

一、今日前沿论文精选

1. Bacterial RNA downregulates MHC-I in tumor cell lines, promoting NK response and delaying tumor growth.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Agustina Serafino, Mónica Vermeulen, Yasmín A Bertinat, Federico Birnberg-Weiss, Joselyn E Castro
- 核心结论:Immunotherapy has introduced a new era in cancer treatment. The clinical goal of cancer immunotherapy is to prime the host immune system to provide passive or active immunity against malignant tumors. We have previously demonstrated that Brucella abortus (Ba) RNA downregulates IFN- $\gamma$ -induced MHC-I su...
- 原文DOI / 链接:10.1371/journal.pone.0357999

2. Effect of demographic characteristics on the outcome of prostate cancer salvage radiotherapy: Analysis from a randomized controlled trial.

- 发表期刊 / 影响因子:Cancer
- 发表时间:2026-Sep-15
- 第一/通讯作者:Ismaheel O Lawal, Ashesh B Jani, Subir Goyal, Olayinka Abiodun-Ojo, Vishal Dhare
- 核心结论:This study investigated the impact of advanced molecular imaging, race, socioeconomic status, and metabolic dysregulation on the outcome of salvage radiotherapy (sRT) for prostate cancer recurrence in a clinical trial setting. The authors randomized post-prostatectomy men with detectable prostate-sp...
- 原文DOI / 链接:10.1002/cncr.70602

3. Regulation of immune signal integration and memory by inflammation-induced chromosome conformation.

- 发表期刊 / 影响因子:Proceedings of the National Academy of Sciences of the United States of America
- 发表时间:2026-Sep-22
- 第一/通讯作者:Bence Daniel, Andy Y Chen, Katalin Sandor, Wenxi Zhang, Zhuang Miao
- 核心结论:Three-dimensional (3D) genome conformation is central to gene expression regulation, yet our understanding of its contribution to rapid transcriptional responses, signal integration, and memory in immune cells is limited. Here, we study the molecular regulation of the inflammatory response in primar...
- 原文DOI / 链接:10.1073/pnas.2600693123

4. Modelling the impact of physical activity on MASLD in Saudi Arabia.

- 发表期刊 / 影响因子:PloS one
- 发表时间:2026
- 第一/通讯作者:Carolyn Wallace, Saleh A Alessy, Faisal Abaalkhail, Saad Alghamdi, Assim A Alfadda
- 核心结论:Insufficient physical activity contributes to the global rise of metabolic dysfunction-associated steatotic liver disease (MASLD). Although physical activity levels in Saudi Arabia have increased in recent years, MASLD shows an increasing prevalence trend, affecting over 30% of the population. This...
- 原文DOI / 链接:10.1371/journal.pone.0354332

5. Sequential liraglutide and setmelanotide therapy in Bardet-Biedl Syndrome: metabolic and renal outcomes in a real-world case report and literature review.

- 发表期刊 / 影响因子:Nephron
- 发表时间:2026-Sep-15
- 第一/通讯作者:Tommasso Pasquariello, Floriana Secondulfo, Anna Rita Roscini, Elisabetta Nardi, Enrico Prosperi
- 核心结论:Bardet-Biedl syndrome (BBS) is a syndromic ciliopathy characterized by multiple clinical features, including obesity and kidney disease. Therapeutic options remain limited. Setmelanotide, a melanocortin-4 receptor (MC4R) agonist, is approved for obesity in BBS, but real-world data in adults is scarc...
- 原文DOI / 链接:10.1159/nef/adtag006

6. Corrupt Plans, Clean Traces: Evading Chain-of-Thought Monitoring with Plan Injection

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-14
- 第一/通讯作者:Keertana Chidambaram, Andrew Ilyas, Vasilis Syrgkanis
- 核心结论:Chain-of-thought (CoT) monitoring is a safety strategy where the reasoning of a large language model “actor” is inspected by a “monitor” (often another language model) for signs of unsafe planning, deception, or misalignment. We find that planting harmful but benign-sounding reasoning in the actor’ s...
- 原文DOI / 链接:https://arxiv.org/abs/2609.15989v1

7. Stellar Colosseum: A Many-Agent Harness for Long-Horizon Research in Mathematics and Theoretical Computer Science

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-14
- 第一/通讯作者:Honghao Lin, David P. Woodruff, Yuan Deng, Jieming Mao, Song Zuo
- 核心结论:Language models can produce plausible short proofs, but may still be unreliable on long-horizon research problems, where progress depends on a sequence of uncertain and interdependent decisions. We introduce Stellar Colosseum, a model-agnostic harness for allocating inference across research in math...
- 原文DOI / 链接:https://arxiv.org/abs/2609.15983v1

8. Bellman Policy Optimization

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-14
- 第一/通讯作者:Zhaoqing Song, Haotian Xu, Xikun Zhang, Lidong Bing

- 核心结论:Reinforcement learning with verifiable rewards (RLVR) improves the reasoning capabilities of large language models (LLMs). We introduce Bellman Policy Optimization (BPO), a critic-free method derived from Policy Mirror Descent (PMD). For autoregressive generation with terminal rewards, BPO uses the...
- 原文DOI / 链接:<https://arxiv.org/abs/2609.15987v1>

## 二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

## 三、每日高分经典精读

**Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.**

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

## 四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Bacterial RNA downregulates MHC-I in tumor cell lines, promoting NK response and delaying tumor growth.
