

一、今日前沿论文精选

1. The Role of Hyperthermia in Enhancing Anti-tumor Efficacy of Pemetrexed and Altering hsa-MiR-548c-3p Expression Profile in A549 Cell Line (Human Lung Cancer).

- 发表期刊 / 影响因子: Iranian journal of allergy, asthma, and immunology
- 发表时间: 2026-Aug-10
- 第一/通讯作者: Sepideh Mokabberi, Nahid Babaei, Hadi Esmaeili Gouvarchin Ghaleh, Gholamreza Farnoosh
- 核心结论: Lung cancer remains a major cause of cancer-related mortality worldwide, with current treatments such as surgery, chemotherapy, and immunotherapy facing limitations, including severe side effects and high costs. Hyperthermia (H) has emerged as a promising strategy to enhance tumor sensitivity to tre...
- 原文DOI / 链接: 10.18502/ijaai.v25i5.22262

2. Proteolytic Activation of T Cell Engagers And Bispecific Proteins Using Modular Coiled-Coil Peptides.

- 发表期刊 / 影响因子: ACS chemical biology
- 发表时间: 2026-Sep-28
- 第一/通讯作者: Basudeb Mondal, Yusef A Haikal, Gabriel A Kwong, John Blazeck
- 核心结论: Bispecific T cell engagers (BiTEs) are engineered immunotherapeutic molecules designed to direct the body's immune system against malignant cells by physically connecting T cells to target cells, triggering cytotoxic responses. BiTEs have typically engaged T cells via α CD3 domains, such as OKT3 or U...
- 原文DOI / 链接: 10.1021/acscchembio.6c00688

3. Androgen Receptor-Immune Crosstalk in Metastatic Castration-Resistant Prostate Cancer: From Context-Dependent Remodeling to Biomarker-Guided Translation.

- 发表期刊 / 影响因子: The Prostate
- 发表时间: 2026-Sep-27
- 第一/通讯作者: Linjie Li, Ruixi Feng, Bingyang Zha, Shiqi Yang, Ge Wang
- 核心结论: Metastatic castration-resistant prostate cancer (mCRPC) rarely responds to immune checkpoint blockade despite clear evidence that androgen receptor (AR) signaling intersects with tumor immunity. The view that androgen deprivation uniformly enhances antitumor immunity does not explain the repeated fa...
- 原文DOI / 链接: 10.1002/pros.70254

4. Immunity as Cornerstone of Non-alcoholic Fatty Liver Disease: The Contribution of Innate and Adaptive Immune Mechanisms in the Pathogenesis of the Metabolic Syndrome-related Steatohepatitis.

- 发表期刊 / 影响因子: Iranian journal of allergy, asthma, and immunology
- 发表时间: 2026-Aug-10
- 第一/通讯作者: Danxi Wang, Renxia Zhang, Huili Huang, Ling Yin
- 核心结论: Non-alcoholic fatty liver disease (NAFLD) is a major hepatic manifestation of metabolic syndrome and encompasses a spectrum ranging from simple steatosis to non-alcoholic steatohepatitis (NASH). This study aimed to evaluate the contribution of immunological, inflammatory, and metabolic parameters-in...
- 原文DOI / 链接: 10.18502/ijaai.v25i5.22258

5. FBP1-Mediated Compartmentalization of Glycolytic Enzyme Complexes Suppresses PKM2 Function to Ameliorate MASLD Progression.

- 发表期刊 / 影响因子: Advanced science (Weinheim, Baden-Wurttemberg, Germany)
- 发表时间: 2026-Sep-27
- 第一/通讯作者: Busong Wang, Yiping Tang, Na Li, Xuening Dai, Jing Wu
- 核心结论: Metabolic dysfunction-associated steatotic liver disease (MASLD) is driven by aberrant hepatocyte glycolytic reprogramming. Fructose-1,6-bisphosphatase 1 (FBP1), a key gluconeogenic enzyme, has poorly defined roles in MASLD progression. Here, we show that FBP1 is consistently downregulated during MA...
- 原文DOI / 链接: 10.1002/adv.77875

6. Programs-of-Layers in LLMs through the Lens of Cortical Areas

- 发表期刊 / 影响因子: arXiv Preprint
- 发表时间: 2026-09-25
- 第一/通讯作者: Justus Westerhoff, Stephan Olbrich, Hatem Oraby, Matthew Evan Larkum, Felix Alexander Gers
- 核心结论: Inference in LLMs is conventionally a fixed-depth, fixed-order forward pass through every layer, regardless of how difficult the input is. The human brain does not work this way: using the thalamus as a central hub, it routes information flexibly to all regions of the cortex according to demand. Li...
- 原文DOI / 链接: https://arxiv.org/abs/2609.31360v1

7. A Safety-Bounded SDC-to-MCP Gateway for Medical AI Agents

- 发表期刊 / 影响因子: arXiv Preprint
- 发表时间: 2026-09-25
- 第一/通讯作者: Bennet Gerlach, Stefan Fischer
- 核心结论: The Model Context Protocol (MCP) provides a common interface through which AI applications discover and use external resources and tools. It allows language-model agents to ground their reasoning in current system state and interact with heterogeneous services. In medical environments, however, expo...
- 原文DOI / 链接: https://arxiv.org/abs/2609.31358v1

8. Towards Understanding LLM-Based Log Anomaly Detection: An Empirical Study of Performance, Efficiency, and Robustness

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-25
- 第一/通讯作者:Bin Li, Dongdong Wang, Siyang Lu
- 核心结论:Large language models (LLMs) have demonstrated promising performance in log anomaly detection, yet how their adaptation strategies, architectures, and deployment configurations affect detection effectiveness remains insufficiently understood. To investigate these factors, we conduct a systematic emp...
- 原文DOI / 链接:https://arxiv.org/abs/2609.31371v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:The Role of Hyperthermia in Enhancing Anti-tumor Efficacy of Pemetrexed and Altering hsa-MiR-548c-3p Expression Profile in A549 Cell Line (Human Lung Cancer).
