每日医学科研精读日报 | 2026年11月10日

一、今日前沿论文精选

1. A Wide pCR Divide: Neoadjuvant immunotherapy versus targeted therapy in resectable NSCLC.

- 发表期刊 / 影响因子:Lung cancer (Amsterdam, Netherlands)
- 发表时间:2026-Nov-06
- 第一/通讯作者:Ruyue Li, Yeran Zhang, Haoran Li, Yali Xu, Yintao Li
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1016/j.lungcan.2026.109678

2. No more surgery by default in dMMR/MSI-H colon cancer? From mandatory colectomy to response-adapted surgery.

- 发表期刊 / 影响因子:European journal of surgical oncology : the journal of the European Society of Surgical Oncology and the British Association of Surgical Oncology
- 发表时间:2026-Nov-05
- 第一/通讯作者:Gertjan Rasschaert, Cédric Schraepen, Albert Wolthuis, André D’ Hoore
- 核心结论:Neoadjuvant immune checkpoint blockade has transformed localized mismatch repair-deficient/microsatellite instability-high (dMMR/MSI-H) colon cancer, producing unprecedented rates of major and complete pathological response. These results raise a question that until recently would have seemed premat…
- 原文DOI / 链接:10.1016/j.ejso.2026.112359

3. Management of Benign and Aggressive Bone Tumors of the Hand and Wrist.

- 发表期刊 / 影响因子:Hand clinics
- 发表时间:2027
- 第一/通讯作者:Ken Nishimura, Matthew T Houdek, Steven L Moran
- 核心结论:Bone tumors of the hand and wrist are relatively uncommon, creating the clinical challenge of differentiating benign lesions like enchondromas, from locally aggressive tumors such as giant cell tumors of bone and more aggressive malignancies. The hand’ s complex anatomy complicates treatment, demandi…
- 原文DOI / 链接:10.1016/j.hcl.2026.08.005

4. Pituitary Stalk Interruption Syndrome in Adulthood: Diagnostic Recognition, Clinical Spectrum, and Long-Term Follow-Up.

- 发表期刊 / 影响因子:Hormone and metabolic research = Hormon- und Stoffwechselforschung = Hormones et metabolisme
- 发表时间:2026-Nov-09
- 第一/通讯作者:Zeynep Elüstü Belten, Bahar Atasoy, Özge Şahin Kimyon, Selin Çelik, Didem Acarer Bugün
- 核心结论:Pituitary stalk interruption syndrome is usually diagnosed during childhood, and data on outcomes in adulthood are limited. This retrospective, single-center study evaluated the diagnostic history, endocrine phenotype, and clinical outcomes of 14 adults with radiologically confirmed pituitary stalk…
- 原文DOI / 链接:10.1055/a-2989-4273

5. GLP-1/Glucagon Receptor Dual Agonists for Metabolic Dysfunction-Associated Steatohepatitis and Steatotic Liver Disease (MASH/MASLD): A Systematic Review and Meta-Analysis.

- 发表期刊 / 影响因子:Digestive diseases (Basel, Switzerland)
- 发表时间:2026-Nov-09
- 第一/通讯作者:Krishna Vamsy Polepalli, Prarath Roshni, Sushma Moka, Rinita Reddi, Mahesh Manish
- 核心结论:Metabolic dysfunction-associated steatohepatitis (MASH) is a progressive liver disease with high unmet therapeutic need. GLP-1/glucagon dual receptor agonists are an emerging drug class, but no meta-analysis has evaluated it exclusively. In this registered systematic review and meta-analysis (PROSPE…
- 原文DOI / 链接:10.1159/ddi/acnag020

6. TID System for Speech-COSER Challenge 2026: ASR Track

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-08
- 第一/通讯作者:Fernando López, Jordi Luque
- 核心结论:We describe the system submitted by Telefónica Innovación Digital to the Speech-COSER Challenge 2026, which features spontaneous speech from elderly speakers recorded in rural Spain. For ASR, we perform CTC-based pseudo-forced alignment scores audio-text match quality to guide a two-stage LoRA curri…
- 原文DOI / 链接:https://arxiv.org/abs/2611.11497v1

7. Robust and Private Swarm Learning via Zero-Knowledge Validator Admission and Consensus Aggregation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-08
- 第一/通讯作者:Marco Arazzi, Mert Cihangiroglu, Antonino Nocera
- 核心结论:Swarm Learning improves resilience and removes the need for a single trusted coordinator by distributing model aggregation and validation across participating nodes. However, it also delegates the validation of model updates to peers whose private data may be biased, unrepresentative, or adversarial…
- 原文DOI / 链接:https://arxiv.org/abs/2611.11477v1

8. Regret without Optimal-Arm Feedback under Reward-Dependent Delays

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-11-08
- 第一/通讯作者:Zhong Han
- 核心结论:We study stochastic bandits with reward-dependent delays, possibly infinite, whose reports omit the originating round. For each $c \in [0, 1)$, Balanced Historical Optimism (BHO) has a delay term controlled by the largest suboptimal-arm quantile at level $1 - c\Delta_i$, without requiring optimal-arm reports….
- 原文DOI / 链接:https://arxiv.org/abs/2611.11494v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:A Wide pCR Divide: Neoadjuvant immunotherapy versus targeted therapy in resectable NSCLC.
