每日医学科研精读日报 | 2026年10月20日

一、今日前沿论文精选

1. Psychosocial Distress and Radiation Treatment Interruptions in Patients With Cancer Using Machine Learning and Regression: Retrospective Cohort Study.

- 发表期刊 / 影响因子:JMIR cancer
- 发表时间:2026-Oct-19
- 第一/通讯作者:Soheil Hashtarkhani, Christopher L Brett, Fekede Asefa Kumsa, Rezaur Rashid, Parnian Kheirkhah Rahimabad
- 核心结论:Uninterrupted delivery of radiation therapy is critical to cancer treatment quality. Unplanned radiation treatment interruptions compromise tumor control and survival. Although previous studies have explored clinical and sociodemographic factors influencing treatment adherence, the role of psychosoc…
- 原文DOI / 链接:10.2196/92899

2. Hypofractionated Versus Conventionally Fractionated Postmastectomy Radiotherapy With Internal Mammary Node Irradiation for High-Risk Breast Cancer (HypoMast-IMNI): A Randomized Phase III Trial.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Oct-19
- 第一/通讯作者:Xiaofang Wang, Xiaomeng Zhang, Xingxing Chen, Zhaozhi Yang, Xin Mei
- 核心结论:When coverage of internal mammary nodes (IMN) is required, the efficacy and safety of hypofractionated regimens within postmastectomy radiotherapy (PMRT) remain to be established. This study evaluated hypofractionated radiotherapy (HypoRT) in patients with high-risk, operable breast cancer undergoin…
- 原文DOI / 链接:10.1200/JCO-25-02843

3. Time-of-Day Immunotherapy: Why the Field Still Needs Randomized Evidence.

- 发表期刊 / 影响因子:Journal of clinical oncology : official journal of the American Society of Clinical Oncology
- 发表时间:2026-Oct-19
- 第一/通讯作者:Vivek Subbiah, Alfredo Addeo, Timothée Olivier
- 核心结论:参见原文摘要
- 原文DOI / 链接:10.1200/JCO-26-01876

4. [Treatment of type 2 diabetes mellitus].

- 发表期刊 / 影响因子:Innere Medizin (Heidelberg, Germany)
- 发表时间:2026-Oct-19
- 第一/通讯作者:Reiner Jumpertz von Schwartzenberg, Julia Király
- 核心结论:Modern diabetology is undergoing a paradigm shift from glucose-centric management toward risk-adapted precision medicine. Differentiated phenotyping into clusters allows for the early identification of organ-specific risks. Pharmacotherapy now prioritizes cardiorenal protection using sodium-glucose…
- 原文DOI / 链接:10.1007/s00108-026-02171-9

5. Lactiplantibacillus plantarum Strains LP5 and BX62 Alleviate Liver Injury of NAFLD in Rats via Regulating Hepatic Cholesterol Metabolism and Antioxidant Signaling Pathways.

- 发表期刊 / 影响因子:Probiotics and antimicrobial proteins
- 发表时间:2026-Oct-19
- 第一/通讯作者:Mengya Jia, Xusheng Guo, Jie Zhu, Hu Chen, Mengyan Chen
- 核心结论:Disorders of lipid metabolism and oxidative stress are pivotal factors in the advancement of non-alcoholic fatty liver disease (NAFLD). This study aims to investigate the liver-protective effects of two Lactiplantibacillus plantarum (L. plantarum) strains, LP5 and BX62, either individually or in com…
- 原文DOI / 链接:10.1007/s12602-026-11255-9

6. Rethinking the design space of Vanilla Pixel Diffusion Transformers

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-16
- 第一/通讯作者:Soumik Mukhopadhyay, Long Mai, Abhinav Shrivastava, Aniruddha Mahapatra
- 核心结论:Pixel-space diffusion models have recently re-emerged as a compelling alternative to latent diffusion, avoiding the lossy latent bottleneck and separately trained autoencoder. JiT shows that a vanilla diffusion transformer can generate directly in pixel space by replacing the commonly used velocity…
- 原文DOI / 链接:https://arxiv.org/abs/2610.23854v1

7. Behavioral Couplings: From Formation to Behavioral Emergence in Language Models

- 发表期刊 / 影响因子:arXiv Preprint
- 发表时间:2026-10-16
- 第一/通讯作者:Dongyoon Hahm, Woogyeol Jin, Dennis Wei, Yi Zhou, Nathalie Baracaldo
- 核心结论:Fine-tuning large language models (LLMs) can induce behaviors beyond those explicitly targeted. For example, training a model to respond more warmly can make it more sycophantic, and training it to write insecure code can cause broad misalignment on prompts unrelated to coding. We refer to a relatio…
- 原文DOI / 链接:https://arxiv.org/abs/2610.23847v1

8. Scalable and Adaptive Distribution Regression via Random Features

- 发表期刊 / 影响因子:arXiv Preprint

- 发表时间:2026-10-17
- 第一/通讯作者:Yinsong Wang, Xiao Liu, Yu Ding
- 核心结论:Distribution regression seeks to learn mappings from probability distributions to response variables and has emerged as a unifying framework for kernel methods, multi-instance learning, and set-valued learning. Despite its success, kernel-based distribution regression remains computationally expensi…
- 原文DOI / 链接:https://arxiv.org/abs/2610.24892v1

二、科研公众号干货

说明:微信公众号文章检索需要微信搜一搜等公开渠道的即时访问能力,当前自动检索模块正在优化中,建议通过以下方式自行获取: - 关注「肿瘤放疗」、「生信技能树」、「医学僧的科研日记」等公众号 - 使用微信搜一搜搜索关键词:肿瘤放疗 生信分析 - 本板块将在后续版本中接入 WeChat 公开内容 API

三、每日高分经典精读

Metabolic dysfunction-associated steatotic liver disease (MASLD): a growing global health priority and a real challenge for the internist.

- 发表期刊 / 影响因子 / 总引用量:Internal and emergency medicine / 2026
- 研究背景与里程碑意义:MASLD has emerged as the most prevalent chronic liver disease worldwide, reflecting the global rise in metabolic disorders such as obesity and diabetes.
- 核心实验设计与方法:Narrative review of epidemiology, pathophysiology, diagnostic criteria, and management strategies for MASLD.
- 关键结论与行业影响:Internists play a central role in early detection and multidisciplinary management of MASLD to prevent progression to cirrhosis and hepatocellular carcinoma.
- 创新点:Pragmatic clinical framework for internists to screen, stage, and manage MASLD in routine practice.
- 原文DOI / 链接:https://doi.org/10.1007/s11739-026-04461-4

四、当日总结

今日共精选8篇最新研究+1篇经典精读。关注方向:Psychosocial Distress and Radiation Treatment Interruptions in Patients With Cancer Using Machine Learning and Regression: Retrospective Cohort Study.
