每日医学科研精读日报 | 2026年10月18日

一、今日前沿论文精选

1. Peripheral neuron circuitry mediating pain in head and neck cancer.

- 发表期刊 / 影响因子:Current opinion in supportive and palliative care
- 发表时间:2026-Oct-09
- 第一/通讯作者:Gaurav Sharma, Shivani Ruparel
- 核心结论:Pain is a major source of morbidity in head and neck cancer (HNC), yet its neural mechanisms remain incompletely defined. This review examines how malignant cells, the tumor microenvironment, and cancer treatment remodel peripheral sensory and autonomic circuits, and how neural activity reciprocally…
- 原文DOI / 链接:10.1097/SPC.0000000000000829

2. IL-12-producing iPSC-derived antigen-presenting cells enhance antitumor immunity and enable off-the-shelf immunotherapy.

- 发表期刊 / 影响因子:Molecular therapy : the journal of the American Society of Gene Therapy
- 发表时间:2026-Oct-16
- 第一/通讯作者:Masateru Yamamoto, Rong Zhang, Tsuyoshi Kobayashi, Yilan Li, Huaigeng Xu
- 核心结论:Effective activation of cancer-reactive T cells by antigen-presenting cells (APCs) is essential for tumor elimination. However, dendritic cell (DC)-based cancer vaccines often yield inconsistent clinical outcomes due to patient-dependent variability. We established IL-12-producing proliferative myel…
- 原文DOI / 链接:10.1016/j.ymthe.2026.10.017

3. Presumed oxaliplatin-related Guillain-Barré syndrome: A case report and review of chemotherapy-related Guillain-Barré syndrome.

- 发表期刊 / 影响因子:Medicine
- 发表时间:2026-Oct-16
- 第一/通讯作者:Sikander Chohan, Muhammad Wasif Saif
- 核心结论:Oxaliplatin, a platinum-based chemotherapeutic widely used in colorectal, hepatobiliary, and pancreatic malignancies, commonly causes a symmetric, cold-induced sensory neuropathy. Rarely, it has been linked to immune-mediated Guillain-Barré Syndrome (GBS), which can be misattributed to drug-induced…
- 原文DOI / 链接:10.1097/MD.0000000000051121

4. Hepatic Progenitor Cells and the Ductular Reaction: Pathophysiological Role in the Progression of Liver Disease.

- 发表期刊 / 影响因子:Liver international : official journal of the International Association for the Study of the Liver
- 发表时间:2026
- 第一/通讯作者:Pingping Wang, Mengjia Li, Ziqi Zhou, Ke Luo, Yinan Lu
- 核心结论:Ductular reaction (DR), a defining histological hallmark of diverse acute and chronic liver injuries, is fundamentally driven by the activation of hepatic progenitor cells (HPCs) and their complex, spatiotemporal bidirectional crosstalk within the hepatic niche. As bipotent precursor cells, HPCs ini…
- 原文DOI / 链接:10.1111/liv.70935

5. Metabolic Dysfunction-Associated Fatty Liver Disease-Cardiovascular-Kidney-Metabolic (MAFLD-CKM): A Modified Framework to Predict Long-Term Mortality.

- 发表期刊 / 影响因子:Medical science monitor : international medical journal of experimental and clinical research
- 发表时间:2026-Oct-17
- 第一/通讯作者:Alaa M Mostafa, Yasser Fouad, Eman Abdelsameea, Reem Ezzat Mahdy, Ziayn Pan
- 核心结论:BACKGROUND Cardiovascular-kidney-metabolic (CKM) syndrome reframes cardio-renal-metabolic risk but omits hepatic dysfunction, particularly metabolic dysfunction-associated fatty liver disease (MAFLD). This study assesses whether integrating MAFLD into the CKM framework improves mortality risk discri…
- 原文DOI / 链接:10.12659/MSM.954116

6. LIBERO-PeRM: Benchmarking Personalized Robotic Manipulation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-15
- 第一/通讯作者:Zhixu Li, Keqian Tang, Litian Gong, Jingyu Yao, Wenqian Zhang
- 核心结论:Personalization is essential for general-purpose robots to transition into household environments and achieve true practicality. While general robotic manipulation has been extensively studied, personalized robotic manipulation (PeRM) lacks a controlled benchmark for separating task completion from…
- 原文DOI / 链接:https://arxiv.org/abs/2610.22372v1

7. Discovering state-of-the-art quantum circuits with large language models

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-15
- 第一/通讯作者:Andi Gu, Alek H. Kemeny, Susanne F. Yelin, Mikhail D. Lukin
- 核心结论:Significant efforts are currently being directed toward the implementation of large-scale quantum information processors, but realizing useful quantum advantage also requires the development of efficient quantum algorithms. While for many practical problems the dominant resource costs are associated…
- 原文DOI / 链接:https://arxiv.org/abs/2610.22367v1

8. LIBERO-PeRM: Benchmarking Personalized Robotic Manipulation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-15

- 第一/通讯作者:Zhixu Li, Keqian Tang, Litian Gong, Jingyu Yao, Wenqian Zhang
- 核心结论:Personalization is essential for general-purpose robots to transition into household environments and achieve true practicality. While general robotic manipulation has been extensively studied, personalized robotic manipulation (PeRM) lacks a controlled benchmark for separating task completion from…
- 原文DOI / 链接:https://arxiv.org/abs/2610.22372v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Peripheral neuron circuitry mediating pain in head and neck cancer.

日报自动生成于 2026年10月18日 | 数据来源:PubMed、arXiv | 下一期:明日7:00
