每日医学科研精读日报 | 2026年11月07日

一、今日前沿论文精选

1. Regulatory T Cell Interventions to Boost Anti-tumor Immune Responses.

- 发表期刊 / 影响因子:Cancer research
- 发表时间:2026-Nov-06
- 第一/通讯作者:Yangnan Zhang, Charis E Teh, Clare Y Slaney, Phillip K Darcy, Mark M W Chong
- 核心结论:FOXP3-expressing regulatory T cells (Tregs) are a specialized subset of T lymphocytes that are crucial for maintaining immune homeostasis and preventing autoimmunity. However, their pervasive presence and potent immunosuppressive functions within the tumor microenvironment (TME) are a barrier to ant…
- 原文DOI / 链接:10.1158/0008-5472.CAN-26-0789

2. MultiMHC: a multiscale learning framework integrating sequence and residue contact topology for peptide-MHC binding prediction.

- 发表期刊 / 影响因子:Briefings in bioinformatics
- 发表时间:2026-Nov-02
- 第一/通讯作者:Wenfan Chen, Ying Chi, Yihao Wang, Jingcheng Wu, Mengmeng Wei
- 核心结论:Accurate prediction of peptide-major histocompatibility complex (pMHC) binding is central to understanding antigen presentation and identifying T-cell epitopes in cancer immunotherapy. Although recent methods have achieved notable progress, most approaches rely predominantly on sequence-based featur…
- 原文DOI / 链接:10.1093/bib/bbag466

3. RPL22 mutation is a favourable prognostic subset within mismatch repair-deficient endometrial cancer: a retrospective cohort study.

- 发表期刊 / 影响因子:Journal of obstetrics and gynaecology : the journal of the Institute of Obstetrics and Gynaecology
- 发表时间:2026
- 第一/通讯作者:Chien-Chi Lu, Wei-Jiun Tang, An-Shine Chao, Chiao-Yun Lin, Ting-Chang Chang
- 核心结论:Although mismatch repair-deficient (dMMR) endometrial cancers are highly immunogenic and commonly responsive to immune checkpoint inhibitors, their heterogeneous outcomes indicate that dMMR status alone is insufficient to predict therapeutic benefit. The RPL22 gene - frequently mutated in microsatel…
- 原文DOI / 链接:10.1080/01443615.2026.2753612

4. Mevalonate pathway regulates double-negative regulatory T cell stability in metabolic dysfunction-associated steatotic liver disease.

- 发表期刊 / 影响因子:Science advances
- 发表时间:2026-Nov-06
- 第一/通讯作者:Hua Jin, Xiyu Wang, Longyang Zhou, Xinjie Zhong, Yunxiong Wei
- 核心结论:Lipid metabolism dysfunction and immune imbalance are critical pathogenic drivers of metabolic dysfunction-associated steatotic liver disease (MASLD). Double-negative regulatory T cells (DNTreg) are important immune regulatory cells that maintain liver immune homeostasis. However, their survival and…
- 原文DOI / 链接:10.1126/sciadv.aeb8568

5. Pre-pregnancy maternal steatotic liver disease and offspring neurodevelopmental disorders: a nationwide cohort study.

- 发表期刊 / 影响因子:Hepatology international
- 发表时间:2026-Nov-06
- 第一/通讯作者:Goh Eun Chung, Anna Cho, Da Hye Kim, Su Jong Yu, Yoon Jun Kim
- 核心结论:Maternal metabolic health before pregnancy is increasingly linked to offspring neurodevelopment, but metabolic dysfunction-associated steatotic liver disease (MASLD), the most common chronic liver disease worldwide, has not been examined in this context. We investigated whether maternal steatotic li…
- 原文DOI / 链接:10.1007/s12072-026-11171-8

6. SwarmEvolve: Latent Agent Swarms for Evolutionary Discovery and Optimization

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-05
- 第一/通讯作者:Qile Jiang, George Em Karniadakis
- 核心结论:LLM-guided evolutionary search uses AI agents to improve programs for mathematical and computational problems by iteratively refining solutions and combining high-scoring methods. However, the process is often slow because the LLM generates a long textual chain of thought for each round and must rep…
- 原文DOI / 链接:https://arxiv.org/abs/2611.08483v1

7. Scientist World: Grow a Research World for AI-Scientists

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-05
- 第一/通讯作者:Taiming Lu, Sachin Konan, Zhuang Liu
- 核心结论:AI-Scientists arrived, but a world for them to grow in did not. Human scientists take theirs for granted − centuries of open problems and shared ideas, waiting in the scientific literature. To AI-Scientists, that world is readable but not runnable, so we build Scientist World for them: every resea…
- 原文DOI / 链接:https://arxiv.org/abs/2611.08478v1

8. User Embeddings are Superpositions of Interpretable Behavioral Modes

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-11-05
- 第一/通讯作者:Jonathan Kozaczuk, Zheng Dong, Noyan Evirgen, Keivan Majidi, Eddie K. H. Ng

- 核心结论:User embeddings are central components of modern recommendation, personalization, and behavioral modeling systems. Though these embeddings can compactly encode rich behavioral information, they are inherently dense and opaque, limiting interpretability. To address this gap, we argue that user embedd…
- 原文DOI / 链接:https://arxiv.org/abs/2611.08487v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Regulatory T Cell Interventions to Boost Anti-tumor Immune Responses.

日报自动生成于 2026年11月07日 | 数据来源:PubMed、arXiv | 下一期:明日7:00
