

一、今日前沿论文精选

1. The FOXQ1/SSBP2 Regulatory Axis Drives Malignant Progression of Melanoma.

- 发表期刊 / 影响因子:Molecular carcinogenesis
- 发表时间:2026-Aug-30
- 第一/通讯作者:Xiaoyu Zhang, Yu Hou, Jiahui Liu, Yuehua Han, Jiangang Feng
- 核心结论:Melanoma is a highly aggressive skin cancer with poor prognosis, often linked to excessive UV exposure. Despite advancements in immunotherapy and targeted treatments, melanoma's invasiveness and metastatic potential remain significant challenges. This study aimed to identify novel molecular targets...
- 原文DOI / 链接:10.1002/mc.70126

2. IMRT planning quality under a single full-time radiation oncologist supported by structured remote peer review and planning assistance versus the two-oncologist standard: the REMOTE-IMRT prospective, pair-matched, multi-institutional trial.

- 发表期刊 / 影响因子:Japanese journal of radiology
- 发表时间:2026-Aug-30
- 第一/通讯作者:Masahide Saito, Keiichi Jingu, Naoki Tohyama, Hikaru Nemoto, Takayuki Kanai
- 核心结论:To determine whether intensity-modulated radiation therapy (IMRT) plan quality under a proposed facility standard of one full-time radiation oncologist supported by structured remote or part-time peer review and mandatory planning assistance is comparable to Japan's current standard requiring two full-time oncologists...
- 原文DOI / 链接:10.1007/s11604-026-02068-5

3. Early effects of X-ray irradiation on rat incisor periodontal ligament morphology and MMP-2 expression.

- 发表期刊 / 影响因子:Journal of molecular histology
- 发表时间:2026-Aug-30
- 第一/通讯作者:Amanda Regina Fischborn, Letícia Sartor, Nadia Faye Omar, Jose Rosa Gomes
- 核心结论:Radiotherapy is an effective treatment for head and neck cancer; however, it also induces alterations in healthy oral tissues. Although late radiation-induced damage has been extensively investigated, the early progression of morphological and extracellular matrix changes in the periodontal ligament...
- 原文DOI / 链接:10.1007/s10735-026-10949-2

4. Association Between Iron Metabolism and Microalbuminuria in Patients With Type 2 Diabetes Mellitus and MASLD.

- 发表期刊 / 影响因子:International journal of endocrinology
- 发表时间:2026
- 第一/通讯作者:Huanjia Qu, Lingling Zhou, Jinhua Hu, Dong Tang, Lu Yang
- 核心结论:To investigate the association between iron metabolism markers and microalbuminuria in patients with Type 2 diabetes mellitus (T2DM) and metabolic dysfunction-associated steatotic liver disease (MASLD). A total of 137 patients with T2DM and MASLD were enrolled and stratified into microalbuminuria-positive and negative groups...
- 原文DOI / 链接:10.1155/ije/8147661

5. Odds for Presence of Metabolic Dysfunction Associated Steatotic Liver Disease (MASLD) in Individuals with Reported Hepatic Steatosis on Ultrasound.

- 发表期刊 / 影响因子:Pakistan journal of medical sciences
- 发表时间:2026
- 第一/通讯作者:Pawan Kumar, Tazeen Rasheed, Faiza Sadaqat Ali, Bader Faiyaz Zuberi
- 核心结论:To calculate Odds Ratio for Metabolic Dysfunction Associated Steatotic Liver Disease (MASLD) in individuals with hepatic steatosis on ultrasound examination. This case-control study was conducted in Department of Medicine, Dr. Ruth KM Pfau, Civil Hospital Karachi, Pakistan during the period 16th May...
- 原文DOI / 链接:10.12669/pjms.42.8.11294

6. COVER: Identifiable Evaluation of Coalition Routing

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-28
- 第一/通讯作者:Raghul Sugumar, Amrit Gopinath
- 核心结论:When a multi-agent system changes its team, it also changes the messages and final answer it produces, so an end-to-end accuracy gap does not by itself identify a routing effect. We introduce method, an evaluation contract that fixes a public information boundary, downstream stack G, and finite legal actions...
- 原文DOI / 链接:https://arxiv.org/abs/2608.28475v1

7. Real-time virtual circuits for plasma shape control via neural network emulators: experimental demonstration on MAST Upgrade

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-28
- 第一/通讯作者:Nicola C. Amorisco, Kamran Pentland, Adriano Agnello, George K. Holt, Alasdair Ross
- 核心结论:Conventional plasma shape control in tokamaks relies on virtual circuits (VCs) that are computed offline from linearisations around a small, tailored number of reference equilibria, and deployed as expertly prepared schedules during the discharge. Here, we report on the first experimental deployment...
- 原文DOI / 链接:https://arxiv.org/abs/2608.28468v1

8. Acquire, Repair, Preserve: A Diagnosis-Guided Post-Training Recipe for Small-Model Dialogue Game Agents

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-08-28

- 第一/通讯作者:Nan Li
- 核心结论:Interactive dialogue games test a capability that static benchmarks largely leave implicit: a model must carry state across turns, interpret feedback, and choose valid actions under changing constraints. We study this setting in the LM Playschool Challenge with a 2B open-weight model, and find that…
- 原文DOI / 链接:<https://arxiv.org/abs/2608.28458v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:The FOXQ1/SSBP2 Regulatory Axis Drives Malignant Progression of Melanoma.
