每日医学科研精读日报 | 2026年11月08日

一、今日前沿论文精选

1. Radiotherapy for Cervical Cancer: Technical Advances, Clinical Applications, and Future Perspectives.

- 发表期刊 / 影响因子:The journal of obstetrics and gynaecology research
- 发表时间:2026
- 第一/通讯作者:Hitoshi Maemoto, Takafumi Toita, Akihiro Nishie
- 核心结论:Radiotherapy is an essential treatment modality for cervical cancer and has evolved substantially with advances in image guidance and treatment delivery. This review summarizes recent technological developments in external beam radiotherapy and brachytherapy, their clinical applications, and future…
- 原文DOI / 链接:10.1111/jog.70555

2. Sex-disaggregated Outcomes and Safety Reporting in Perioperative Systemic Therapy for Muscle-invasive Bladder Cancer: A Systematic Review.

- 发表期刊 / 影响因子:European urology oncology
- 发表时间:2026-Nov-06
- 第一/通讯作者:Andrea Mari, Sofia Giudici, Élisabeth Grobet-Jeandin, Francesco Claps, Roberto Contieri
- 核心结论:Sex may influence patients' response to chemotherapy or immunotherapy given before or after radical cystectomy. We reviewed all otherwise eligible prospective perioperative interventional studies, including randomized controlled trials and single-arm studies, to determine how often female enrollment…
- 原文DOI / 链接:10.1016/j.euo.2026.09.003

3. Zanidatamab in the treatment of esophagogastric adenocarcinoma.

- 发表期刊 / 影响因子:Future oncology (London, England)
- 发表时间:2026-Nov-06
- 第一/通讯作者:Orla M Fitzpatrick, Geoffrey Y Ku
- 核心结论:Esophagogastric cancer (EGC) remains a leading cause of cancer-related mortality worldwide. Approximately 15-20% of advanced EGC overexpress human epidermal growth factor receptor 2 (HER2). Since 2010, trastuzumab in combination with platinum and fluoropyrimidine chemotherapy has been the cornerston…
- 原文DOI / 链接:10.1080/14796694.2026.2760738

4. Fasting glucose-to-HDL cholesterol ratio and risk of MASLD in nonobese Chinese adults: A retrospective cohort study.

- 发表期刊 / 影响因子:Medicine
- 发表时间:2026-Nov-06
- 第一/通讯作者:Jian Luo, Zhijie Zhuang, Yingzhu Xiong, Haifeng Zhou, Fang Yi
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is increasingly recognized in nonobese individuals; however, reliable markers for early risk identification remain limited. The fasting glucose-to-high-density lipoprotein cholesterol (FHR) ratio, which reflects integrated glucolipid m…
- 原文DOI / 链接:10.1097/MD.0000000000051474

5. Metabolic syndrome and liver fibrosis in nondiabetic MASLD: A cross-sectional double machine learning study.

- 发表期刊 / 影响因子:Medicine
- 发表时间:2026-Nov-06
- 第一/通讯作者:Van Trung Huynh, Lua Thi Ngo, Hien-Huu Tran
- 核心结论:Metabolic syndrome (MetS) is associated with hepatic fibrosis in metabolic dysfunction-associated steatotic liver disease (MASLD), but whether this association is causal in nondiabetic MASLD has not been assessed with semiparametric causal methods. We analyzed 1306 nondiabetic adults with MASLD from…
- 原文DOI / 链接:10.1097/MD.0000000000051316

6. SwarmEvolve: Latent Agent Swarms for Evolutionary Discovery and Optimization

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-05
- 第一/通讯作者:Qile Jiang, George Em Karniadakis
- 核心结论:LLM-guided evolutionary search uses AI agents to improve programs for mathematical and computational problems by iteratively refining solutions and combining high-scoring methods. However, the process is often slow because the LLM generates a long textual chain of thought for each round and must rep…
- 原文DOI / 链接:https://arxiv.org/abs/2611.08483v1

7. Scientist World: Grow a Research World for AI-Scientists

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-05
- 第一/通讯作者:Taiming Lu, Sachin Konan, Zhuang Liu
- 核心结论:AI-Scientists arrived, but a world for them to grow in did not. Human scientists take theirs for granted – centuries of open problems and shared ideas, waiting in the scientific literature. To AI-Scientists, that world is readable but not runnable, so we build Scientist World for them: every resea…
- 原文DOI / 链接:https://arxiv.org/abs/2611.08478v1

8. User Embeddings are Superpositions of Interpretable Behavioral Modes

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-05
- 第一/通讯作者:Jonathan Kozaczuk, Zheng Dong, Noyan Evirgen, Keivan Majidi, Eddie K. H. Ng

- 核心结论:User embeddings are central components of modern recommendation, personalization, and behavioral modeling systems. Though these embeddings can compactly encode rich behavioral information, they are inherently dense and opaque, limiting interpretability. To address this gap, we argue that user embedd⋯
- 原文DOI / 链接:https://arxiv.org/abs/2611.08487v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Radiotherapy for Cervical Cancer: Technical Advances, Clinical Applications, and Future Perspectives.
