

一、今日前沿论文精选

1. Advances in Systemic Treatment of Breast Cancer.

- 发表期刊 / 影响因子:The New England journal of medicine
- 发表时间:2026-Oct-08
- 第一/通讯作者:Sara Alsterlind Hurvitz
- 核心结论:Systemic therapy for breast cancer has evolved rapidly since 2020, driven by the expansion of targeted therapies, antibody-drug conjugates, and immunotherapy across biologic subtypes. The integration of tumor molecular profiling and germline testing has enabled increasingly personalized, biomarker-g...
- 原文DOI / 链接:10.1056/NEJMra2500695

2. Clinical Features and Outcomes of Therapy-Related Myeloid Neoplasms After CAR T-Cell Therapy.

- 发表期刊 / 影响因子:Blood advances
- 发表时间:2026-Oct-07
- 第一/通讯作者:Michael D Jain, Alaa Ali, Jaime Roman Diaz, Showkat Hamid, Peter Cheng
- 核心结论:Therapy-related myeloid neoplasms (t-MN) after chimeric antigen receptor (CAR) T-cell therapy occur with short latency, but whether they carry an independent survival disadvantage is unclear. We assembled a multicenter retrospective cohort of 399 adults with t-MN after CAR T-cell therapy (n=56), aut...
- 原文DOI / 链接:10.1182/bloodadvances.2026021831

3. Reply to: Is the Extent of Lymph Node Dissection a Confounder in Perioperative Immunotherapy?

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Oct-07
- 第一/通讯作者:Fei-Yang Zhang, Run-Cong Nie, Shu-Qiang Yuan
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1200/JCO-26-02106

4. Plasma proteomic signatures of biological aging and metabolic dysfunction-associated steatotic liver disease risk: a prospective cohort study.

- 发表期刊 / 影响因子:Hepatology international
- 发表时间:2026-Oct-07
- 第一/通讯作者:Teng-Rui Cao, Li-Juan Wu, Xing-Hua Yang, Ning-Fei Fan, Jie Ding
- 核心结论:Biological aging is associated with incident metabolic dysfunction-associated steatotic liver disease (MASLD), but the underlying proteomic mechanisms remain largely unknown. This study aimed to systematically characterize the plasma proteomic landscape and identify specific biomarkers that mediate...
- 原文DOI / 链接:10.1007/s12072-026-11155-8

5. Sex Hormone-Based Models Outperform Conventional Scores for Metabolic Dysfunction-Associated Steatotic Liver Disease Screening: A Sex-Specific Analysis in Type 2 Diabetes.

- 发表期刊 / 影响因子:Journal of diabetes research
- 发表时间:2026
- 第一/通讯作者:Guixin Li, Weiwei Liu, Ruihua Chen, Jinghui Guo, Long Wang
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is highly prevalent among patients with Type 2 diabetes mellitus (T2DM). Although various noninvasive assessment tools for MASLD are currently available, few have been specifically validated in T2DM populations. Furthermore, the role o...
- 原文DOI / 链接:10.1155/jdr/2030936

6. Never Look Back: Understanding Persistence in 3D Object Memory from Egocentric Videos

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-07
- 第一/通讯作者:Shravan Chaudhari, William Paul, Suchi Saria, Rama Chellappa, Homanga Bharadhwaj
- 核心结论:As we move through the world and carry out everyday tasks, we encounter objects that may become relevant only later. We are capable of recalling where we left something or what was inside a container, even without knowing we would need it later. Here, we study how an embodied assistant can build a s...
- 原文DOI / 链接:https://arxiv.org/abs/2610.10538v1

7. Decoupling Exploration from Optimization in RLVR

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-07
- 第一/通讯作者:Saif Punjwani, Micah Goldblum
- 核心结论:Modern language models undergo reinforcement learning with verifiable rewards (RLVR) on top of already-trained checkpoints. A key promise of RLVR is the discovery of new reasoning strategies. In principle, a model can sample novel ideas absent from its prior training data. In practice, however, augm...
- 原文DOI / 链接:https://arxiv.org/abs/2610.10536v1

8. Decoupling Exploration from Optimization in RLVR

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-07
- 第一/通讯作者:Saif Punjwani, Micah Goldblum
- 核心结论:Modern language models undergo reinforcement learning with verifiable rewards (RLVR) on top of already-trained checkpoints. A key promise of RLVR is

the discovery of new reasoning strategies. In principle, a model can sample novel ideas absent from its prior training data. In practice, however, augm...

- 原文DOI / 链接:<https://arxiv.org/abs/2610.10536v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Advances in Systemic Treatment of Breast Cancer.
