每日医学科研精读日报 | 2026年10月16日

一、今日前沿论文精选

1. Biomarkers of subclinical cholestasis predict cancer immunotherapy outcomes.

- 发表期刊 / 影响因子:Oncoimmunology
- 发表时间:2026-Dec-31
- 第一/通讯作者:Anne-Laure Mallard de La Varende, Marine Fidelle, Guido Kroemer, Laurence Zitvogel
- 核心结论:In a recent paper published in Cancer Cell, we identified subclinical cholestasis as an accessible imprint of gut dysbiosis predicting resistance to immune checkpoint blockade. Our work connects γ-glutamyl transferase, bile-acid remodeling, and MAdCAM-1 loss to compromised antitumor immunity, openin…
- 原文DOI / 链接:10.1080/2162402X.2026.2748140

2. Reprogramming tumor cells with LCOR mRNA nanotherapy to enhance immunotherapy.

- 发表期刊 / 影响因子:Molecular oncology
- 发表时间:2026-Oct-15
- 第一/通讯作者:Gabriel Serra-Mir, Elena Haro-Martínez, Sandra Blasco-Benito, Chiara Cannatà, José Ángel Palomeque
- 核心结论:Transcription factors (TFs) are often considered undruggable due to their structural complexity. mRNA technologies can overcome this therapeutic limitation by enabling dynamic protein replacement therapies. Here, we explore the TF activity of LCOR (Ligand-dependent corepressor), which suppresses tum…
- 原文DOI / 链接:10.1002/1878-0261.70344

3. A Nanodelivery Platform Harnessing Synthetic Lethality and Efferocytosis Inhibition for Synergistically Enhanced Immunotherapy of Triple-Negative Breast Cancer.

- 发表期刊 / 影响因子:Small (Weinheim an der Bergstrasse, Germany)
- 发表时间:2026-Oct-15
- 第一/通讯作者:Huawei Liu, Shengming Wu, Han Zhou, Ming Yin, Chenlong He
- 核心结论:Triple-negative breast cancer (TNBC), defined by the absence of specific therapeutic targets, shows poor clinical benefit and readily develops chemoresistance, underscoring the need for therapies that couple precise tumor cell killing with robust antitumor immunity. Drug-induced immunogenic cell dea…
- 原文DOI / 链接:10.1002/smll.76306

4. Metabolic insights into metabolic dysfunction-associated steatotic liver disease: the impact of gut microbiota and TCM constitutions.

- 发表期刊 / 影响因子:Archives of medical science : AMS
- 发表时间:2026
- 第一/通讯作者:Ximin Liu, Qiuhui Liu, Dongxue Lu, Zhiguang Sun
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is intricately linked to gut microbiota dysbiosis and has been associated with different traditional Chinese medicine (TCM) constitution types. This study explored the fecal microbiota composition in MASLD patients to investigate the a…
- 原文DOI / 链接:10.5114/aoms/210618

5. The association of cardiovascular disease (CVD) with progression of advanced fibrosis risk in patients with metabolic dysfunction-associated steatotic liver disease (MASLD).

- 发表期刊 / 影响因子:Livers
- 发表时间:2026
- 第一/通讯作者:Myra Quiroga, Kathryn P Anderson, Jingwen Zhang, Chloe Bays, Justin Marsden
- 核心结论:Advanced fibrosis is the best predictor of future severe liver outcomes in patients with metabolic dysfunction associated steatotic liver disease (MASLD). Our study aims to determine the association between cardiovascular disease (CVD) with time to a high-risk Fibrosis-4 Index (FIB-4) in patients wi…
- 原文DOI / 链接:10.3390/livers6050098

6. Modeling and Understanding Neural Weights of Humanoid Policies with Diffusion

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-14
- 第一/通讯作者:Huixuan Cheng, Bike Zhang, Shankar Sastry, Koushil Sreenath
- 核心结论:Recent advances in robot learning have driven rapid progress in humanoid control, enabling increasingly agile behaviors in the real world. However, humanoid control networks are typically obtained through conventional training procedures, while comparatively little attention has been given to direct…
- 原文DOI / 链接:https://arxiv.org/abs/2610.20606v1

7. Hierarchical Residual Policy Learning for Real-World Mobile Manipulation with Sparse Human Guidance

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-14
- 第一/通讯作者:Zhefei Gong, Hefeifei Jiang, Zehao Wang, Jiachen Li
- 核心结论:Mobile Manipulation (MoMa) is a cornerstone of autonomous robotic systems, yet real-world fine-tuning remains a formidable challenge because of high-dimensional action spaces and intricate coupling between heterogeneous modules. In this paper, we propose HiRe-MoMa (Hierarchical Residual Mobile Manip…
- 原文DOI / 链接:https://arxiv.org/abs/2610.20607v1

8. Modeling and Understanding Neural Weights of Humanoid Policies with Diffusion

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-10-14
- 第一/通讯作者:Huixuan Cheng, Bike Zhang, Shankar Sastry, Koushil Sreenath
- 核心结论:Recent advances in robot learning have driven rapid progress in humanoid control, enabling increasingly agile behaviors in the real world. However, humanoid control networks are typically obtained through conventional training procedures, while comparatively little attention has been given to direct…
- 原文DOI / 链接:https://arxiv.org/abs/2610.20606v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Biomarkers of subclinical cholestasis predict cancer immunotherapy outcomes.

日报自动生成于 2026年10月16日 | 数据来源:PubMed、arXiv | 下一期:明日7:00
