每日医学科研精读日报 | 2026年10月22日

一、今日前沿论文精选

1. Study protocol of a prospective, non-interventional cohort study evaluating the benefits of transjugular intrahepatic portosystemic shunt in patients with hepatocellular carcinoma receiving first-line atezolizumab plus bevacizumab (NISTIPS TRITICC-4, IKF092).

- 发表期刊 / 影响因子:Future oncology (London, England)
- 发表时间:2026-Oct-20
- 第一/通讯作者:Carolin Angendohr, Christian Weigel, Anselm Kunstein, Markus Joerdens, Thorsten Goetze
- 核心结论:Hepatocellular carcinoma (HCC) is a leading cause of cancer-related mortality, with most patients diagnosed at an advanced stage. Atezolizumab plus bevacizumab is a current standard first-line therapy; however, outcomes are strongly influenced by underlying cirrhosis and clinically significant porta…
- 原文DOI / 链接:10.1080/14796694.2026.2748246

2. Calreticulin and myeloproliferative neoplasms: linking biology to targeted therapies.

- 发表期刊 / 影响因子:Expert review of clinical immunology
- 发表时间:2026-Oct-20
- 第一/通讯作者:Lewandowski Krzysztof, Loch Joanna
- 核心结论:Calreticulin (CALR) plays important roles in protein homeostasis, immune responses, and cell signaling. Mutations in the CALR gene drive BCR:ABL1-negative classical myeloproliferative neoplasms (MPNs) through constitutive activation of the thrombopoietin receptor and generate a tumor-specific neoepi…
- 原文DOI / 链接:10.1080/1744666X.2026.2749708

3. Nanoengineered STING agonists for cancer therapy: toward immunodynamic control.

- 发表期刊 / 影响因子:Journal of hematology & oncology
- 发表时间:2026-Oct-20
- 第一/通讯作者:Naimeng Liu, Xiangyu Wang, Wenxiang Zhang, Yonemori Kan, Baranova Madina Petrovna
- 核心结论:Activation of the cyclic GMP-AMP synthase-stimulator of interferon genes (cGAS-STING) pathway is a mechanistically compelling strategy for cancer immunotherapy, but first-generation STING agonists have shown limited clinical activity despite clear pharmacodynamic induction of interferon-related sign…
- 原文DOI / 链接:10.1186/s13045-026-01860-0

4. Convergent Ferroptosis and Pyroptosis in MASLD-Associated Cardiac Remodeling.

- 发表期刊 / 影响因子:Translational research : the journal of laboratory and clinical medicine
- 发表时间:2026-Oct-20
- 第一/通讯作者:Huayang Gui, Xingxing Yuan, Yali Zhang
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) affects ~30% of the global population and is associated with increased risks of heart failure (particularly heart failure with preserved ejection fraction), atrial fibrillation, and cardiovascular mortality. Despite well-established ep…
- 原文DOI / 链接:10.1016/j.trsl.2026.10.007

5. Lycorine ameliorates MASH by targeting ACSL4 to regulate lipid metabolism and inhibit ferroptosis.

- 发表期刊 / 影响因子:Free radical biology & medicine
- 发表时间:2026-Oct-20
- 第一/通讯作者:Fei Yu, Lvjun Zhang, Yanqiu Zhang, Yang Cheng, Yingrong Leng
- 核心结论:Metabolic dysfunction-associated steatohepatitis (MASH), a progressive stage of metabolic dysfunction-associated steatotic liver disease (MASLD), has emerged as one of the most prevalent chronic liver diseases worldwide, yet therapeutic options remain limited. In this study, we found that lycorine e…
- 原文DOI / 链接:10.1016/j.freeradbiomed.2026.10.047

6. The Reflexivity Threshold: A Phase Transition for Multi-Agent Performative Prediction

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-21
- 第一/通讯作者:Ahmed Mahrous, Roberto Di Pietro
- 核心结论:Many learning systems are performative: once deployed, their predictions change the data distribution on which future models are trained. In multi-agent settings, this feedback is routed through a network of interacting learners, so stability depends not only on the strength of performativity but al…
- 原文DOI / 链接:https://arxiv.org/abs/2610.29577v1

7. Stochastic Pruning of the DPO Computation Graph: 1.4x Faster Training and Lower Peak Memory

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-21
- 第一/通讯作者:Yubing Wu, Wei Chen, Junmei Yang, Delu Zeng, Tiewen Pan
- 核心结论:Direct preference optimization (DPO) incurs training costs in output scoring, sequence execution, and backpropagation, so reducing supervision alone does not necessarily save computation. We introduce a unified framework for stochastic pruning of the DPO computation graph that independently samples…
- 原文DOI / 链接:https://arxiv.org/abs/2610.29538v1

8. Near Minimax Rate for Quantile Distributional Reinforcement Learning

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-21
- 第一/通讯作者:Zijie Cheng, Zhihua Zhang

- 核心结论:In this paper, we study quantile distributional policy evaluation, where the return distribution under a given policy is approximated by the quantile Bellman fixed point $\bmη_m$. We investigate the statistical accuracy of estimating $\bmη_m$ across quantile resolutions under Wasserstein distances….
- 原文DOI / 链接:https://arxiv.org/abs/2610.29595v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Study protocol of a prospective, non-interventional cohort study evaluating the benefits of transjugular intrahepatic portosystemic shunt in patients with hepatocellular carcinoma receiving first-line atezolizumab plus bevacizumab (NISTIPS TRITICC-4, IKF092).
