

一、今日前沿论文精选

1. Patient-Specific Electric Field Simulation In Spinal Metastasis Electrochemotherapy.

- 发表期刊 / 影响因子:Journal of visualized experiments : JoVE
- 发表时间:2026-Jul-31
- 第一/通讯作者:Paul Beunon, Baptiste Bonnet, Lambros Tselikas, Paul Janvier, Genti Xhepa
- 核心结论:Electrochemotherapy (ECT) combines the administration of cytotoxic agents with high-voltage electric pulses that transiently permeabilize tumor cell membranes and enhance intracellular drug uptake. This minimally invasive, nonthermal technique is particularly suitable for tumors located near critica...
- 原文DOI / 链接:10.3791/71239

2. Diagnostic Workup of Primary Adrenal High-Grade Undifferentiated Pleomorphic Sarcoma Initially Presenting as Brain Metastasis.

- 发表期刊 / 影响因子:Journal of visualized experiments : JoVE
- 发表时间:2026-Aug-04
- 第一/通讯作者:Hui Sun, Chao Xin, Ruichen Zhang, Zongzhan Wang
- 核心结论:Primary adrenal high-grade undifferentiated pleomorphic sarcoma (UPS) is an exceptionally rare malignant mesenchymal neoplasm, and presentation with brain metastasis as the initial manifestation is even more uncommon. This report highlights the diagnostic evaluation and multidisciplinary management...
- 原文DOI / 链接:10.3791/71554

3. Myeloid-derived MIF is a central regulator of MDSC-driven T-cell dysfunction in head and neck squamous cell carcinoma.

- 发表期刊 / 影响因子:Oncoimmunology
- 发表时间:2026-Dec-31
- 第一/通讯作者:Suvekshya Shrestha, Felipe Lamenza, Natalie Kazmierowicz, Kishan Kumar Nyati, Sushmitha Jagadeesha
- 核心结论:Head and neck squamous cell carcinoma (HNSCC) exhibits a profoundly immunosuppressive tumor microenvironment (TME) enriched for myeloid-derived suppressor cells (MDSCs), regulatory T cells (Tregs), and dysfunctional CD8⁺ T cells, limiting therapeutic benefit from immune checkpoint blockade. Macroph...
- 原文DOI / 链接:10.1080/2162402X.2026.2719293

4. SGLT-2 inhibitors and risk of 59 long-term health conditions, hospitalisation, and mortality.

- 发表期刊 / 影响因子:European journal of endocrinology
- 发表时间:2026-Aug-18
- 第一/通讯作者:Jingya Wang, Jennifer Cooper, Eleanor Hathaway, Megha Singh, Lei Su
- 核心结论:Type 2 diabetes mellitus (T2DM) is often the first condition on the pathway to patients developing multiple long-term conditions (MLTC). The impact of sodium-glucose cotransporter 2 inhibitors (SGLT-2i), a key T2DM treatment, on hospitalisation and MLTC progression remains uncertain. In this compara...
- 原文DOI / 链接:10.1093/ejendo/lvag156

5. A Near-Infrared Fluorescent Probe for Monitoring Carboxylesterase Dynamics: Application to NAFLD Diagnosis and Therapeutic Assessment of Qiwei Gandanqing Granules.

- 发表期刊 / 影响因子:Analytical chemistry
- 发表时间:2026-Aug-18
- 第一/通讯作者:Yuchen Dong, Jiejie Li, Ning Li, Jiahao Yang, Ruixin Liu
- 核心结论:As a prevalent metabolic dysfunction, non-alcoholic fatty liver disease (NAFLD) represents an escalating challenge to global healthcare systems. Hepatic carboxylesterases (CES), primarily represented by the CES1 and CES2 isoforms, are important regulators of lipid homeostasis. Emerging evidence sugg...
- 原文DOI / 链接:10.1021/acs.analchem.6c03473

6. Don’ t Drop the BATON: Long-Horizon Robot Manipulation via Agentic Subtask Exploration and Transition-aware Memory

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-17
- 第一/通讯作者:Bingxin Xu, Yuzhang Shang, Emilio Ferrara
- 核心结论:Long-horizon robot manipulation chains many contact-rich skills into one multi-stage task. Vision-language-action (VLA) models increasingly master the individual skills, yet the chain still fails: errors compound beyond the policy’ s ability to correct, and one subtask silently constrains the next. A...
- 原文DOI / 链接:https://arxiv.org/abs/2608.16889v1

7. Improving the matrix multiplication exponent with modern optimization and AlphaEvolve

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-17
- 第一/通讯作者:Emilien Dupont, Marvin Eisenberger, Borislav Kozlovskii, Abbas Mehrabian, Francisco J. R. Ruiz
- 核心结论:The current best bounds on the matrix multiplication exponent ω are obtained through a refinement of the laser method called combination loss analysis (Duan et al., 2022; Williams et al., 2024; Alman et al., 2025). In this note, we address the optimization problem at the core of this approach and...
- 原文DOI / 链接:https://arxiv.org/abs/2608.16884v1

8. Q-based Variational Inverse Reinforcement Learning

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-17

- 第一/通讯作者:Ondrej Bajgar, Peter Tisnikar, Alessandro Abate, Konstantinos Gatsis, Maïke Osborne
- 核心结论:The development of safe and beneficial AI requires that systems can learn and act in accordance with human preferences. However, explicitly specifying these preferences by hand is often infeasible. Inverse reinforcement learning (IRL) addresses this challenge by inferring preferences, represented as...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.16888v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Patient-Specific Electric Field Simulation In Spinal Metastasis Electrochemotherapy.
