

一、今日前沿论文精选

1. Left-Sided Pseudomonas Infective Endocarditis Presenting with Septic Shock and Ischemic Stroke in a Non-Injection Drug User Receiving PD-L1 Inhibitor Therapy.

- 发表期刊 / 影响因子:Cureus
- 发表时间:2026
- 第一/通讯作者:Gilgamish Maloul, Arnav K Singla, Nelish Ardeshta, Sean Swearingen
- 核心结论:Infective endocarditis from Pseudomonas aeruginosa is a rare but serious infection with high morbidity and mortality. We report the case of a 66-year-old female with small cell lung cancer and no history of injection drug use or structural heart disease who developed left-sided infective endocarditi...
- 原文DOI / 链接:10.7759/cureus.113961

2. Aggregation-Induced Emission Luminogens: Emerging Theranostic Platforms for Pulmonary Diseases.

- 发表期刊 / 影响因子:Luminescence : the journal of biological and chemical luminescence
- 发表时间:2026
- 第一/通讯作者:Yang Qian Hou, Dong Wang
- 核心结论:Despite advancements in medical technology, pulmonary diseases such as refractory infections and lung cancer persist as leading causes of death globally, primarily due to the paucity of early diagnostic biomarkers and the nonspecific nature of systemic therapies. Aggregation-induced emission (AIE) l...
- 原文DOI / 链接:10.1002/bio.70621

3. A Novel Metric to Guide Cancer Priorities in Pakistan.

- 发表期刊 / 影响因子:Journal of the College of Physicians and Surgeons-Pakistan : JCPSP
- 发表时间:2026
- 第一/通讯作者:Aashir Aslam, Syed Nabeel Zafar
- 核心结论:Pakistan faces an escalating cancer burden, with approximately 185,748 new cases and 118,631 deaths annually. According to GLOBOCAN data, breast cancer (16.5%), lip/oral cavity cancer (8.6%), and lung cancer (5.1%) are the most prevalent, with breast cancer alone accounting for 31.3% of female cases...
- 原文DOI / 链接:10.29271/jcpsp.2026.09.1210

4. Inhibition of Acetylation Activity of p300/CBP Ameliorates Hepatic Steatosis Through Downregulation of ACSL4.

- 发表期刊 / 影响因子:Liver international : official journal of the International Association for the Study of the Liver
- 发表时间:2026
- 第一/通讯作者:Ling-Yan Cai, Ya-Ping Guan, Jin-Han Hu, Chun-Yan Sun, Chen-Hong Ding
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is the most prevalent chronic liver disorder, with few optimal pharmacotherapies. Ongoing studies are providing evidence that histone acetylation contributes to the progression of MASLD. This study investigated the alterations of speci...
- 原文DOI / 链接:10.1111/liv.70846

5. Therapeutic Potential of Gene Modified MSC-Exos in Insulin Resistance: Mitochondrial Crosstalk and miRNA Regulation.

- 发表期刊 / 影响因子:Journal of cellular and molecular medicine
- 发表时间:2026
- 第一/通讯作者:Qinghua Jia, Bing Li, Yuan Xing, Yuanyuan Zhang, Baodong Gao
- 核心结论:Insulin resistance (IR) is the key driver of type 2 diabetes mellitus, metabolic dysfunction-associated steatotic liver disease, and cardiometabolic disorders. Mesenchymal stem cell-derived exosomes (MSC-Exos) as a potent cell-free alternative can deliver miRNAs, proteins, and mitochondrial regulato...
- 原文DOI / 链接:10.1111/jcmm.71342

6. Compile by Training: Turning Natural-Language Specifications into Local Neural Functions

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-03
- 第一/通讯作者:Yuntian Deng, Pengyu Nie, Stuart Shieber
- 核心结论:Many recurring text functions are easy to describe but difficult to implement with rules, while calling a large remote model for every input introduces repeated cost, latency, and dependency on a provider. We present compile by training, which turns a natural-language specification into a reusable n...
- 原文DOI / 链接:https://arxiv.org/abs/2609.04199v1

7. Clean Engineering, Unstable Measurement: A Preregistered Reliability Failure of Black-Box LLM Observers on Shared Endpoints

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-03
- 第一/通讯作者:Haoyaun Zhu, Jie Zhang
- 核心结论:Language-model judges now gate training data, score generations, and drive leaderboards. The judge is then a measurement instrument, resting on one rarely stated assumption: the same request, sent to the same model name, reads the same tomorrow. We audited that assumption in two preregistered campai...
- 原文DOI / 链接:https://arxiv.org/abs/2609.04198v1

8. Compile by Training: Turning Natural-Language Specifications into Local Neural Functions

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-03
- 第一/通讯作者:Yuntian Deng, Pengyu Nie, Stuart Shieber

- 核心结论:Many recurring text functions are easy to describe but difficult to implement with rules, while calling a large remote model for every input introduces repeated cost, latency, and dependency on a provider. We present compile by training, which turns a natural-language specification into a reusable n...

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Left-Sided Pseudomonas Infective Endocarditis Presenting with Septic Shock and Ischemic Stroke in a Non-Injection Drug User Receiving PD-L1 Inhibitor Therapy.
