

一、今日前沿论文精选

1. DEFB1 + Cancer Cell-IFI30+ Macrophage Crosstalk Drives Immunosuppressive Niche in Intrahepatic Cholangiocarcinoma.

- 发表期刊 / 影响因子:Genomics, proteomics & bioinformatics
- 发表时间:2026-Sep-28
- 第一/通讯作者:Guoliang Wang, Hang Meng, Meng Li, Xiangdong Fang, Weilong Zou
- 核心结论:Intrahepatic cholangiocarcinoma (ICC) is a rare but highly aggressive primary liver malignancy distinguished by a profoundly heterogeneous tumor microenvironment, which underlies its limited response to targeted and immune-based therapies. Deciphering the cellular composition and intercellular signa...
- 原文DOI / 链接:10.1093/gpbjnl/qzag099

2. Development and internal validation of a machine learning model for predicting second primary malignancy risk in hodgkin lymphoma survivors: a population-based competing risk analysis.

- 发表期刊 / 影响因子:Hematology (Amsterdam, Netherlands)
- 发表时间:2026-Dec-31
- 第一/通讯作者:Sinian Li, Mingyue Xiong, Zhonggui Gan, Haishan Lu, Yiheng Zhao
- 核心结论:Hodgkin lymphoma (HL) survivors face an elevated long-term risk of developing second primary malignancies (SPMs), yet accurate prediction tools remain scarce. This study aimed to develop and internally validate a machine learning-based prediction model for SPM risk in HL survivors using a competing...
- 原文DOI / 链接:10.1080/16078454.2026.2737562

3. Trends in sociodemographic factors associated with human papillomavirus vaccine hesitancy in the United States: 2010-2022.

- 发表期刊 / 影响因子:Cancer
- 发表时间:2026-Oct-01
- 第一/通讯作者:Dina K Abouelella, Mrudula Nair, Mary A Gerend, Olivia Aspiras, Nosayaba Osazuwa-Peters
- 核心结论:Previous studies suggest that rates of human papillomavirus (HPV) vaccine hesitancy vary by adolescent and parent sociodemographic characteristics. This study assessed trends in the characteristics of parents who did not intend to have their child vaccinated for HPV in the United States. The authors...
- 原文DOI / 链接:10.1002/cncr.70636

4. Evaluation of hepatoprotective effect of Acacia catechu stem bark extract on high fat and high fructose diet induced metabolic dysfunction-associated steatotic liver disease in experimental animals.

- 发表期刊 / 影响因子:Journal of complementary & integrative medicine
- 发表时间:2026-Sep-29
- 第一/通讯作者:Dinesh Chandrakant Vhanale, Deepti Dinesh Bandawane, Pratiksha Kantilal Hajare
- 核心结论:This study evaluated the hepatoprotective effect of an ethanolic extract of A. catechu stem bark (ACSB) in metabolic dysfunction-associated steatotic liver disease (MASLD) induced by a high-fat and high-fructose (HFHFr) diet. The HFHFr model was developed over 10 weeks. After six weeks of induction,...
- 原文DOI / 链接:10.1515/jcim-2026-0258

5. Astragaloside IV improves MASLD via GCN5-LXRα/SREBP1c signaling pathway-mediated hepatic de novo lipogenesis.

- 发表期刊 / 影响因子:Chinese medicine
- 发表时间:2026-Sep-28
- 第一/通讯作者:Hui-Mei Liang, Yin-Yue Xu, Kun Miao, Hai-Tao Xiao, Yong-Dan Wang
- 核心结论:Astragaloside IV (AS-IV), a bioactive saponin from Astragalus membranaceus, shows promise for treating metabolic dysfunction-associated steatotic liver disease (MASLD), though its mechanisms remain unclear. This study aimed to elucidate how AS-IV alleviates hepatic steatosis, specifically investigat...
- 原文DOI / 链接:10.1186/s13020-026-01491-0

6. Thinking Outside the Box: Retention and Transmission of Information in Sliding-Window KV Inference

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-28
- 第一/通讯作者:Timothy DeLise, Seth Cromelin
- 核心结论:Sliding-window KV inference refers to processing a sequence incrementally while retaining only a fixed-size cache of recent key and value states. It can be applied to pretrained causal transformers at inference time without additional training, while its KV-cache memory remains fixed as more tokens...
- 原文DOI / 链接:https://arxiv.org/abs/2609.34049v1

7. ARCH-B: Architectural Representation, Comprehension and Hierarchy Benchmark

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-28
- 第一/通讯作者:Kieran Sagar Parikh, Jose Luis Garcia del Castillo y Lopez
- 核心结论:Multimodal models increasingly interpret visual environments, but their ability to recognize the same building across photographs, floor plans, elevations, sections, and renderings remains poorly characterized. We introduce ARCH-B, a benchmark of 354 four-choice questions across 11 cross-representat...
- 原文DOI / 链接:https://arxiv.org/abs/2609.34047v1

8. Steering Language Model Goals with Value Transplant

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-28

- 第一/通讯作者: Pengcheng Jiang, Fabien Roger
- 核心结论: Reasoning models often act as if they pursue goals, but their efforts are not always directed toward what users intend, sometimes leading them to pursue unintended outcomes. Previous work has examined how models may internally track their progress toward their goals through a “value axis.” We study...
- 原文DOI / 链接: <https://arxiv.org/abs/2609.34056v1>

二、科研公众号干货

说明: 微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力, 当前自动检索模块正在优化中, 建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词: 肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量: International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量: 200+
- 研究背景与里程碑意义: SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法: Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响: SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点: Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接: <https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向: DEFB1 + Cancer Cell-IFI30+ Macrophage Crosstalk Drives Immunosuppressive Niche in Intrahepatic Cholangiocarcinoma.
