

一、今日前沿论文精选

1. Prognostic factors in pediatric head and neck rhabdomyosarcoma: a 30-year retrospective study in Brazil.

- 发表期刊 / 影响因子:Brazilian oral research
- 发表时间:2026
- 第一/通讯作者:Deisi Romitti Maglia, Bruna do Amaral Ferreira Souza, Taiane Berguemaier de Lima, Lauro José Gregianin, Fernanda Visioli
- 核心结论:This study aimed to evaluate the survival outcomes of pediatric patients with head and neck (HN) rhabdomyosarcoma (RMS) treated at a reference center in Brazil, comparing them with those of patients with non-head and neck (NHN) RMS. Additionally, it sought to identify the clinical-pathological varia...
- 原文DOI / 链接:10.1590/1807-3107bor-2026.vol40.052

2. Bulk and single cell RNA sequencing data reveal lactylation-related gene signatures for prognosis and immunity in cervical cancer.

- 发表期刊 / 影响因子:Brazilian journal of medical and biological research = Revista brasileira de pesquisas medicas e biologicas
- 发表时间:2026
- 第一/通讯作者:Jing Song, Yutian Zhao, Chunlin Dong, Xiaowei Qi, Qu Guo
- 核心结论:Previous studies indicate that lactylation, a post-translational modification, may play an important role in the progression of cervical cancer (CC). However, the comprehensive roles of lactylation in influencing the tumor microenvironment, immune landscape, and prognosis of CC have yet to be fully...
- 原文DOI / 链接:10.1590/1414-431X2026e15368

3. HDAC2 restrains IGF2BP1-associated m6A dysregulation in cervical cancer immunotherapy resistance.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:QiuHong Deng, Zhi Wang, Jine Zhao, Ning Li, Linghua Zhang
- 核心结论:Cervical cancer (CC) immunotherapy resistance remains a critical clinical challenge. Although immune checkpoint blockade shows efficacy in subsets of patients, the epigenetic and post-transcriptional mechanisms driving resistance are poorly understood. Insulin-like growth factor 2 mRNA-binding prote...
- 原文DOI / 链接:10.1371/journal.pone.0355606

4. Clonal hematopoiesis of indeterminate potential and metabolic dysfunction-associated steatotic liver disease: Korean biopsy cohort.

- 发表期刊 / 影响因子:Hepatology international
- 发表时间:2026-Aug-27
- 第一/通讯作者:Yun Kyu Lee, Hyungtai Sim, Sae Kyung Joo, Heejoon Jang, Dong Hyeon Lee
- 核心结论:Clonal hematopoiesis of indeterminate potential (CHIP) has emerged as a contributor to age-related diseases; however, its clinical relevance to metabolic liver disease remains to be established. This study investigated the association between CHIP and metabolic dysfunction-associated steatotic liver...
- 原文DOI / 链接:10.1007/s12072-026-11143-y

5. Association between visceral adiposity index and metabolic dysfunction-associated steatotic liver disease in adults with type 1 diabetes mellitus: an exploratory cross-sectional study.

- 发表期刊 / 影响因子:Journal of endocrinological investigation
- 发表时间:2026-Aug-27
- 第一/通讯作者:A Mantovani, I Milani, R Morandin, G Giachetti, M Zoco
- 核心结论:The visceral adiposity index (VAI), a sex-specific surrogate marker of visceral adipose tissue dysfunction and insulin resistance, has been proposed to identify metabolic dysfunction-associated steatotic liver disease (MASLD) in both the general population and individuals with type 2 diabetes. Howev...
- 原文DOI / 链接:10.1007/s40618-026-03034-8

6. WikiSkill: Compiling Agent Experience into Persistent Knowledge for Skill Evolution

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-27
- 第一/通讯作者:Liyan Tang, Cyrus Rashtchian, Chun-Sung Ferng, Andrew Tomkins, Da-Cheng Juan
- 核心结论:Agent skills package specialized knowledge and workflows into reusable resources that extend AI agent capabilities. Recent work automatically discovers such skills from agent experience, which enables agents to progressively adapt through interaction. However, the insights that guide skill developme...
- 原文DOI / 链接:https://arxiv.org/abs/2608.27454v1

7. SWE-Prime: Fewer Trajectories, Better Performance

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-27
- 第一/通讯作者:Dewu Zheng, Ruizhe Ye, Yanlin Wang, Yang Ye, Hongyu Zhang
- 核心结论:To improve large language models' ability to resolve real-world software issues, prior work has focused on constructing large-scale agent trajectory datasets and performing supervised fine-tuning (SFT) on successful trajectories. However, task success does not guarantee high-quality supervision: suc...
- 原文DOI / 链接:https://arxiv.org/abs/2608.27449v1

8. Learning a Continuous Sepsis Severity Score Without Hour-by-Hour Supervision: A Two-Site Retrospective Study

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-27
- 第一/通讯作者:Kevin Zhu, Ryan Zhang, Baraa Abed, Tilendra Choudhary, Malvern Madondo

- 核心结论:Currently used sepsis severity indices rely on fixed variables and weights established decades ago, which are coarsely discretized and calibrated to a cohort that no longer reflects contemporary critical care. No alternative learned directly from patient trajectories is in routine use. We conducted...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.27421v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Prognostic factors in pediatric head and neck rhabdomyosarcoma: a 30-year retrospective study in Brazil.
