每日医学科研精读日报 | 2026年10月17日

一、今日前沿论文精选

1. PIK3CA Mutations in Advanced or Recurrent Endometrial Cancer: An Exploratory Molecular Profiling From the Phase II MITO END-3 Study.

- 发表期刊 / 影响因子:JCO precision oncology
- 发表时间:2026
- 第一/通讯作者:Anna Passarelli, Giovanni Luca Scaglione, Daniela Califano, Michele Bartoletti, Domenica Lorusso
- 核心结论:Immunotherapy with chemotherapy significantly improves progression-free survival in advanced endometrial cancer (EC), especially in microsatellite instability-high (MSI-H) cases. Despite this, for recurrent EC in the postimmunotherapy setting, new treatment options are urgently needed. The PI3K path…
- 原文DOI / 链接:10.1200/PO-26-00484

2. Practical Review of Role and Usage of Corticosteroids in Modern Neuro-Oncology Care.

- 发表期刊 / 影响因子:Neurology. Clinical practice
- 发表时间:2026
- 第一/通讯作者:Christine Lu-Emerson, Chris Lee, Megan E H Still, Ashley P Ghiaseddin, Mina Lobbous
- 核心结论:Corticosteroids are commonly used in the treatment of neuro-oncology patients. Unfortunately, the benefits of steroids must be balanced against the potential development of complications. This review provides guidance for the usage of steroids in the management of neuro-oncology patients. Steroids s…
- 原文DOI / 链接:10.1212/CPJ.0000000000200679

3. Therapeutic-scale CAR-NK microrobots with programmable swarm navigation for targeted solid tumor therapy.

- 发表期刊 / 影响因子:Science advances
- 发表时间:2026-Oct-16
- 第一/通讯作者:Zhiguang Wu, Yalin Wang, Hongyue Zhang, Xinjian Fan, Mingtong Li
- 核心结论:An urgent requirement in chimeric antigen receptor (CAR) immune cell therapy [e.g., CAR-natural killer (NK) cells] for solid tumors is to engineer the cells for precise tumor targeting. Meanwhile, medical microrobots can be navigated toward specific target sites using external magnetic fields. Here,…
- 原文DOI / 链接:10.1126/sciadv.aef9412

4. E3 Ubiquitin Ligase RNF126 Contributes to Pathogenesis of Obesity by Induction Mitophagy Mediated by PINK1/Parkin Pathway.

- 发表期刊 / 影响因子:FASEB journal : official publication of the Federation of American Societies for Experimental Biology
- 发表时间:2026-Oct-31
- 第一/通讯作者:Bing Yang, Yanli Wang, Bimin Shi
- 核心结论:Obesity and its associated metabolic disorders have become major global public health challenges. Increasing evidence indicates that mitophagy plays a pivotal role in the pathogenesis of obesity and related metabolic diseases. This study aimed to investigate the role and underlying mechanisms of E3…
- 原文DOI / 链接:10.1096/fj.202600460R

5. From bystander to key player: The mechanisms and therapeutic potential of IL-24 in liver diseases.

- 发表期刊 / 影响因子:Molecular biology reports
- 发表时间:2026-Oct-16
- 第一/通讯作者:Jiawei Cui, Yukai Chen, Chao Sun, Yuemin Nan
- 核心结论:Interleukin-24 (IL-24) was initially identified during investigations on melanoma differentiation, and it is a pivotal member of the IL-10 family. As a secreted cytokine, IL-24 is recognized as a tumor suppressor cytokine that induces apoptosis and inhibits angiogenesis. The liver is a unique immuno…
- 原文DOI / 链接:10.1007/s11033-026-12941-1

6. LIBERO-PeRM: Benchmarking Personalized Robotic Manipulation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-15
- 第一/通讯作者:Zhixu Li, Keqian Tang, Litian Gong, Jingyu Yao, Wenqian Zhang
- 核心结论:Personalization is essential for general-purpose robots to transition into household environments and achieve true practicality. While general robotic manipulation has been extensively studied, personalized robotic manipulation (PeRM) lacks a controlled benchmark for separating task completion from…
- 原文DOI / 链接:https://arxiv.org/abs/2610.22372v1

7. Discovering state-of-the-art quantum circuits with large language models

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-15
- 第一/通讯作者:Andi Gu, Alek H. Kemeny, Susanne F. Yelin, Mikhail D. Lukin
- 核心结论:Significant efforts are currently being directed toward the implementation of large-scale quantum information processors, but realizing useful quantum advantage also requires the development of efficient quantum algorithms. While for many practical problems the dominant resource costs are associated…
- 原文DOI / 链接:https://arxiv.org/abs/2610.22367v1

8. LIBERO-PeRM: Benchmarking Personalized Robotic Manipulation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-15
- 第一/通讯作者:Zhixu Li, Keqian Tang, Litian Gong, Jingyu Yao, Wenqian Zhang
- 核心结论:Personalization is essential for general-purpose robots to transition into household environments and achieve true practicality. While general robotic

manipulation has been extensively studied, personalized robotic manipulation (PeRM) lacks a controlled benchmark for separating task completion from…

- 原文DOI / 链接:https://arxiv.org/abs/2610.22372v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:PIK3CA Mutations in Advanced or Recurrent Endometrial Cancer: An Exploratory Molecular Profiling From the Phase II MITO END-3 Study.
