

一、今日前沿论文精选

1. An open-label randomised controlled trial protocol evaluating a Siddha add-on regimen for radiotherapy induced oral mucositis in head and neck cancer patients.

- 发表期刊 / 影响因子:Frontiers in medicine
- 发表时间:2026
- 第一/通讯作者:Shanmugapriya P, Subathra T, Sowmiya S, Gayatri R, Manish Barvaliya
- 核心结论:Radiation-induced oral mucositis (RIOM) is a common and clinically significant complication in patients undergoing radiotherapy or concurrent chemoradiotherapy for head and neck cancers. It can cause severe oral pain, dysphagia, nutritional compromise, secondary infections, and treatment interruption...
- 原文DOI / 链接:10.3389/fmed.2026.1891612

2. Nanomedicine and the tumor immune microenvironment in cancer immunotherapy: a bibliometric and knowledge-mapping analysis.

- 发表期刊 / 影响因子:Frontiers in oncology
- 发表时间:2026
- 第一/通讯作者:Yanzhen Mai, Yaqin Wang, Weiwei Li, Jiajia Lu, Xi Luo
- 核心结论:Nanomedicine can improve cancer immunotherapy by enabling tumor-selective delivery and active modulation of the tumor immune microenvironment (TIME), yet the global structure and translational trajectory of this interdisciplinary field remain unclear. The Web of Science Core Collection and Scopus we...
- 原文DOI / 链接:10.3389/fonc.2026.1895225

3. Predicting unfavorable response to initial radioactive iodine therapy in differentiated thyroid cancer: an explainable machine learning and survival analysis approach.

- 发表期刊 / 影响因子:Frontiers in endocrinology
- 发表时间:2026
- 第一/通讯作者:Longxuan Gu, Guiwen Zheng, Yuechao Zhao, Jiyuan Wang, Lei Qu
- 核心结论:Early post-treatment prognostic assessment may facilitate individualized follow-up in patients with differentiated thyroid cancer (DTC) after initial radioactive iodine (RAI) therapy (RAIT).This study aimed to develop and internally validate a dual-mode machine-learning framework integrating clinica...
- 原文DOI / 链接:10.3389/fendo.2026.1943597

4. Effects of Lactobacillus acidophilus on hepatic and microbial dysregulation in MASLD and diabetes.

- 发表期刊 / 影响因子:Gut microbes
- 发表时间:2026-Dec-31
- 第一/通讯作者:Hee Jin Park, In Gyu Park, Jeong Ha Park, Hyun Joon Park, Jin Ju Jung
- 核心结论:Gut microbial dysbiosis has been implicated in metabolic dysfunction-associated steatotic liver disease (MASLD) and diabetes, but the metabolic effects of candidate probiotic strains across this disease continuum remain incompletely understood. Based on the validation of disease-associated microbial...
- 原文DOI / 链接:10.1080/19490976.2026.2734705

5. Ultrasound-based transient elastography combined with metabolic biomarkers enhances the diagnostic efficacy for pediatric MASLD.

- 发表期刊 / 影响因子:Medicine
- 发表时间:2026-Sep-18
- 第一/通讯作者:Zefeng Bei, Yeying Xiao, Zhongbao Zuo, Jiahui He, Shanshan Wang
- 核心结论:Nonalcoholic fatty liver disease, now encompassed within the updated metabolic dysfunction-associated steatotic liver disease (MASLD) nomenclature, is a common chronic liver disorder in children. This retrospective study evaluated the diagnostic performance of ultrasound-based transient elastography...
- 原文DOI / 链接:10.1097/MD.00000000000050730

6. Coding Agents with an Obstacle-Aware Harness for Safe Robot Manipulation

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-17
- 第一/通讯作者:Bingxin Xu, Yuzhang Shang, Zhen Dong, Emilio Ferrara
- 核心结论:Coding agents have emerged as a promising paradigm for robot manipulation: a language model writes the robot controller as a program, and agents built in this way now operate robots without robot-specific training.Whether this paradigm is also safe, however, has not been asked. We evaluate coding ag...
- 原文DOI / 链接:https://arxiv.org/abs/2609.20822v1

7. Workspace Models: Lightweight Robotic Memory via Saliency-Driven Supervision

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-09-17
- 第一/通讯作者:Nitish Dashora, Douglas Chen, Idan Shenfeld, John Marangola, Pulkit Agrawal
- 核心结论:Complex robotic manipulation tasks frequently require a long-term memory of past events and actions. As conditioning on full histories renders policies prone to spurious correlations and degrades performance, many approaches to policy memory involve compressing historical information through expensi...
- 原文DOI / 链接:https://arxiv.org/abs/2609.20820v1

8. Embedding Models Measure in Peculiar Ways

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-09-17
- 第一/通讯作者:Juri Opitz, Andrianos Michail
- 核心结论:Embedding spaces define notions of semantic similarity and distance. We study whether those embeddings reflect physical measurements of mass, distance, time and volume, which admit a unique, objective notion of semantic equivalence and distance. We find that physical measurement is only weakly model...
- 原文DOI / 链接:<https://arxiv.org/abs/2609.20821v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:<https://doi.org/10.1007/s11739-026-04461-4>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:An open-label randomised controlled trial protocol evaluating a Siddha add-on regimen for radiotherapy induced oral mucositis in head and neck cancer patients.
