

一、今日前沿论文精选

1. Neoadjuvant therapies in high-risk localized prostate cancer: past, present, and future.

- 发表期刊 / 影响因子: Clinical advances in hematology & oncology : H&O
- 发表时间: 2026
- 第一/通讯作者: Sonam Saxena, Jake O' Hara, Qilin Cao, Bruce Haik, Ji Whae Choi
- 核心结论: Treatment for high-risk localized prostate cancer can be particularly challenging because of an elevated risk of disease recurrence. One of the proposed ways to improve the success of definitive localized treatment (such as radical prostatectomy or radiation therapy) for these patients is the additi...
- 原文DOI / 链接: 参见原文

2. Impact of COVID on National Practice Patterns of Adjuvant Radiation Therapy Completion in Treatment of Glioblastoma.

- 发表期刊 / 影响因子: American journal of clinical oncology
- 发表时间: 2026-Sep-14
- 第一/通讯作者: Dupre Orr, Evan Becker, Kai Ding, Shearwood McClelland
- 核心结论: External beam radiation therapy (EBRT) remains the standard adjuvant treatment following maximally safe resection of glioblastoma multiforme (GBM). Hypofractionated radiotherapy (HFRT) offers comparable oncologic outcomes to standard fractionated radiotherapy (SFRT) while reducing overall treatment...
- 原文DOI / 链接: 10.1097/COC.0000000000001359

3. Re: prognostic value of the glucose-to-lymphocyte ratio in surgically treated endometrial cancer.

- 发表期刊 / 影响因子: Future oncology (London, England)
- 发表时间: 2026-Sep-16
- 第一/通讯作者: Havva Beyaz, Yilmaz Tezcan
- 核心结论: 参见原文摘要
- 原文DOI / 链接: 10.1080/14796694.2026.2734058

4. Prime editing models the MTARC1 A165T variant in human liver organoids, demonstrating reduced steatosis, inflammation, and fibrosis.

- 发表期刊 / 影响因子: Hepatology communications
- 发表时间: 2026-Oct-01
- 第一/通讯作者: Amel Ben Saad, Nahid Arghiani, Arden D Weilheimer, Stefan D Gentile, Benjamin J Toles
- 核心结论: Metabolic dysfunction-associated steatotic liver disease (MASLD) is the most prevalent cause of chronic liver disease worldwide. This progressive, multifactorial condition is characterized by hepatic steatosis, which can evolve into steatohepatitis, fibrosis, cirrhosis, and liver cancer. Genetic fac...
- 原文DOI / 链接: 10.1097/HC9.0000000000001022

5. Mild alkaline phosphatase elevation associates with increased mortality and major adverse liver outcomes in MASLD.

- 发表期刊 / 影响因子: Hepatology communications
- 发表时间: 2026-Oct-01
- 第一/通讯作者: Jingyi Hu, Christopher Okarski, Pooja Rangan, Blake Czapl, Kira Zhao
- 核心结论: Alkaline phosphatase (ALP) elevation is commonly observed in patients with metabolic dysfunction-associated steatotic liver disease (MASLD), but its clinical implications in MASLD are unclear. We evaluated whether longitudinal patterns of mild ALP elevation are associated with mortality and major ad...
- 原文DOI / 链接: 10.1097/HC9.0000000000001044

6. Agentic Societies Need a Social Harness

- 发表期刊 / 影响因子: arXiv Preprint
- 发表时间: 2026-09-15
- 第一/通讯作者: Tapan Chugh, Vidushi Singh, Krish Jain, Arvind Krishnamurthy, Ratul Mahajan
- 核心结论: An agentic society is a collection of AI agents that coordinate autonomously across trust boundaries, on behalf of different principals whose objectives may only partially align. We show experimentally that in agentic societies even honest, competent agents often fail to reach satisfactory outcomes...
- 原文DOI / 链接: <https://arxiv.org/abs/2609.17527v1>

7. ScienceBuddy: Recursive-in-Recursive Self-Improvement for Interactive Scientific Agents

- 发表期刊 / 影响因子: arXiv Preprint
- 发表时间: 2026-09-15
- 第一/通讯作者: Shuhan Xue, Jianyuan Zhong, Ziyuan Nan, Wenbin Li, Zhaochen Yu
- 核心结论: We introduce and release ScienceBuddy, an interactive scientific research workspace that brings continually improving scientific agents into researchers' everyday workflows. ScienceBuddy supports researchers in carrying out scientific tasks while transforming their requests, feedback, and execution...
- 原文DOI / 链接: <https://arxiv.org/abs/2609.17523v1>

8. ENCP: Episode-Normalized Conformal Prediction for Vision-and-Language Navigation

- 发表期刊 / 影响因子: arXiv Preprint
- 发表时间: 2026-09-15
- 第一/通讯作者: Vicky Feliren, A. Taufiq Asyhari, Muhamad Risqi U. Saputra
- 核心结论: Uncertainty estimation for Vision-Language-Navigation (VLN) models is a critical task since it can help identify ambiguous and unreliable predictions, enabling agents to make safer navigation decisions. As one of the most advanced uncertainty estimation frameworks, conformal prediction (CP) offers a...

- 原文DOI / 链接:<https://arxiv.org/abs/2609.17499v1>

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取:- 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:<https://doi.org/10.1016/j.ijrobp.2023.01.045>

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Neoadjuvant therapies in high-risk localized prostate cancer: past, present, and future.
