

一、今日前沿论文精选

1. CT-Derived Body Composition and Early Changes Predict Outcomes of First-Line Chemo-Immunotherapy in Recurrent/Metastatic Nasopharyngeal Carcinoma.

- 发表期刊 / 影响因子:The oncologist
- 发表时间:2026-Sep-03
- 第一/通讯作者:Xia Gan, Zhengzheng Yu, Yaning Tang, Lin Zhang, Wenji Xie
- 核心结论:Reliable biomarkers for risk stratification and treatment monitoring in recurrent/metastatic nasopharyngeal carcinoma (R/M NPC) treated with first-line chemo-immunotherapy remain limited. This study evaluated the prognostic value of baseline computed tomography (CT)-derived body composition paramete...
- 原文DOI / 链接:10.1093/oncolo/oyag355

2. Long-term outcomes and patterns of failure in patients with thymic malignancies treated with surgery and radiation therapy.

- 发表期刊 / 影响因子:Cancer
- 发表时间:2026-Sep-15
- 第一/通讯作者:Oded Icht, Inbar Nardi-Agmon, Paaladinesh Thavendiranathan, Shaf Keshavjee, Amiya Agrawal
- 核心结论:The role of peri-operative radiation therapy in thymic epithelial tumors remains controversial, and randomized data are lacking. The authors evaluated recurrence patterns, pathologic predictors of recurrence, and long-term survival among patients who underwent surgery and received peri-operative rad...
- 原文DOI / 链接:10.1002/cncr.70595

3. Tumor-derived antioxidants suppress immunity by depriving T cells of reactive oxygen species.

- 发表期刊 / 影响因子:Science (New York, N.Y.)
- 发表时间:2026-Sep-03
- 第一/通讯作者:Alexander J Wesolowski, Ardon M Pillay, Panagiota Vardaka, Rabab Nasrallah, Randy Greaves
- 核心结论:Reactive oxygen species (ROS) promote genomic instability and fuel oncogenic signaling in cancer, but antioxidant therapies have so far failed to improve, or worsen, cancer outcomes. Emerging data suggest that T cells depend on ROS for signal transduction. In this study, we show that tumors exploit...
- 原文DOI / 链接:10.1126/science.adz8203

4. Dietary Citrus Flavonoid Hesperetin Attenuates Metabolic Dysfunction-Associated Steatotic Liver Disease via Modulation of MAPK-RARα Axis.

- 发表期刊 / 影响因子:Journal of agricultural and food chemistry
- 发表时间:2026-Sep-02
- 第一/通讯作者:Yilong Fu, Yiyu Lin, Fucai Liu, Jiannan Qiu, Lin Chen
- 核心结论:Metabolic dysfunction-associated steatotic liver disease (MASLD) lacks effective nutrition-based interventions. Hesperetin, a dietary citrus flavonoid, was evaluated for its hepatoprotective mechanism using high-fat diet-induced MASLD mice and free fatty acid-challenged hepatocytes. Hesperetin impro...
- 原文DOI / 链接:10.1021/acs.jafc.5c16995

5. From metabolites to membrane vesicles: Unifying gut microbial signals in obesity, t2dm, and MASLD.

- 发表期刊 / 影响因子:World journal of microbiology & biotechnology
- 发表时间:2026-Sep-03
- 第一/通讯作者:Barathan Muttiah, Gopinath Venkatraman, Puteri Shafinaz Abdul-Rahman
- 核心结论:Obesity, Type 2 diabetes mellitus (T2DM) and metabolic dysfunction-associated steatotic liver disease (MASLD) represent interconnected global health problems that can be caused by dietary factors, life-style changes and alterations in the gut microbiota composition. While numerous reports highlight...
- 原文DOI / 链接:10.1007/s11274-026-05249-6

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选5篇最新研究+1篇经典精读。关注方向:CT-Derived Body Composition and Early Changes Predict Outcomes of First-Line Chemo-Immunotherapy in Recurrent/Metastatic Nasopharyngeal Carcinoma.
