

一、今日前沿论文精选

1. Global Efforts to Reduce Paediatric Cancer Care Disparities in Radiotherapy: A Decade Change.

- 发表期刊 / 影响因子:Pediatric blood & cancer
- 发表时间:2026-Sep-02
- 第一/通讯作者:Raymond B Mailhot Vega, Daniel J Indelicato, Jeanette Parkes, Natia Esiashvili, Josué Hernández Benítez
- 核心结论:We present an update on the status, needs and challenges faced by paediatric imaging and radiotherapy (RT) programmes globally after a previous survey conducted by the International Atomic Energy Agency (IAEA) 10 years prior. We developed and distributed a 121-question survey to radiation oncologist...
- 原文DOI / 链接:10.1002/1545-5017.70644

2. A phase II multi-institutional single arm trial evaluating TG4010 vaccine plus nivolumab in non-small cell lung cancer.

- 发表期刊 / 影响因子:Oncoimmunology
- 发表时间:2026-Dec-31
- 第一/通讯作者:Charles X Wang, Guillaume Luxardi, Hidetoshi Mori, Emanuel M Maverakis, Alexander A Merleev
- 核心结论:Immune checkpoint inhibitors (ICIs) have transformed non-small cell lung cancer (NSCLC) therapy, but only 25% of patients have durable responses. TG4010, a mucin 1 (MUC1) vaccine, has demonstrated activity in NSCLC. We conducted a multi-institutional study to determine the safety and activity of niv...
- 原文DOI / 链接:10.1080/2162402X.2026.2695491

3. Residential location shapes initial prostate cancer care in Korea (2010-2020): A nationwide stage- and risk-stratified study.

- 发表期刊 / 影响因子:Investigative and clinical urology
- 发表时间:2026
- 第一/通讯作者:Young Hwii Ko, Sang Won Kim, Nak-Hoon Son
- 核心结论:To characterize nationwide patterns of initial prostate cancer (PCa) management in Korea from 2010 to 2020, stratified by clinical stage, risk, and residential context. We performed a secondary analysis of a chart-abstracted cohort from 51 general hospitals. Initial treatment was classified into ten...
- 原文DOI / 链接:10.4111/icu.20260160

4. Hepatic Steatosis and Cardiovascular Risk in Obesity: A 10-Year Follow-Up Study From Childhood Into Young Adulthood.

- 发表期刊 / 影响因子:Pediatric obesity
- 发表时间:2026
- 第一/通讯作者:Anne-Sophie R Stroes, D Meeike Kusters, Laura Draijer, Anneloes E Bohte, Aart J Nederveen
- 核心结论:The early vascular impact of metabolic dysfunction-associated steatotic liver disease (MASLD) remains unclear. This study examined associations of steatosis in childhood and young adulthood with cardiovascular risk in adulthood. Children with severe obesity were investigated for MASLD and cardiovasc...
- 原文DOI / 链接:10.1111/ijpo.70148

5. Integrating the liver into the cardiovascular-kidney-metabolic syndrome: pathophysiology and therapeutic implications.

- 发表期刊 / 影响因子:Current opinion in nephrology and hypertension
- 发表时间:2026-Sep-02
- 第一/通讯作者:William R Marshall, Smeeta Sinha, Darren Green, Philip A Kalra
- 核心结论:This review examines the mechanistic, epidemiological and therapeutic evidence underpinning liver integration into the cardiovascular-kidney-metabolic (CKM) construct. For the purposes of this review, we use the term cardiovascular-renal-hepatic-metabolic (CRHM) syndrome to denote this expanded fram...
- 原文DOI / 链接:10.1097/MNH.0000000000001225

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选5篇最新研究+1篇经典精读。关注方向:Global Efforts to Reduce Paediatric Cancer Care Disparities in Radiotherapy: A Decade Change.
