

一、今日前沿论文精选

1. Association Between Japan’ s COVID-19 State of Emergency Declarations and Hospitalizations for Radiotherapy for Cervical Cancer.

- 发表期刊 / 影响因子:The Tohoku journal of experimental medicine
- 发表时间:2026-Aug-27
- 第一/通讯作者:Yoko Aoyama, Fumio Watanabe, Kei Tokutsu, Keiji Muramatsu, Makoto Okawara
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1620/tjem.2026.J096

2. Esophageal cancer-associated thoracic central venous obstruction type 2 which occurred during chemoradiotherapy.

- 发表期刊 / 影响因子:Internal medicine (Tokyo, Japan)
- 发表时间:2026-Aug-25
- 第一/通讯作者:Yoshiki Tokunaga, Kohei Hayashi, Rie Uehara, Amane Jubashi, Tomonori Araki
- 核心结论:Thoracic central venous obstruction (TCVO) can cause facial and upper extremity edema and it is often associated with malignancies. We herein report a rare case of cervical esophageal squamous cell carcinoma complicated by TCVO type 2 during chemoradiotherapy. Approximately 1 week after starting 5-f...
- 原文DOI / 链接:10.2169/internalmedicine.8011-26

3. The 24-mo Outcomes from the Noninferiority Randomised Controlled Trial of Surgery for Men with Urodynamic Stress Incontinence After Prostate Surgery (MASTER).

- 发表期刊 / 影响因子:European urology focus
- 发表时间:2026-Aug-26
- 第一/通讯作者:Lynda Constable, Marcus J Drake, David Cooper, Graeme MacLennan, Chris Harding
- 核心结论:The artificial urinary sphincter (AUS) is the most common surgical procedure for persistent stress urinary incontinence (SUI) after prostate surgery, whereas the male sling is a newer alternative. To compare the 24-mo outcomes of the sling versus the AUS. This was an unblinded, noninferiority random...
- 原文DOI / 链接:10.1016/j.euf.2026.07.012

4. Bifidobacterium breve CBT BR3 and Lactiplantibacillus plantarum CBT LP3 Alleviate Hepatic Steatosis by Suppressing Hepatic Lipogenesis and Improving Metabolic Hormone Profiles In Vitro and In Vivo.

- 发表期刊 / 影响因子:Journal of microbiology and biotechnology
- 发表时间:2026-Aug-12
- 第一/通讯作者:Yeongju Yeo, Jong Won Kim, Yusook Chung, Gyeyeong Kong, Misun Yun
- 核心结论:Hepatic steatosis is an early key event in metabolic dysfunction-associated steatotic liver disease, for which safe and effective interventions for reducing hepatic lipid accumulation are needed. To this end, we investigated the anti-steatotic effect of combining probiotics Bifidobacterium breve BR3...
- 原文DOI / 链接:10.4014/jmb.2604.04074

5. Role of Liver Connexins and Pannexins in the Development of Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD) in the context of Overnutrition: A Narrative Review.

- 发表期刊 / 影响因子:Molecular and cellular endocrinology
- 发表时间:2026-Aug-26
- 第一/通讯作者:Juan Pablo Bravo-Novoa, Ramón Norambuena-González, Matías Quiñones San Martín, Jorge E Contreras, Daniel R González
- 核心结论:Liver function is critical for maintenance of body homeostasis since it regulates several metabolic processes, including glucose and fatty acids metabolism. Metabolic and nutritional altered states such as obesity, insulin resistance and diabetes negatively impact the liver leading to a condition te...
- 原文DOI / 链接:10.1016/j.mce.2026.112897

6. VBVR-Pro: A Scalable and Verifiable Suite for Native Visual Reasoning

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-26
- 第一/通讯作者:Junxiang Xu, Ruisi Wang, Fanyi Pu, Maijunxian Wang, Ran Ji
- 核心结论:Native visual reasoning treats visual generation as the medium of reasoning itself: visual states (i.e. images and videos) are not merely inputs to be understood or outputs to be rendered, but first-class substrates for problem solving beyond language. Yet progress remains bottlenecked by the lack o...
- 原文DOI / 链接:https://arxiv.org/abs/2608.26105v1

7. A Visual Dependence-Aware Framework for Multimodal Unsupervised Continual Post-Training

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-26
- 第一/通讯作者:Kaichen Li, Zhilin Zhu, Jianhao Huang, Zhengqin Lai, Baochen Xiong
- 核心结论:In this paper, we explore a novel task of Multimodal Unsupervised Continual Post-Training (MU-CPT), enabling deployed MLLMs to continually evolve from streaming unlabeled data. Existing unsupervised post-training methods for MLLMs typically optimize target tokens uniformly, overlooking their heterog...
- 原文DOI / 链接:https://arxiv.org/abs/2608.26095v1

8. VBVR-Pro: A Scalable and Verifiable Suite for Native Visual Reasoning

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-26

- 第一/通讯作者:Junxiang Xu, Ruisi Wang, Fanyi Pu, Maijunxian Wang, Ran Ji
- 核心结论:Native visual reasoning treats visual generation as the medium of reasoning itself: visual states (i.e. images and videos) are not merely inputs to be understood or outputs to be rendered, but first-class substrates for problem solving beyond language. Yet progress remains bottlenecked by the lack o...
- 原文DOI / 链接:<https://arxiv.org/abs/2608.26105v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Association Between Japan’ s COVID-19 State of Emergency Declarations and Hospitalizations for Radiotherapy for Cervical Cancer.
