

一、今日前沿论文精选

1. Noninvasive Transdermal Vaccine Platform Using Deep Eutectic Solvents for Cancer Immunotherapy.

- 发表期刊 / 影响因子:ACS applied bio materials
- 发表时间:2026-Sep-29
- 第一/通讯作者:Naoaki Fujita, Kiyohiro Toyofuku, Rie Wakabayashi, Yoshirou Kawaguchi, Noriho Kamiya
- 核心结论:Cancer immunotherapy has attracted considerable attention since the early 2010s as an alternative to conventional cancer treatments such as surgery, chemotherapy, and radiotherapy. Among these approaches, cancer vaccines exert preventive and therapeutic effects by eliciting immune responses against...
- 原文DOI / 链接:10.1021/acsabm.6c00559

2. Toward a Cure in Multiple Myeloma: Redefining Induction Therapy and the Role of Autologous Stem Cell Transplant.

- 发表期刊 / 影响因子:Cancer journal (Sudbury, Mass.)
- 发表时间:2026 Sep-Oct 01
- 第一/通讯作者:Advait Joshi, Benjamin R Puliafito, Diana D Cirstea, Andrew R Branagan, Joshua N Gustine
- 核心结论:The therapeutic goal in multiple myeloma (MM) is changing from long-term disease control to a potential cure. While anti-CD38-containing quadruplets have improved outcomes, relapses continue to occur in many patients. In recent years, advancements in immunotherapy have fundamentally changed this par...
- 原文DOI / 链接:10.1097/PPO.0000000000000853

3. Tailoring Therapy for Frail and Elderly Myeloma Patients.

- 发表期刊 / 影响因子:Cancer journal (Sudbury, Mass.)
- 发表时间:2026 Sep-Oct 01
- 第一/通讯作者:Thomas George, Raphael E Szalat
- 核心结论:Multiple myeloma is a plasma cell malignancy associated with heterogeneous clinical outcomes. The majority of patients are diagnosed during their seventh decade and often present with age-related comorbidities and organ dysfunction. Myeloma therapeutic landscape is rapidly evolving with the introduc...
- 原文DOI / 链接:10.1097/PPO.0000000000000850

4. Ferroptosis in liver biology and diseases.

- 发表期刊 / 影响因子:Hepatology communications
- 发表时间:2026-Oct-01
- 第一/通讯作者:Peng Cao, Peijian He, Kuo Du, Hartmut Jaeschke, John J Lemasters
- 核心结论:Ferroptosis is a form of non-apoptotic cell death driven by iron-dependent lipid peroxidation (LPO). Ferroptosis is closely associated with hepatic metabolic pathways, particularly those involving iron, fatty acids, amino acids, and redox changes. This review aims to provide a comprehensive overview...
- 原文DOI / 链接:10.1097/HC9.0000000000001058

5. A multicenter multistate modeling on the natural history of liver decompensation: Longitudinal analysis of 1777 patients.

- 发表期刊 / 影响因子:Hepatology communications
- 发表时间:2026-Oct-01
- 第一/通讯作者:Eunice X X Tan, Nicole Shu Ying Tang, Nicholas Syn, Daniel Q Huang, Anand V Kulkarni
- 核心结论:Cirrhosis often remains silent until decompensation, after which survival deteriorates sharply. Contemporary, transition-aware estimates are limited, especially in Asian-predominant cohorts. We analyzed trajectories from compensated advanced chronic liver disease (cACLD) through sequential decompens...
- 原文DOI / 链接:10.1097/HC9.0000000000001042

6. JudgeCast: Time Series Forecasting with Experience-Informed Covariate Judgements

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-29
- 第一/通讯作者:Donguk Kwon, Wooseok Jeong, Dongha Lee
- 核心结论:Covariate effects vary across contexts and shift over time, requiring forecasters to assess how to use them for each forecasting context. As forecasting proceeds, observations for earlier forecasts become available, providing feedback on past covariate use for subsequent forecasts. However, when mul...
- 原文DOI / 链接:https://arxiv.org/abs/2609.36966v1

7. VStress: Correlation-Aware Auditing and Adaptive Budget Allocation for Repeated Verifiers

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-29
- 第一/通讯作者:Miaobo Hu, Shuhao Hu, Xiaobo Guo, Xin Wang, Bokun Wang
- 核心结论:Repeated verifier calls are useful only when they contribute conditional information. We introduce VStress, an auditable replay contract, and VStress-CA, a correlation-aware allocation policy that estimates the conditional marginal information of an unqueried verifier on a sealed calibration split,...
- 原文DOI / 链接:https://arxiv.org/abs/2609.36958v1

8. TaskBridge: Bridging Unsupervised Tabular Anomaly Detection and In-Context Learning via Virtual Tasks

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-29
- 第一/通讯作者:Doyun Choi, Dooho Lee, Jaemin Yoo
- 核心结论:Unsupervised tabular anomaly detection (TAD) aims to identify anomalous rows in tabular data using normal training samples. While conventional

methods rely on dataset-specific training and configuration search, recent tabular foundation models (TFMs) enable zero-shot anomaly detection on unseen data...

- 原文DOI / 链接:<https://arxiv.org/abs/2609.36968v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Noninvasive Transdermal Vaccine Platform Using Deep Eutectic Solvents for Cancer Immunotherapy.
