每日医学科研精读日报 | 2026年11月04日

一、今日前沿论文精选

1. When Practice Outpaces Evidence: Comparative Evidence for Stereotactic Ablative Radiotherapy Versus Surgical Resection for Stage I Non-Small Cell Lung Cancer.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Nov-03
- 第一/通讯作者:Brendon M Stiles
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1200/JCO-26-01859

2. Prognostic Value of Volumetric and Voxel-Based [18F]FDG-PET Metrics in Head and Neck Cancer.

- 发表期刊 / 影响因子:Technology in cancer research & treatment
- 发表时间:2026
- 第一/通讯作者:Andrej Doma, Tina Škerl, Andrej Studen, Primož Strojan
- 核心结论:IntroductionIn head and neck cancer (HNC), the prognostic value of [18F]FDG PET/CT SUVmax is limited. Volumetric parameters such as metabolic tumor volume (MTV) and lean body mass-normalized SUV (SUL) may improve risk stratification, particularly in patients with higher body mass index.MethodsWe con…
- 原文DOI / 链接:10.1177/15330338261493386

3. Extracellular Matrix Stiffness Regulates Mechanical-Metabolic Coupling in Tumors: Mechanisms and Therapeutic Opportunities.

- 发表期刊 / 影响因子:Technology in cancer research & treatment
- 发表时间:2026
- 第一/通讯作者:Xiaolin Liu, Yingjie Wang, Fei Qi, Xiaomi Li, Peng Jiang
- 核心结论:The extracellular matrix (ECM) stiffening in the tumor microenvironment (TME) is an important physical characteristic of solid tumors and can serve as an active signaling hub that regulates the biological behavior of tumors. Abnormal deposition, cross-linking, and remodeling of collagen not only alt…
- 原文DOI / 链接:10.1177/15330338261500555

4. GLP-1 Receptor Agonists in Metabolic Dysfunction-Associated Steatotic Liver Disease and Cardiovascular Disease: A Review.

- 发表期刊 / 影响因子:Cardiology in review
- 发表时间:2026-Nov-03
- 第一/通讯作者:Sarah Rahni, Edward Lebovics, William H Frishman, Wilbert S Aronow
- 核心结论:Glucagon-like peptide-1 receptor agonists have transformed the treatment of type 2 diabetes and obesity and have more recently demonstrated clinically important effects across the cardiometabolic spectrum, including metabolic dysfunction-associated steatotic liver disease, metabolic dysfunction-asso…
- 原文DOI / 链接:10.1097/CRD.0000000000001527

5. Impact of sarcopenia on clinical outcomes after endoscopic and endovascular interventions for bleeding gastric varices: A multi-center real-world study.

- 发表期刊 / 影响因子:Indian journal of gastroenterology : official journal of the Indian Society of Gastroenterology
- 发表时间:2026-Nov-03
- 第一/通讯作者:Sagnik Biswas, Souveek Mitra, Santhosh E Kumar, Piyush Aggarwal, Krishna Kumar
- 核心结论:The impact of sarcopenia on the clinical outcomes following gastric variceal (GV) hemorrhage in cirrhosis remains unclear. We retrospectively analyzed patients with cirrhosis and GV bleeding from six centers in India (January 2017-January 2023). Baseline demographics, further decompensation events-r…
- 原文DOI / 链接:10.1007/s12664-026-02054-9

6. FlowTranslator: Training-Free In-Image Machine Translation with Flow-Based Editing

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-03
- 第一/通讯作者:Zhixian Li, Xingsong Ye, Yongkun Du, Yunyan Xiao, Yanglin Huang
- 核心结论:In-image machine translation (IIMT) replaces text in an image with its translation while preserving the surrounding visual context. Existing task-specific models achieve convincing performance but require massive paired training images before and after translation. As advanced text-to-image (T2I) mo…
- 原文DOI / 链接:https://arxiv.org/abs/2611.04303v1

7. OSGR: Observation-Support Graph Reasoning for Earth Observation Question Answering

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-03
- 第一/通讯作者:Dazhou Yu, Zerong Wang, Riyang Bao, Longxiang Li, Yang Liu
- 核心结论:Answering geographic queries over Earth observation (EO) archives requires solving a joint retrieval-and-derivation problem under strict spatiotemporal constraints. Existing LLM agents fail to ground observation items or suffer from search-space explosion. We propose OSGR, a two-stage framework that…
- 原文DOI / 链接:https://arxiv.org/abs/2611.04301v1

8. Nearly Linear-Time Follow-the-Perturbed-Leader for Weakly Observable Graph Bandits

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-03
- 第一/通讯作者:Jongyeong Lee, Hyundam Yoo

- 核心结论:We study online learning with directed weakly observable feedback graphs and propose a Follow-the-Perturbed-Leader (FTPL) policy that achieves best-of-both-worlds guarantee with nearly linear expected time complexity. To preserve the simple structure of FTPL, we develop a novel graph-based loss esti…
- 原文DOI / 链接:https://arxiv.org/abs/2611.04307v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Stereotactic Body Radiation Therapy for Hepatocellular Carcinoma: Current Trends and Future Directions

- 发表期刊 / 影响因子 / 总引用量:International Journal of Radiation Oncology, Biology, Physics / IF=7.0 / 引用量:200+
- 研究背景与里程碑意义:SBRT has emerged as a definitive local treatment for HCC, but optimal dosing, patient selection, and integration with systemic therapies remain active areas of investigation.
- 核心实验设计与方法:Comprehensive review of clinical trials and retrospective studies of SBRT for HCC, including dose-escalation studies, toxicity analyses, and combination strategies.
- 关键结论与行业影响:SBRT achieves local control rates of 80-95% for early-stage HCC with low toxicity. Challenges include BCLC stage-specific outcomes, liver function preservation, and optimal sequencing with immune checkpoint inhibitors.
- 创新点:Systematic framework for SBRT dose selection based on tumor size, location, and liver function; proposed risk-adapted fractionation schedules.
- 原文DOI / 链接:https://doi.org/10.1016/j.ijrobp.2023.01.045

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:When Practice Outpaces Evidence: Comparative Evidence for Stereotactic Ablative Radiotherapy Versus Surgical Resection for Stage I Non-Small Cell Lung Cancer.
