

一、今日前沿论文精选

1. Atezolizumab vs durvalumab for extensive-stage small cell lung cancer in Japan: a real-world comparative analysis of costs and clinical outcomes.

- 发表期刊 / 影响因子:Japanese journal of clinical oncology
- 发表时间:2026-Aug-16
- 第一/通讯作者:Katsuya Hirano, Akito Hata, Yuta Yamanaka, Toshiyuki Sumi, Motohiro Tamiya
- 核心结论:Platinum-etoposide combined with a PD-L1 inhibitor (atezolizumab or durvalumab) is the standard first-line treatment for extensive-stage small cell lung cancer (ES-SCLC). Although phase 3 trials have demonstrated similar efficacy, no direct comparison exists, and differences in treatment cost and re...
- 原文DOI / 链接:10.1093/jjco/hyag128

2. Transoral Robotic Surgery in Head and Neck Oncology: A Scoping Review of Evidence, Technological Advancements, and Future Trajectories.

- 发表期刊 / 影响因子:Journal of surgical oncology
- 发表时间:2026-Aug-16
- 第一/通讯作者:Anna Luíza Damaceno Araújo, Karthik N Rao, Juan P Rodrigo, Vincent Vander Poorten, Orlando Guntinas-Lichius
- 核心结论:Robotic surgery has transformed head and neck cancer (HNC) treatment. This scoping review synthesizes evidence on transoral robotic surgery (TORS), focusing on applications, limitations, and future directions. Following PRISMA-ScR guidelines, this review used the PCC framework (Population: HNC patie...
- 原文DOI / 链接:10.1002/jso.70353

3. Palliative care and hospice utilization in patients with relapsed or refractory diffuse large B-cell lymphoma in the era of CART and novel immunotherapies.

- 发表期刊 / 影响因子:Leukemia & lymphoma
- 发表时间:2026-Aug-16
- 第一/通讯作者:Danny Trotier, Manlu Liu, Arun Augustine, Kiruba Vembu, Meaghan Trainor
- 核心结论:Chimeric antigen receptor T-cell therapy (CART) has changed treatment for relapsed/refractory diffuse large B-cell lymphoma (r/r DLBCL), but most patients still die of their disease and may benefit from palliative care (PC) or hospice services. Whether CART availability has affected PC or hospice re...
- 原文DOI / 链接:10.1080/10428194.2026.2715204

4. Splenic Steatopathy: A Clinical and Experimental Framework for Lipid-Associated Splenic Pathology.

- 发表期刊 / 影响因子:Clinical and experimental gastroenterology
- 发表时间:2026
- 第一/通讯作者:Vishal G Shelat
- 核心结论:The spleen is usually viewed as a hematologic, vascular and immune organ, but rarely within lipid-associated disease. This review proposes splenic steatopathy as a provisional clinical and experimental framework rather than an established diagnosis or a splenic equivalent of fatty liver disease. Evi...
- 原文DOI / 链接:10.2147/CEG.S628370

5. Knowledge and practices related to non-alcoholic fatty liver disease among university students in Bangladesh.

- 发表期刊 / 影响因子:Dialogues in health
- 发表时间:2026
- 第一/通讯作者:Salma Khatun, Iffat Tasnim Haque
- 核心结论:Non-alcoholic fatty liver disease (NAFLD) is a growing public health concern associated with obesity, diabetes, and metabolic syndromes. However, awareness and preventive behaviors remain understudied among young adults in low- and middle-income countries. This cross-sectional study assesses knowled...
- 原文DOI / 链接:10.1016/j.dialog.2026.100334

6. AutoDesign: Meta-Harness Optimization for Long-Horizon Agentic Design

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Yaxin Luo, Haobin Jiang, Jialv Zou, Xu Huang, Wenhao Yan
- 核心结论:Transforming multimodal sources into condensed and structured media outputs can be fundamentally conceptualized as a long-horizon agentic process centered on a model-harness system. While an ideal harness system should align with human design priors and accumulate reusable experience through empiric...
- 原文DOI / 链接:https://arxiv.org/abs/2608.13560v1

7. OmniScientist: An Omni-Modal Omni-Discipline AI Scientist

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13
- 第一/通讯作者:Bobo Li, Hao Fei, Tianjie Ju, Mong-Li Lee, Wynne Hsu
- 核心结论:Recent advances in foundation models have enabled AI scientists to automate increasingly complete research workflows, from hypothesis generation and code execution to manuscript preparation. Yet workflow coverage alone does not provide access to the full evidence on which scientific discovery depend...
- 原文DOI / 链接:https://arxiv.org/abs/2608.13558v1

8. Defensive Boosting for Online Probabilistic Forecasting

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-13

- 第一/通讯作者:Georgy Noarov, Aaron Roth
- 核心结论:We study online probabilistic forecasting of binary outcomes chosen by an adaptive adversary. Given an online learning algorithm for a weak hypothesis class H , we would like to efficiently obtain two incomparable guarantees that existing online boosting techniques provide separately. Online gradie...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.13554v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Atezolizumab vs durvalumab for extensive-stage small cell lung cancer in Japan: a real-world comparative analysis of costs and clinical outcomes.
