每日医学科研精读日报 | 2026年11月12日

一、今日前沿论文精选

1. Perioperative Apalutamide in High-Risk Localized Prostate Cancer.

- 发表期刊 / 影响因子:The New England journal of medicine
- 发表时间:2026-Nov-12
- 第一/通讯作者:Mario Terlizzi, Olivier De Hertogh, Paul Sargos
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1056/NEJMc2611613

2. Bacteroidetes promote hepatocellular carcinoma progression and resistance to immunotherapy.

- 发表期刊 / 影响因子:Hepatology communications
- 发表时间:2026-Dec-01
- 第一/通讯作者:Marina Barcena-Varela, Joan Shang, Anthony Lozano, Ilaria Mogno, Ian Liebling
- 核心结论:Growing evidence highlights the gut microbiome’ s critical role in tumorigenesis and immunotherapy response. However, the impact of gut microbes on hepatocellular carcinoma (HCC) progression and response to immune checkpoint blockade (ICB) remains unclear due to the lack of combined preclinical and c…
- 原文DOI / 链接:10.1097/HC9.0000000000001086

3. The pore-forming protein APOL7C ruptures Leishmania major-containing parasitophorous vacuoles in dendritic cells to promote IL-12 production and the induction of T helper type 1 immunity.

- 发表期刊 / 影响因子:PLoS pathogens
- 发表时间:2026-Nov-11
- 第一/通讯作者:Gerone Gonzales, Liam Wilkinson, Eymi Cedeño, Song Huang, Cassandra M Wood
- 核心结论:Classical dendritic cells (cDCs) are required for the efficient priming of T helper type 1 (Th1) immunity against Leishmania major infections in mice. They do so by producing large quantities of IL-12 in response to L. major infection. IL-12 in turn supports the generation of protective CD4+ Th1 cel…
- 原文DOI / 链接:10.1371/journal.ppat.1013844

4. Variability in non-invasive tests: Challenges and implications for monitoring liver disease.

- 发表期刊 / 影响因子:Hepatology communications
- 发表时间:2026-Dec-01
- 第一/通讯作者:Georg Semmler, Katrine Prier Lindvig, Lucie Simonis, Jan Embacher, Philipp Hruska
- 核心结论:Diagnostic and prognostic non-invasive fibrosis tests (NITs) are increasingly repurposed to monitor liver disease. However, their reproducibility and the minimal detectable change (MDC, ie, the smallest change that exceeds expected measurement variability) are poorly characterized. We retrospectivel…
- 原文DOI / 链接:10.1097/HC9.0000000000001077

5. Polyamine Dysregulation in Metabolic Dysfunction-associated Steatotic Liver Disease: a Systematic Review of Human Observational Evidence.

- 发表期刊 / 影响因子:Current obesity reports
- 发表时间:2026-Nov-11
- 第一/通讯作者:Alicia González-González, Lucía Aránega-Martín, Kamar Ouahbi-Chadli, Miguel Jiménez-Pérez, Bruno Ramos-Molina
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) is the most prevalent chronic liver disease worldwide and is closely associated with obesity, insulin resistance, and increased cardiovascular risk. Polyamines have emerged as potential regulators of metabolic and inflammatory pathways…
- 原文DOI / 链接:10.1007/s13679-026-00774-9

6. Medical Image Segmentation: Foundation Model Adaptation versus Task-Specific Training

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-10
- 第一/通讯作者:Emre Kutlusan, Yongmin Li
- 核心结论:Foundation models pretrained on large natural-image collections are increasingly adapted for medical image segmentation, in the expectation that they will replace models trained for each task. Most comparisons, however, use data from the training distribution and a single task-specific baseline whos…
- 原文DOI / 链接:https://arxiv.org/abs/2611.14519v1

7. Toward Foundation Detection Models via Example-Based Grounding in EM-DETR

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-10
- 第一/通讯作者:Sheethal Bhat, Bogdan Georgescu, Awais Mansoor, Florin C. Ghesu, Sasa Grbic
- 核心结论:DeepLearning (DL)-based Computer-Aided Diagnostic (CAD) systems have shown great promise in supporting clinicians, but their performance heavily depends on the availability of large, well-annotated datasets. In medical lesion detection, the scarcity of comprehensive, stan dardized annotations and th…
- 原文DOI / 链接:https://arxiv.org/abs/2611.14518v1

8. TorchCurves: Differentiable Parametric Curves

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-10
- 第一/通讯作者:Alex Shtoff
- 核心结论:We present TorchCurves, a PyTorch library that treats vector-valued parametric curves as learnable primitives. Its central operation maps batches of

scalar inputs to points on curves represented in B-spline or Legendre polynomial bases, with differentiation through both inputs and coefficients. Curv…

- 原文DOI / 链接:https://arxiv.org/abs/2611.14516v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Perioperative Apalutamide in High-Risk Localized Prostate Cancer.

日报自动生成于 2026年11月12日 | 数据来源:PubMed、arXiv | 下一期:明日7:00
