每日医学科研精读日报 | 2026年11月13日

一、今日前沿论文精选

1. Multimodal Deep Learning Prognostic Model for Predicting Treatment Outcomes for Oropharyngeal Carcinoma.

- 发表期刊 / 影响因子:JCO clinical cancer informatics
- 发表时间:2026
- 第一/通讯作者:Simeng Zhu, Marissa Gilbert, Farzan Siddiqui
- 核心结论:Accurate prediction of locoregional recurrence (LRR) in oropharyngeal squamous cell carcinoma (OPSCC) is needed to guide treatment de-escalation decisions, but validated prognostic models integrating imaging and clinical data are lacking. We developed and evaluated a multimodal deep learning model c…
- 原文DOI / 链接:10.1200/CCI-26-00226

2. Second Cancer Risk in Female Survivors of Hodgkin Lymphoma: A National Cohort Analysis Across Treatment Eras.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Nov-12
- 第一/通讯作者:Aislinn Macklin-Doherty, David Cunningham, Ian Chau, Andrew Bates, Kim Benstead
- 核心结论:Subsequent primary malignancies (SPMs) are the leading cause of long-term treatment-related mortality in Hodgkin lymphoma (HL). Although treatments have evolved substantially over recent decades, few studies have demonstrated reductions in SPM risks following modern treatments, nor how such changes…
- 原文DOI / 链接:10.1200/JCO-26-00418

3. Compliance to National Cancer Grid of India Guidelines for Locally Advanced Cervical Cancer: Results From a Multicentric Observational Cohort in India.

- 发表期刊 / 影响因子:JCO global oncology
- 发表时间:2026
- 第一/通讯作者:Supriya Chopra, Varsha Hande, Ankita Gupta, Bhavana Rai, Smita Bansode
- 核心结论:Cervical cancer is a major cause of mortality among Indian women. Concurrent chemoradiation and brachytherapy is the standard care for locally advanced cancer. This multi-institutional implementation audit evaluated adherence to National Cancer Grid (NCG)-recommended treatment guidelines. In the fir…
- 原文DOI / 链接:10.1200/GO-26-00179

4. Premature immune aging in obesity: a testable framework linking immunosenescence, metaflammation, and multiorgan dysfunction.

- 发表期刊 / 影响因子:Immunologic research
- 发表时间:2026-Nov-12
- 第一/通讯作者:Seerwan Hamadameen Sulaiman, Rebaz Anwar Omer, Hunar Yasin Muhammad, Amjad Mahmood Qadir, Hemn A H Barzani
- 核心结论:Obesity is a chronic immunometabolic disorder associated with alterations in biological aging pathways and increased risks of type 2 diabetes mellitus, cardiovascular disease, metabolic dysfunction-associated steatotic liver disease, chronic kidney disease, neurodegeneration, and cancer. Obesity and…
- 原文DOI / 链接:10.1007/s12026-026-09877-w

5. A pilot study on the impact of Hydroxiram D supplementation on nutritional status and sarcopenia-related parameters.

- 发表期刊 / 影响因子:Journal of physiology and biochemistry
- 发表时间:2026-Nov-12
- 第一/通讯作者:Paolo Gallo, Valentina Flagiello, Simone Di Cola, Lucrezia Santoro, Dafne Marcelli
- 核心结论:Sarcopenia is a frequent and prognostically relevant complication of chronic liver disease. The SARCIRAM pilot trial investigated the effect of Hydroxiram D, a formulation of branched-chain amino acids (BCAAs), β-hydroxy-β-methylbutyrate (HMB), and vitamin D, on nutritional status and sarcopenia-rel…
- 原文DOI / 链接:10.1007/s13105-026-01253-4

6. TraceKV: Policy-Preserving Low-Rank KV Cache Compression for Reasoning Vision-Language Models

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-11
- 第一/通讯作者:Ke Li, Zishan Shao, Yiran Chen
- 核心结论:Reasoning vision-language models (VLMs) impose substantial KV cache demands from both large multimodal contexts and growing reasoning traces. Low-rank KV compression has emerged as a promising paradigm that stores low-dimensional latents of KV states and can be combined with quantization. However, e…
- 原文DOI / 链接:https://arxiv.org/abs/2611.15569v1

7. Testing Conversation Preservation Across LLM APIs: A Rule-Based Oracle for Detecting Silent Information Loss

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-11
- 第一/通讯作者:Xin Liu, Xu Han, Yuxin Wang, Haoran Song, Mingjian Zhao
- 核心结论:LLM applications increasingly rely on translators and compatibility layers to move conversations across APIs. Yet a translated request can be accepted by the target API while silently losing information about instruction roles, tool interactions, error states, or generation controls. We introduce is…
- 原文DOI / 链接:https://arxiv.org/abs/2611.15543v1

8. Learning a calibrated decision head from logged bandit feedback

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-11
- 第一/通讯作者:Ye Yuan
- 核心结论:A decision head reads a state and a list of options and returns a probability per option in one forward pass. Once deployed, it usually observes only whether the option it chose was right: logged bandit feedback. We adapt such a head, LoRA on Qwen3-0.6B-Base and 1.7B-Base, from that feedback and rep…
- 原文DOI / 链接:https://arxiv.org/abs/2611.15572v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Multimodal Deep Learning Prognostic Model for Predicting Treatment Outcomes for Oropharyngeal Carcinoma.
