

一、今日前沿论文精选

1. Vestibular Schwannoma in the Precision Medicine Era: An Updated Narrative Review of Molecular Insights, Imaging Biomarkers, and Evolving Management Strategies.

- 发表期刊 / 影响因子:The journal of international advanced otology
- 发表时间:2026-Aug-26
- 第一/通讯作者:Flavio Donnini, Giovanni Rubino, Giuseppe Battaglia, Pierpaolo Pastina, Marta Vannini
- 核心结论:Vestibular schwannoma (VS) care is increasingly shaped by molecular and imaging advances that complement conventional size- and symptom-based decision-making. Recent multi-omic studies, including single-cell and spatial transcriptomics and methylation profiling, reveal biologically distinct Schwann...
- 原文DOI / 链接:10.65717/iao.2026.262358

2. [177Lu]Lu-PSMA-617 Plus Short-Course Priming With Enzalutamide in Metastatic Castration-Resistant Prostate Cancer: A Single-Arm Phase 2 Trial (Lu-PRIME).

- 发表期刊 / 影响因子:The Prostate
- 发表时间:2026-Sep-13
- 第一/通讯作者:Piyush Aggarwal, Ashwani Sood, Swayamjeet Satapathy, Shikha Goyal, Komalpreet Kaur
- 核心结论:[177Lu]Lu-PSMA-617 has been an approved treatment modality for metastatic castration-resistant prostate cancer (mCRPC). Recent studies have shown PSMA upregulation following enzalutamide, which may enhance the outcomes with [177Lu]Lu-PSMA-617. This study aims to evaluate the efficacy and safety of s...
- 原文DOI / 链接:10.1002/pros.70253

3. Prognostic Value of MRI-Derived Apparent Diffusion Coefficient in Intermediate-Risk Prostate Cancer Treated With Definitive Radiotherapy.

- 发表期刊 / 影响因子:The Prostate
- 发表时间:2026-Sep-13
- 第一/通讯作者:Cem Onal, Gurcan Erbay, Aysenur Elmali, Birhan Demirhan, Ozan Cem Guler
- 核心结论:Intermediate-risk prostate cancer (IR-PCa) is a heterogeneous disease with variable clinical outcomes despite established risk classification. We evaluated whether pretreatment tumor apparent diffusion coefficient (ADC) derived from multiparametric MRI was associated with long-term outcomes and prov...
- 原文DOI / 链接:10.1002/pros.70249

4. Noninvasive surrogate endpoints in MASH trials: current perspectives and challenges.

- 发表期刊 / 影响因子:Hepatology international
- 发表时间:2026-Sep-13
- 第一/通讯作者:Hye Won Lee, Luis Antonio Díaz, Vincent Wai-Sun Wong, Wah Kheong Chan
- 核心结论:Metabolic dysfunction-associated steatohepatitis (MASH) is a leading cause of cirrhosis and liver-related morbidity. Current regulatory pathways rely on histology and long-term clinical outcomes, but repeated liver biopsy is noninvasive and poorly reproducible; regulators have signaled interest in n...
- 原文DOI / 链接:10.1007/s12072-026-11148-7

5. What is the impact of metabolic dysfunction-associated steatotic liver disease (MASLD) on outcomes in people living with chronic hepatitis B (CHB)? An umbrella review protocol.

- 发表期刊 / 影响因子:Wellcome open research
- 发表时间:2026
- 第一/通讯作者:Emily Martyn, Jessica Carter, Maeve Barlow, Flora Olcott, Indrajit Ghosh
- 核心结论:An estimated 254 million people are living with chronic hepatitis B virus (CHB) and 1.6 billion with metabolic dysfunction-associated steatotic liver disease (MASLD) worldwide. CHB remains a major global health challenge, despite a robust vaccine and suppressive antiviral treatment, and MASLD preval...
- 原文DOI / 链接:10.12688/wellcomeopenres.26466.2

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结
