

一、今日前沿论文精选

1. Factors Associated With Receipt of Adjuvant Radiation in Locally Advanced Rectal Cancer.

- 发表期刊 / 影响因子:Journal of surgical oncology
- 发表时间:2026-Sep-06
- 第一/通讯作者:Maryam Sherwani, Danish Ali, Hanjoo Lee, Alexander T Hawkins, Aimal Khan
- 核心结论:Neoadjuvant radiotherapy (RT) has been the standard of care for locally advanced rectal cancer (LARC) for over two decades. Adjuvant RT use in LARC represents a deviation from standard care and warrants further investigation. To identify factors associated with adjuvant RT utilization. We hypothesiz...
- 原文DOI / 链接:10.1002/jso.70365

2. Lactate-associated H3K18la upregulates RNF166 to promote immune evasion in hepatocellular carcinoma by remodeling c-Jun ubiquitination.

- 发表期刊 / 影响因子:Apoptosis : an international journal on programmed cell death
- 发表时间:2026-Sep-06
- 第一/通讯作者:Bingyi Ren, Yichen Yang, Kai Sheng, Qiuyu Mu, Zhiyuan Bai
- 核心结论:Hepatocellular carcinoma (HCC) is a leading cause of cancer-related mortality, and PD-L1-mediated immune evasion is a major mechanism of tumor immune suppression and an important target of immune checkpoint blockade. Here, we identified RNF166 as an E3 ubiquitin ligase that promotes immune evasion i...
- 原文DOI / 链接:10.1007/s10495-026-02435-7

3. Regulatory roles of pyroptosis-associated lncRnas in breast cancer progression and immune microenvironment.

- 发表期刊 / 影响因子:Cell cycle (Georgetown, Tex.)
- 发表时间:2026
- 第一/通讯作者:Chou-Yi Hsu, Bilal AbdulMajeed Mukhlif, Ozodbek Nematov, Ibrokhim Sapaev, Mirza R Baig
- 核心结论:Breast cancer progression and therapeutic response are profoundly influenced by tumor immune interactions, yet the molecular regulators linking cell death pathways with immune modulation remain incompletely understood. Pyroptosis, a gasdermin-mediated inflammatory form of programmed cell death, has...
- 原文DOI / 链接:10.1080/15384101.2026.2726656

4. Revealing the Shared Genetic Architecture of Metabolic Dysfunction-Associated Steatotic Liver Disease-Related Traits Through Genomic Structural Equation Modeling.

- 发表期刊 / 影响因子:Genetic epidemiology
- 发表时间:2026
- 第一/通讯作者:Hao Dong, Yufeng Li, Qiang Ding, Miaoxin Zhang, Shuaipeng Gu
- 核心结论:Although individual traits related to metabolic dysfunction-associated steatotic liver disease (MASLD) have been investigated through large-scale genome-wide association studies (GWASs), the shared genetic susceptibility across these traits remains unclear. We therefore conducted a multivariate GWAS...
- 原文DOI / 链接:10.1002/gepi.70055

5. A community-based screening programme to detect non-alcoholic fatty liver using FibroScan among healthy Indian adults.

- 发表期刊 / 影响因子:Bioinformation
- 发表时间:2026
- 第一/通讯作者:Singhai Abhishek, Joshi Rajnish, Yadav Vikas, Ingle Vaibhav, Manoria Piyush
- 核心结论:Non-alcoholic fatty liver disease (NAFLD) remains substantially underdiagnosed in the general Indian population despite its rapidly increasing burden and close association with metabolic disorders. Therefore, it is of interest to evaluate the prevalence of NAFLD among Indian adults. Hence, 490 parti...
- 原文DOI / 链接:10.6026/973206300223332

6. Compile by Training: Turning Natural-Language Specifications into Local Neural Functions

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-03
- 第一/通讯作者:Yuntian Deng, Pengyu Nie, Stuart Shieber
- 核心结论:Many recurring text functions are easy to describe but difficult to implement with rules, while calling a large remote model for every input introduces repeated cost, latency, and dependency on a provider. We present compile by training, which turns a natural-language specification into a reusable n...
- 原文DOI / 链接:https://arxiv.org/abs/2609.04199v1

7. Clean Engineering, Unstable Measurement: A Preregistered Reliability Failure of Black-Box LLM Observers on Shared Endpoints

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-03
- 第一/通讯作者:Haoyaun Zhu, Jie Zhang
- 核心结论:Language-model judges now gate training data, score generations, and drive leaderboards. The judge is then a measurement instrument, resting on one rarely stated assumption: the same request, sent to the same model name, reads the same tomorrow. We audited that assumption in two preregistered campai...
- 原文DOI / 链接:https://arxiv.org/abs/2609.04198v1

8. Compile by Training: Turning Natural-Language Specifications into Local Neural Functions

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-09-03
- 第一/通讯作者:Yuntian Deng, Pengyu Nie, Stuart Shieber
- 核心结论:Many recurring text functions are easy to describe but difficult to implement with rules, while calling a large remote model for every input introduces repeated cost, latency, and dependency on a provider. We present compile by training, which turns a natural-language specification into a reusable n...

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Factors Associated With Receipt of Adjuvant Radiation in Locally Advanced Rectal Cancer.
