preservation, therapeutic discovery, and disease modeling. Commercial organ perfusion devices remain inaccessible for research because of restricted access, high costs, and steep technical learning curves. To overcome these barriers, an...
- 原文DOI / 链接:10.1097/TP.0000000000005888

3. Distribution of industry-sponsored research payments to US physician principal investigators.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Zhuo Tony Su, Zeyad Hammadeh, Logan B Galansky, Alyssa G Arbuiso, Yuezhou Jing
- 核心结论:The Open Payments program (OPP) was launched in 2013 following the passage of the Physician Payments Sunshine Act (PPSA) to promote transparency of physician-industry financial relationships. Extensive research has scrutinized general (non-research) payments from industry to physicians. However, ind...
- 原文DOI / 链接:10.1371/journal.pone.0358886

4. Metabolic Dysfunction-Associated Steatotic Liver Disease: A Review and Cases Regarding Liver Transplantation.

- 发表期刊 / 影响因子:Rhode Island medical journal (2013)
- 发表时间:2026-Oct-01
- 第一/通讯作者:Kimberly Ho, Paige McLean Diaz
- 核心结论:参见原文摘要
- 原文DOI / 链接:参见原文

5. mTORC1-TFEB/TFE3 signaling is associated with bile acid diversification during hepatic metabolic adaptation.

- 发表期刊 / 影响因子:Science advances
- 发表时间:2026-Sep-25
- 第一/通讯作者:Alex Zaufel, Wenfei Sun, Nunzia Pastore, Ulrike Taschler, Carina Wagner
- 核心结论:The mechanistic target of rapamycin complex 1 (mTORC1) integrates nutrient and hormonal cues to regulate hepatic lipid metabolism with major implications for metabolic dysfunction-associated steatotic liver disease (MASLD). Here, we show that altered hepatic mTORC1-TFEB/TFE3 signaling is associated...
- 原文DOI / 链接:10.1126/sciadv.aee1905

6. LLM Agents Can Easily Tamper With Their Own Traces

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-24
- 第一/通讯作者:Jeremy Qin, David Schmotz, Derck Prinzhorn, Luca Beurer-Kellner, Ameya Prabhu
- 核心结论:Asynchronous monitoring, incident investigations, and compliance audits primarily rely on agent traces to reconstruct what happened. These analyses assume that LLM agents cannot tamper with their own execution traces. We show that local LLM agents such as Claude Code, Codex, AntigraVity, Open Code a...
- 原文DOI / 链接:https://arxiv.org/abs/2609.30266v1

7. AD-WM: Action-Discriminative World Models for Counterfactual Model Predictive Control

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-24
- 第一/通讯作者:Jiabin Qiu, Zixuan Chen, Hongye Cao, Jieqi Shi, Jing Huo
- 核心结论:Latent world models are typically trained to predict factual transitions, whereas model predictive control (MPC) must compare alternative actions from the same state. A model can therefore achieve low factual prediction error yet poorly distinguish candidate actions. We introduce AD-WM, an action-di...
- 原文DOI / 链接:https://arxiv.org/abs/2609.30264v1

8. Temporal Gradient Inversion for Private Trajectory Reconstruction in Embodied Reinforcement Learning

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-24
- 第一/通讯作者:Sudip Bhujel, Shanghao Shi, Ruiquan Huang, Ning Zhang, Yang Xiao
- 核心结论:Distributed learning in embodied reinforcement-learning agents offers a degree of privacy by retaining raw sensor data on-device and transmitting only

policy gradients to the server. Yet temporal structure can amplify this leakage beyond single-frame attacks. We introduce Temporal Reconstruction Att...

- 原文DOI / 链接:<https://arxiv.org/abs/2609.30258v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Erratum: Five-Year Outcomes of Short-Term Radiotherapy Plus Chemotherapy Versus Long-Term Chemoradiotherapy for Locally Advanced Rectal Cancer: Updated Results of the STELLAR Trial.
